

FISCAL NOTE

	FY 2019	FY 2020	FY 2021
NON-ADMINISTRATIVE IMPACT			
Anticipated Revenue increase			
GAME & FISH FUND	(\$804)	(\$804)	(\$804)

Source of revenue (decrease):

Reduction of available bison licenses due to approved carryovers from the prior hunt year

Assumptions:

The Game and Fish Department does not anticipate a fiscal impact from the donation of bison licenses portion of this bill, but believes there will be a minor revenue decrease resulting from the carryover component.

For the carryover portion, the three-year average number of wild bison licenses approved for medical refunds from hunt years 2014 through 2016 was used to determine the estimated revenue decrease. It is anticipated that two licenses will be approved for carryover and subsequently reduced from the following hunt year's quota, which will result in those licenses being unavailable for purchase.

It is not possible to determine how many additional carryover requests would be submitted and approved as a result of this bill. Therefore, The Game and Fish Department anticipates our estimated revenue decrease could be understated.
