

Vehicles equipped with automated driving systems.

22LSO-0099, 1.0

FISCAL NOTE

The fiscal impact, in the form of a revenue and expenditure increase, is indeterminable.

This bill provides requirements for vehicles equipped with automated driving systems (ADS). For commercial vehicles equipped with ADS, the Department of Transportation (Department) shall promulgate rules and set fees to recover a proportionate share of the Department's infrastructure and administrative expenses attributable to regulation of commercial vehicles equipped with ADS. Commercial vehicles equipped with ADS are also required to obtain an annual public safety communications system authorization and connection for an annual fee of \$10,000. For any vehicle equipped with ADS, the Department also may assess an additional fee in an amount necessary to recover all reasonable costs incurred by the Department attributable to regulation and administration to accommodate the vehicles. It is unknown how many or when companies will register vehicles equipped with ADS.
