"(H) Before an operator commences a limited mining operation, the department may require the operator to test the water quality of domestic wells within three hundred (300) feet of the proposed limited mining operation for persons identified by the administrator of the water quality division of the department. The department shall not require the operator to sample any domestic wells that the well owner does not grant permission for the operator to sample. The operator shall submit water quality testing results to the administrator of the land quality division of the department." HEINER, CHAIRMAN
