

**FISCAL NOTE**

This bill transfers all property, implements, fixtures, facilities, equipment, obligations, rights and unexpended funds of the integrated test center owned or held by the state of Wyoming to the University of Wyoming School of Energy Resources on the effective date of this act.

This bill requires the Governor's Office, Wyoming Energy Authority, and School of Energy Resources, to the greatest extent possible, take all actions necessary to transfer any existing agreements or contracts of the integrated test center to the school of energy resources.

The University of Wyoming indicates this bill provides for the School of Energy Resources to include a budget for the integrated test center in its budget submitted to the Governor and if circumstances change and costs to operate the integrated test center increase, the budget process will be utilized to request necessary funding.
