

**FISCAL NOTE**

The fiscal impact is indeterminable.

This bill provides for the board of trustees of each school district to provide for the enrollment of any pupil in any public school within the pupil's resident school district, except in cases where a school does not have sufficient capacity or the pupil has been suspended or expelled.

The Department of Education indicates this bill may create indeterminable expenditure increases from the Public School Foundation Program Account in the form of school district allowable transportation expenditures that are reimbursed 100 percent and in the form of increased school district foundation program amounts from the K-12 education resource block grant model, which are based on the unique characteristics of each school and school district, including student enrollment.
