NON-ADMINISTRATIVE IMPACT			
Anticipated Revenue increase			
LOCAL SOURCES FUND	\$400,000	\$400,000	\$400,000

Source of revenue increase:

The Wyoming Lottery Corporation would receive additional revenue from the allowance of debit cards as an acceptable form of transaction for purchasing lottery products which is currently prohibited. These revenue increases would directly benefit the net proceed transfer to the state of Wyoming and allocated to the cities, towns, and counties.

Assumptions:

The Wyoming Lottery Corporation estimates the increased revenue is in the range of \$200,250 to \$600,750 per year so the \$400,000 midpoint is used for the above estimate.
