## PROPOSED AMENDMENTS TO THE RULES AND REGULATIONS OF THE WYOMING BOARD OF PROFESSIONAL GEOLOGISTS

### STATEMENT OF PRINCIPAL REASONS JULY 2015

#### **SUMMARY**

The Wyoming Board of Professional Geologists (Board) operates under statutory authority granted in the Wyoming Geologists Practice Act W.S. §33-41-101 through W.S. §33-41-121. On July 16, 2015, the Board approved these amended administrative rules to begin the formal rule promulgation process. The Board proposes the following changes to its rules for the purposes of:

- Streamlining rules pursuant to Governor Mead's directive. With these modifications, the Board's rules and regulations will be reduced by 3,471 words (35%), 121 sections/subsections (37%), and 10 pages (32%);
- Complying with the rule modifications stipulated for all licensing boards in House Bill 62/HEA 40 (HB62), which became effective on July 1, 2014;
- Incorporating reference to the newly adopted Office of Administrative Hearings' (OAH) administrative rules for contested case hearings;
- Deleting definitions and provisions that duplicate those in the Act;
- Providing definitions for terms commonly used in the rules and not otherwise defined elsewhere.
- Eliminating extraneous language and antiquated provisions in the Board's rules and regulations;
- Addressing general rule maintenance for ease of understanding, formatting and enforcement.

The following highlights proposed changes to each chapter of the Board's rules and regulations.

#### **Chapter 1 – Authority & Definitions**

Proposed changes will delete definitions duplicated in the Act, provide definitions for terms commonly used, and clarify licensing requirements. The chapter title has been revised to reflect content.

#### **Chapter 2 – General Provisions**

Proposed changes will remove items determined to be policy, establish location of the Board office as required by the passage of HB62, establish in rule at least one regular meeting per year as required by the passage of HB62, clarify requirements for a quorum, and incorporate the reference to OAH rules governing contested case hearings as required by the passage of HB62. The chapter title has been revised to reflect content.

### **Chapter 3 – Licensure Provisions**

The majority of proposed changes in this chapter will streamline rules by eliminating extraneous language and simplifying language

### **Chapter 4 – Regulatory Provisions**

Proposed changes to Section 1. Code of Professional Conduct are substantial. This section is being revised to provide clearer expectations of conduct for licensees and trainees. The remaining changes in this chapter are intended to clarify or simplify.

### **Chapter 5 – Application Review, Complaints, and Hearing Procedures**

Proposed changes will remove extraneous language relating to hearing procedures which are now governed by OAH rules and clarify approval actions of the Board Review Committee and Board as required by the passage of HB62. The chapter title has been revised to reflect content.

### **Chapter 6 – Information Practices**

Proposed changes will remove extraneous language and provide information regarding public records inspection.

As required by W.S. § 16-3-103(a)(i)(G), the proposed rules meet minimum substantive state statutory requirements.

(iii) The Board shall not accept any experience gained prior to an applicant's meeting the definition of a geologist in W.S. 33-41-102(a)(iv).

(d) When the Board is satisfied that an application is complete and in the proper form and that the applicant is eligible in all other aspects to be licensed, it shall certify the applicant as eligible to take the FG and PG examinations, or, if exempt from examination pursuant to W.S. 33-41-118(a) or W.S. 33-41-118(b), as eligible for licensure.

(e) If for any reason the Board is not satisfied that an applicant is eligible in all respects for examination or licensure as required by the Act or these rules, it may deny the application or it may require additional information.

(f) Before licensure, an applicant shall have passed both the FG and PG examinations, unless the applicant is exempt from examination, pursuant to W.S. 33-41-118(a) or W.S. 33-41-118(b).

(b) An applicant for certification may be permitted to take the FG examination within the final year of an appropriate, accredited, bachelor's degree program if he has completed or is registered for the geologic course work required to qualify as a geologist.

(c) When the Board is satisfied that an application is complete and in the proper form and that the applicant is eligible in all other aspects to be certified, it shall certify the applicant as eligible to take the FG examination.

(d) If for any reason the Board is not satisfied that an applicant is eligible in all respects for examination or certification as required by the Act or these rules, it may deny the individual's application or it may require additional data concerning the applicant's qualifications for certification.

(e) Before certification, an applicant shall have passed the FG examination.

(f) Trainees may use "G.I.T." or "Geologist-in-training" as a title after their name, providing these designations are not used in conjunction with their file number or preceded by the word "licensed" or any other words that might lead someone to believe they are licensed as a professional geologist.

## **Section 6. Examinations.**

(a) The FG and PG examinations will be given at times and places determined by the Board. Completed application forms for licensure or certification shall be filed with the Board at least ninety (90) calendar days prior to examination dates.

Proof of geologist-in-training status shall be forwarded directly to the Board from the authority which administered the original examination. An applicant shall further comply with all the educational and experience requirements set forth in W.S. 33-41-111, except (a)(iii).

#### **Section 8. Licensure Without Examination.**

## **Section 2. Licensee's Seal.**

(a) The seal authorized for licensees is of the crimp type and/or rubber stamp facsimile and shall be of the design shown below. The seal consists of concentric circles with the diameter of the outer circle being one and three quarter (1.75) inches and the diameter of the inner circle being one and one quarter (1.25) inches. The upper portion between the two circles shall bear the phrase: "PROFESSIONAL GEOLOGIST". At the bottom of the annular space between the two circles shall appear the inscription "WYOMING". The inner circle shall contain the name of the licensee and the license number above the outline of a bucking horse of the size, shape, and orientation shown. It is preferred that a licensee's number be preceded by the capital letters "PG" followed by a short dash (example: PG-0000). A license number without the "PG-" is also acceptable. The assigned license number shall be centered in the inner area of the seal in the space occupied by the word "NUMBER" and the size of the numbers shall not be larger than the letters in "NAME". The words and parentheses "(NUMBER)" and "(NAME)" shall not appear on the seal. The seal shall not include the word "DATE".

(b) After the Board notifies an applicant for licensure that all requirements are satisfied, the applicant shall obtain and purchase a seal of the design stipulated in subsection (a) of this section of the rules in order to complete his licensure. The Board or

its designee(s) will provide a list of vendors who can manufacture and provide seals.

(c) Within ninety (90) calendar days from the date of notification of licensure, the applicant shall submit, on a form provided by the Board, an impression or stamp of the seal he has obtained, superimposed over an original signature. Failure to provide this impression or stamp is a violation of W.S. 33-41-115(b). Upon approval of the seal impression or stamp, a licensee will be sent a license. If the Board disapproves the applicant's seal, the Board shall require the applicant to obtain and purchase another seal that meets the Board's stated specifications. Prior to sealing any work, a licensee shall have his seal approved by the Board.

(d) An imprint of the licensee's valid seal shall appear on the cover page of all original geologic reports or other geologic documents in volume form as well as on each and every sheet of unbound geologic drawings, cross sections, or maps prepared by or under the responsible charge or direct supervision of the licensee, or reviewed in a thorough and technical manner by the licensee, whenever these documents are relevant to public welfare or the safeguard of life, health, property and the environment, pursuant to W.S. 33-41-102(a)(viii). An imprint of the licensee's seal shall be superimposed over his signature and the date signed. Computer generated seals are acceptable if accompanied by an original signature of the licensee and date as long as the computer generated seal complies with the requirements of subsection 2(a) above.

(e) Original work in an electronic format with a computer generated seal may be submitted in digital format or transmitted via electronic mail (e-mail) as follows:

(i) Work shall be certified and dated by the licensee using the following text block or similar wording: The seal appearing on this document was authorized by J. Doe, PG-1111 on (date) or,

(ii) Work shall have an affixed electronic signature and date which is a digital authentication that shall carry the same weight, authority, and effect as an original signature and date. The electronic signature and date shall be: unique to the licensee using it; verifiable; under the sole control of the licensee affixing it; and linked to a document in such a manner that the data in the document can be verified as being unaltered since the time that the digital signature was affixed.

(iii) A scanned image or other reproduction of an original signature and date shall not be substituted for a certified seal nor used in lieu of an electronic signature.

(f) Any work sealed and signed by a licensee shall have been prepared by the licensee, thoroughly and technically reviewed by the licensee, or prepared by someone under the responsible charge or direct supervision of the licensee. After-the-fact ratification of a document by signing, dating, and sealing [as described in Section 2(d)

above], when the underlying work was not performed by or under the responsible charge and supervision of the licensee, is only permissible following thorough and technical review by that licensee.

(g) A licensee whose license is expired shall not use their seal on any work until the license is reinstated.

(h) If a replacement or additional seal is required, the licensee shall submit an impression or stamp of the new seal to the Board for its approval, pursuant to subsection (c) of this section of the rules. The impression or stamp of the new seal shall be accompanied by a statement by the licensee made under oath, stipulating the reason for the seal's duplication.

(i) After notifying the Board of a name change as required in Chapter 3, Section 3 of these rules, a licensee shall obtain a new seal and submit an impression or stamp of the new seal to the Board for its approval, pursuant to subsection (c) of this section of the rules within ninety (90) calendar days after the name change.
