About this Report

The 16th annual edition of *Education Week's Quality Counts* continues the report's tradition of tracking key education indicators and grading the states on their policy efforts and outcomes. This year's special theme—American schooling from an international perspective—examines the nation's place among the world's public education systems and provides a fresh look at the political, social, and cultural challenges the United States faces in preparing its students for the workforce demands of an interconnected world economy.

The special theme is complemented by newly updated 50-state information on policies and conditions in five of the areas monitored by the report on an ongoing basis as part of *Quality Counts'* State of the States framework: Chance for Success; K-12 achievement; standards, assessments, and accountability; the teaching profession; and school finance. Most of the indicators that appear in the report are based on original analyses and state-survey data from the Editorial Projects in Education Research Center, supplemented by information published by other organizations.

To provide a comprehensive perspective on state policy and performance, the 2012 State Highlights Reports integrate findings from the 2011 and 2012 editions of *Quality Counts*. This approach allows us to capture state standings across the full set of six topical areas that comprise the report's state-grading rubric. The overall state scores and letter grades awarded in *Quality Counts* are based on the following categories: Chance for Success; K-12 achievement; standards, assessments, and accountability; the teaching profession; school finance; and transitions and alignment. This year's state reports also highlight challenges posed by a difficult economic climate, as states continue to make cuts to policies and programs in attempt to balance their budgets.

Overall findings from *Quality Counts* show that some states perform consistently well or poorly across the full range of graded categories. However, a closer examination of the results reveals that most states post a strong showing in at least one area. This suggests that while broad evaluations of state rankings and performance can be useful, a deeper reading of the results presented in this State Highlights Report will provide a more nuanced perspective on the educational condition of the nation and the states.

Editorial Projects in Education Research Center January 2012

About Editorial Projects in Education

Editorial Projects in Education (EPE) is a nonprofit, tax-exempt organization based in Bethesda, Md. Its primary mission is to help raise the level of awareness and understanding among professionals and the public of important issues in American education. EPE covers local, state, national, and international news and issues from preschool through the 12th grade. Editorial Projects in Education publishes *Education Week*, America's newspaper of record for precollegiate education, *Digital Directions*, the *Teacher Professional Development Sourcebook*, and the Top School Jobs employment resource. It also produces periodic special reports on issues ranging from technology to textbooks, as well as books of special interest to educators.

The **EPE Research Center** conducts annual policy surveys, collects data, and performs analyses that appear in the *Quality Counts*, *Technology Counts*, and *Diplomas Count* annual reports. The center also produces independent research reports, contributes original data and analysis to special coverage in *Education Week*, and maintains the Education Counts and EdWeek Maps online data resources.

THE GLOBAL CHALLENGE

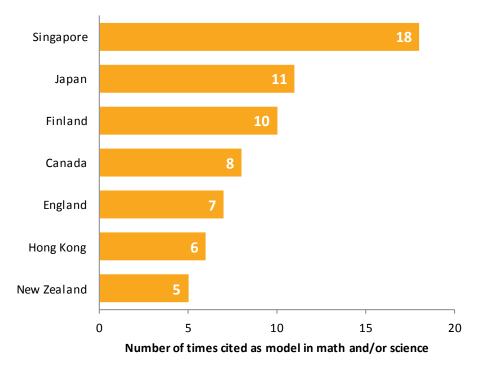

States Seek International Insight

As educators and policymakers seek to prepare students for a competitive global economy, states have looked to other nations to inform the development or revision of their own academic-content standards. States are more likely to seek international guidance in mathematics and science, subjects often linked to economic competitiveness and technological innovation, than in English/language arts or social studies.

| International Standards | The national summary column indicates the number of states using international standards as a model. | | | |
|--|--|-----------|--|--|
| From <i>Quality Counts 2012</i> | Wyoming | Nation | | |
| Standards from other nations used as model | | | | |
| English/language arts | No | 10 states | | |
| Mathematics | No | 23 | | |
| Science | No | 13 | | |
| Social studies/history | No | 2 | | |
| | | | | |

Finding Models For State Standards

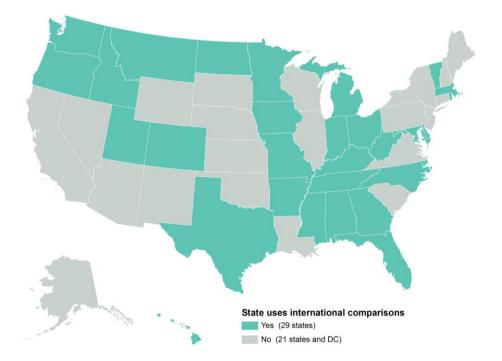

In response to a survey from the Editorial Projects in Education Research Center, 23 states indicated that they used standards from other nations to inform their own standards in mathematics and/or science. State education agency staff most frequently cited standards from Singapore as a model for current state standards in those subjects.

Looking Beyond Our Borders

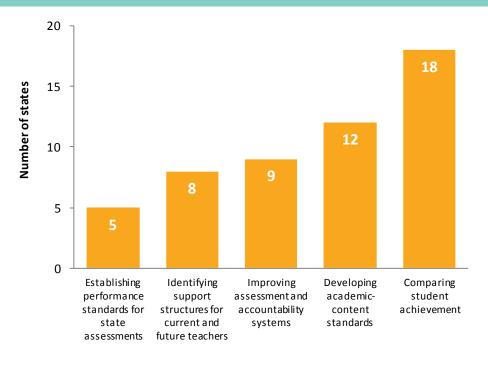

The Editorial Projects in Education Research Center asked state education agency officials whether they look to other countries to inform their own reform efforts. SEA officials in 29 states indicated that their agencies use such international information. In 21 states and the District of Columbia, respondents said the SEA is not currently using education data from other nations as a policy resource.

SOURCE: EPE Research Center, 2012

Putting Global Comparisons to Use

In response to an EPE Research Center survey, many states cited a need to align student preparation with the demands of a global economy and learn from "best practices" in highachieving nations. In describing their ways of using such insight from abroad, states most frequently noted the role of international indicators in comparing student achievement and developing academic-content standards.

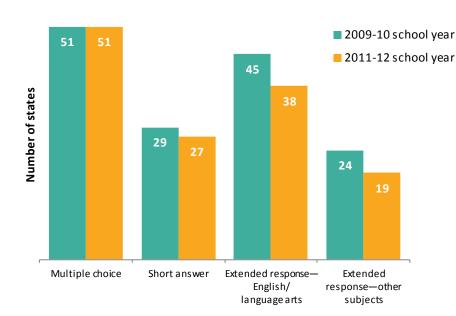

ECONOMIC CONCERNS SPUR STATE POLICY CHANGES

Cutting Back on Ways to Measure Student Performance

The EPE Research Center regularly tracks the types of test items used to measure student performance on state assessments. This year we find a notable drop in the number of states using items that are not multiple choice.

Fewer states include essay questions and other extended-response items on their assessments in 2012 than in 2010. The number of states assessing students' knowledge using shortanswer questions also declined during that span. Some states point to budget cuts as a consideration when changing the format of their assessments.

SOURCE: EPE Research Center, 2012

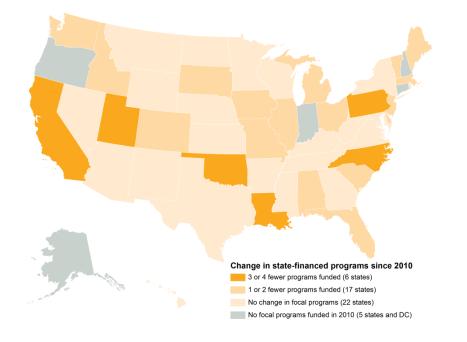

Assessment-item type

Reducing State-Funded Programs for Educators

The EPE Research Center tracks 10 indicators highlighting state efforts to finance programs intended to develop and allocate teaching talent. State strategies include financing professional development for teachers, encouraging teachers and principals to work in hard-to-staff schools or assignment areas, and rewarding teachers based on their performance.

Almost half the states finance fewer such programs in 2012 than they did in 2010. Many states cite budget cuts, prompted by the faltering economy, as a factor in eliminating program funding.

CHANCE FOR SUCCESS

The Chance-for-Success Index

The EPE Research Center developed the Chance-for-Success Index to better understand the role of education over an individual's life time. Based on an original state-by-state analysis, this index combines information from 13 indicators that span an individual's life from cradle to career. The Chance-for-Success framework allows states to identify strong and weak links in their residents' educational life course—their typical trajectory from childhood through adulthood. More importantly, the index also provides information that could be used to target the efforts of public education systems in ways that better serve students of all ages.

State Success Indicators

| | _ | Wyomir | ng | National |
|---|-------|---------------|------|----------|
| From Quality Counts 2012 | S | State Average | Rank | Average |
| Early Foundations | | | | |
| Family income Children from families with incomes at least 200% of poverty level (2010) | | 62.5% | 12 | 55.8% |

| Steady employment Adults in labor force working full time and year-round (2010) | | 72.0 | 12 | 68.0 |
| (| GRADE | B- | 18 | C+ |

Providing Opportunities for Success

The **Chance-for-Success Index** captures the importance of education in a person's lifetime from cradle to career. Its 13 individual indicators span a variety of factors, including preparation in early childhood, the performance of the public schools, and educational and economic outcomes in adulthood.

The states are graded using a "best in class" rubric, where a score of 100 points on the index would mean that a state ranked first in the nation on each and every indicator.

State scores range from 93.1 (Massachusetts, earning the only A) to 64.6 (Nevada, with a D). A closer examination of results shows that, while early foundations and adult outcomes do contribute to the index, indicators related to formal education (the schooling years) are the driving force behind the state rankings.

| U.S. | 24.6 | 34.8 | 18.2 | 77.6 | |

ELEMENTARY AND SECONDARY PERFORMANCE

The K-12 Achievement Index

The K-12 Achievement Index examines 18 distinct state achievement measures related to reading and math performance, high school graduation rates, and the results of Advanced Placement exams. The index assigns equal weight to current levels of performance and changes over time. It also places an emphasis on equity, by examining both poverty-based achievement gaps and progress in closing those gaps.

State Achievement Indicators

| | Wyom | ing | National |
|---|---------------|------|----------|
| From Quality Counts 2012 | State Average | Rank | Average |

Nation Receives Passing Grade on Achievement, But Just Barely

The EPE Research Center's **K-12 Achievement Index** awards states points based on three distinct aspects of student achievement: current levels of performance (status), improvements over time (change), and achievement gaps between poor and nonpoor students (equity).

The nation as a whole earns 69.7 points, on a 100-point scale, for a grade of C-minus. The leading state, Massachusetts, earns 85.9 points and a B, while the District of Columbia finishes last with a score of 56.3.

Only two states— Massachusetts and New Jersey—demonstrate consistently high marks across all three elements of the K-12 Achievement Index, earning a grade of B-minus or better in each of the three achievement dimensions.

K-12 Achievement Index (points awarded by element)

NOTE: State subscores may not sum to total score due to rounding.

STANDARDS, ASSESSMENTS, AND ACCOUNTABILITY

The national summary column indicates the number of states that have

| | enacted a particular policy or, as applicable, the number of states with specified policy enacted for all subject areas or at all grade spans. | | |
|---|--|-----------|--|
| From Quality Counts 2012 | Wyoming | Nation | |
| Academic Standards | | | |
| English/language arts standards are course- or grade-specific (2011-12) | ES MS | 33 states | |
| Mathematics standards are course- or grade-specific (2011-12) | ES MS | 31 | |
| Science standards are course- or grade-specific (2011-12) | No | 26 | |
| Social studies/history standards are course- or grade-specific (2011-12) | No | 26 | |
| Supplementary resources – Materials elaborate on standards in all core subjects (2011-12) | No | 43 | |
| Supplementary resources – Materials provided for particular student populations (2011-12) | Yes | 45 | |
| Assessments | | | |
| Test items used to measure student performance | | | |
| Multiple-choice items (2011-12) | ES MS HS | 51 | |
| Short-answer items (2011-12) | ES MS HS | 27 | |
| Extended-response items – English/language arts (2011-12) | ES MS HS | 38 | |
| Extended-response items – Other subjects (2011-12) | ES MS HS | 19 | |
| Portfolios of student work (2011-12) | No | 0 | |
| Alignment of assessments to academic standards | | | |
| English/language arts (2011-12) | ES MS HS | 51 | |
| Mathematics (2011-12) | ES MS HS | 51 | |
| Science (2011-12) | ES MS HS | 51 | |
| Social studies/history (2011-12) | No | 10 | |
| Assessment systems | | | |
| Vertically equated scores on assessments in grades 3-8 in English (2011-12) | Yes | 21 | |
| Vertically equated scores on assessments in grades 3-8 in math (2011-12) | Yes | 22 | |
| Benchmark assessments or item banks provided to educators (2011-12) | Yes | 32 | |
| School Accountability (policies must apply to Title I and non-Title I schools) | | | |
| State ratings – State assigns ratings to all schools on criteria other than AYP (2011-12) | No | 24 | |
| Statewide student ID – State has a statewide student-identification system (2010) | Yes | 51 | |
| Rewards – State provides rewards to high-performing or improving schools (2011-12) | No | 37 | |
| Assistance – State provides assistance to low-performing schools (2011-12) | Yes | 36 | |
| Sanctions – State sanctions low-performing schools (2011-12) | Yes | 32 | |
| GRAD | DE C+ (rank= 36) | В | |

Key: E = English, M = Math, S = Science, H = History/social studies

ES = elementary school, MS = middle school, HS = high school

Reaching the Parity Line

An original analysis by the EPE Research Center finds that public school teachers nationwide make 94 cents for every dollar earned by workers in 16 comparable occupations. Thirteen states reach or surpass the pay-parity line, meaning teachers earn at least as much as comparable workers.

SCHOOL FINANCE ANALYSIS

Equity and Spending Indicators

| | Wyomi | ng | National |
|---|---------------|------|----------|
| From Quality Counts 2012 | State Average | Rank | Average |
| Equity | | | |
| Wealth-Neutrality Score – Relationship between district funding and local property wealth (2009) | 0.056 | 16 | 0.087 |
| McLoone Index – Actual spending as percent of amount needed to bring all students to median level (2009) | 93.2% | 9 | 90.9% |
| Coefficient of Variation – Amount of disparity in spending across districts within a state (2009) | 0.189 | 37 | 0.168 |
| Restricted Range – Difference in per-pupil spending levels at the 95th and 5th percentiles (2009) | \$5,262 | 39 | \$4,428 |
| Spending | | | |
| Adjusted per-pupil expenditures (PPE) – Analysis accounts for regional cost differences (2009) | \$18,068 | 1 | \$11,665 |
| Students funded at or above national average – Percent of students in districts with PPE at or above U.S. average (2009) | 100.0% | 1 | 40.5% |
| Spending Index – Per-pupil spending levels weighted by the degree to which districts meet or approach the national average for expenditures (2009) | 100.0 | 1 | 89.3 |
| Spending on education – State expenditures on K-12 schooling as a percent of state taxable resources (2009) | 4.3% | 15 | 3.9% |
| GRADE | B+ | 1 | С |

Definitions of School Finance Indicators

Wealth-Neutrality Score: The wealth-neutrality score shows the degree to which state and local revenue are related to the property wealth of districts. A negative score means that, on average, poorer districts actually have more funding per weighted pupil than wealthy districts do. A positive score means the opposite: Wealthy districts have more funding per weighted pupil than poor districts do.

McLoone Index: The McLoone Index is based on the assumption that if all students in the state were lined up according to the amount their districts spent on them, perfect equity would be achieved if every district spent at least as much as that spent on the pupil in the middle of the distribution, or the median. The McLoone Index is the ratio of the total amount spent on pupils below the median to the amount that would be needed to raise all students to the median per-pupil expenditure in the state.

Coefficient of Variation: The coefficient of variation is a measure of the disparity in funding across school districts in a state. The value is calculated by dividing the standard deviation of adjusted spending per pupil by the state's average spending per pupil. The standard deviation is a measure of dispersion (i.e., how spread out spending levels are across a state's districts). If all districts in a state spent exactly the same amount per pupil, its coefficient of variation would be zero. As the coefficient gets higher, the variation in the amounts spent across districts also gets higher. As the coefficient gets lower, it indicates greater equity.

Restricted Range: This indicator captures the differences in funding levels found between the highest- and lowest-spending districts in a state. The index value is calculated as the difference in per-pupil spending levels at the 95th and 5th percentiles. Districts enrolling fewer than 200 students are excluded from the analysis.

Spending Index: The Spending Index takes into account both the proportion of students enrolled in districts with spending at the national average, and the degree to which spending is below that benchmark in districts where per-pupil expenditures fall below the national average. Each district in which the per-pupil-spending figure (adjusted for student needs and cost differences) reaches or exceeds the national average receives a score of 1 multiplied by the number of students in the district. A district whose adjusted spending per pupil is below the national average receives a score equal to its per-pupil spending divided by the national average and then multiplied by the number of pupils in the district. The spending index is the sum of district scores divided by the total number of students in the state. If all districts spend above the U.S. average, the state attains a perfect index score of 100 points.

Note: The District of Columbia and Hawaii are single-district jurisdictions. As a result, it is not possible to calculate measures of financial equity, which capture the distribution of funding across districts within a state. The District of Columbia and Hawaii do not receive grades for school finance and are not included in the rankings reported in this table.

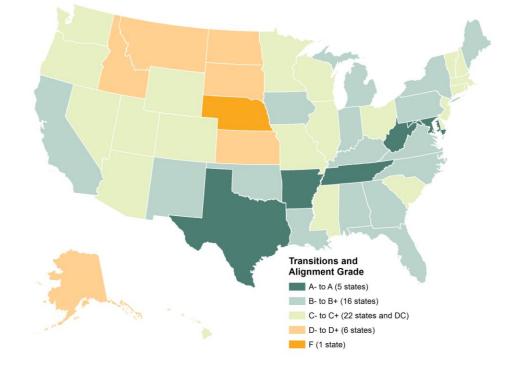

TRANSITIONS AND ALIGNMENT

| Education Alignment Policies | The national summary column indicates the number of states that have enacted a particular policy. | | |
|---|--|-----------|--|
| From <i>Quality Counts 2011</i> | Wyoming | Nation | |
| Early-Childhood Education (2010-11) | | | |
| Early learning – State early-learning standards aligned with K-12 standards | Yes | 48 states | |
| School-readiness definition – State formally defines school readiness | No | 22 | |
| School-readiness assessment – Readiness of entering students assessed | Yes | 19 | |
| School-readiness intervention – Programs for students not deemed ready | No | 23 | |
| Kindergarten standards – Learning expectations aligned with elementary | Yes | 51 | |
| Postsecondary Education (2010-11) | | | |
| College readiness – State defines college readiness | Yes | 33 | |
| College preparation – College prep required to earn a high school diploma | No | 10 | |
| Course alignment – Credits for high school diploma aligned with postsecondary system | No | 11 | |
| Assessment alignment – High school assessment aligned with postsecondary system | Yes | 15 | |
| Postsecondary decisions – High school assessment used for postsecondary decisions | No | 11 | |
| Economy and Workforce (2010-11) | | | |
| Work readiness – State K-12 system defines work readiness | In progress | 33 | |
| Career-tech diploma – State offers high school diploma with career specialization | Yes | 38 | |
| Industry certification – K-12 has path for industry-recognized certificate or license | No | 42 | |
| Portable credits – K-12 pathway to earn career-tech. credits for postsecondary | Yes | 48 | |
| GRAD | \mathbf{C} (rank= 28) | C+ | |

A National Perspective

The EPE Research Center examined state efforts to connect the K-12 education system with early learning, higher education, and the world of work. Fourteen key transitions and alignment policies were included in *Quality Counts 2011*.

By the 2010-11 school year, most states had enacted at least eight of the 14 tracked policies. Thirteen states had 10 or more policies in place. At the other end of the spectrum, Montana and South Dakota had just three such policies in place, and Nebraska only two.

NOTES AND SOURCES

Quality Counts 2012

This year's 16th edition of *Quality Counts* examines the American education system from an international perspective. *Quality Counts 2012* also provides a 50-state update on policies and conditions in five distinct areas: Chance for Success; K-12 achievement; standards, assessments, and accountability; teaching; and school finance.

The State Highlights Reports present statespecific summaries of key findings across all six areas of policy and performance that comprise the report's state-grading rubric. Information is drawn from the 2011 and 2012 editions of *Quality Counts*. Reports for the 50 states and the District of Columbia are available on the Web at www.edweek.org/go/qc12shr

State Policy Indicators

Quality Counts regularly tracks and grades state progress in six categories comprising more than 150 different state-by-state indicators. The 2012 installment of the report also includes a special focus on international comparisons in K-12 education. Most of these 50-state indicators are based on original analyses and state-survey data from the EPE Research Center. The report also draws on published information from other organizations.

The methodology section of *Quality Counts* provides detailed descriptions of our indicators and procedures for grading the states. That information can be accessed online at <u>www.edweek.org/go/qc12</u> (2012) and <u>www.edweek.org/go/qc11</u> (2011).

Between June and October of 2011, the EPE Research Center conducted an original survey of state education agencies and the District of Columbia public schools. This survey provided information for most of our state policy measures. Indicators derived from other sources are noted below.

Chance for Success (2012)

Elementary Reading and Middle School Mathematics: 2011 State NAEP assessment. U.S. Department of Education, 2011.

High School Graduation: Cumulative Promotion Index, calculated using the U.S. Department of Education's Common Core of Data, 2007-08. EPE Research Center, 2011.

Other Indicators: EPE Research Center analysis of data from the U.S. Census Bureau's American Community Survey, 2010.

K-12 Achievement (2012)

Reading and Mathematics Achievement: 2011 State NAEP assessment. U.S. Department of Education, 2011.

High School Graduation: Cumulative Promotion Index, calculated using the U.S. Department of Education's Common Core of Data, 2007-08. EPE Research Center, 2011.

Advanced Placement: EPE Research Center analysis of data from the College Board's AP Summary Reports and the U.S. Department of Education's Common Core of Data, 2010.

Standards, Assessments, and Accountability (2012)

Assessment item types and alignment to state standards: EPE Research Center review of testing calendars and other materials from state education agency websites, as verified by states, 2011.

State has a statewide student-identification system: Data Quality Campaign, 2010.

Other Indicators: EPE Research Center annual state policy survey, 2011.

The Teaching Profession (2012)

Data Systems to Monitor Quality: Data Quality Campaign, 2011.

Teacher-Pay Parity: EPE Research Center analysis of data from the U.S. Census Bureau's American Community Survey, 2009 and 2010.

Student-to-Teacher Ratio: EPE Research Center analysis of U.S. Department of Education's Common Core of Data, 2009-10.

Other Indicators: EPE Research Center annual state policy survey, 2011.

School Finance Analysis (2012)

Original EPE Research Center Analysis of Equity and Spending: Data for these analyses were obtained from a variety of sources, including: U.S. Census Bureau's Public **Elementary-Secondary Education Finance** Data for 2009; U.S. Department of Education's Common Core of Data 2005-06, 2006-07, 2007-08, and 2008-09 (district-level data); NCES' Comparable Wage Index 2005; U.S. Census Bureau's Small-Area Income and Poverty Estimates 2009; U.S. Department of Education's School District Demographics data, based on the 2000 U.S. Census; NCES, **Revenues and Expenditures for Public** Elementary and Secondary Education: School Year 2008-09 (Fiscal Year 2009), June 2011; and 2009 gross-state-product data from the U.S. Department of Commerce's Bureau of Economic Analysis.

Transitions and Alignment (2011)

All Indicators: EPE Research Center annual state policy survey, 2010.

QUALITY COUNTS 2012

The Global Challenge Education in a Competitive World

The 16th edition of *Quality Counts* explores the American education system from an international perspective. The report also provides a 50-state update on policies and conditions in five of the areas monitored by the report on an ongoing basis: Chance for Success; K-12 achievement; standards, assessments, and accountability; teaching; and school finance.

Highlights from this year's report

A comprehensive look at **U.S. Education in a Competitive Global Environment**, including timely journalistic coverage and original data and analyses

EPE Research Center's **Chance-for-Success Index**, a cradle-to-career perspective on the importance of education throughout a person's lifetime

State of the States—Our comprehensive annual review of state policy and performance, this year highlighting: Chance for Success; K-12 achievement; standards, assessments, and accountability; the teaching profession; and school finance

Online Extras

State Highlights Reports—Download individualized reports featuring state-specific findings from *Quality Counts*

Webcast and Event Archive—On-demand viewing of video from the *Quality Counts* release event featuring a presentation of highlights from the report and perspectives from leading experts discussing the impact of international education policy and practices on U.S. schools

Education Counts—Access hundreds of education indicators from *Quality Counts* using our exclusive online database

Interactive tools—Readers can delve into state data and use an online calculator to recompute grades based on the indicators they feel are most important
