Crude oil production tax exemption.

Sponsored by: Joint Minerals, Business & Economic Development Interim Committee

A BILL

for

AN ACT relating to mine product taxes; providing an exemption on taxes for the production of crude oil as specified; requiring reports; and providing for an effective date.

Be It Enacted by the Legislature of the State of Wyoming:

The Committee may wish to consider the following as it reviews this bill draft:

- Whether the exemption applies to all production, or just production from new wells that are drilled after the exemption period starts.
• Whether the bill should specify a time period for the
  price of oil being above $45 before the exemption is
  triggered (for example, WTI must trade at or above $45
  for a week before it is triggered) or whether the spot
  price simply reaching $45 for any period of time
  triggers the exemption.
