

GOVERNOR'S HEALTH TASK FORCE and

VISION: Wyoming Will Have Healthy, Thriving Communities across Generations

STRATEGY MAP

The Strategy Map is a compilation of a variety of ideas from a large group of health related experts that focused on generating ideas in four different categories including aging, health care infrastructure, primary care and the social determinants of health. Each subcommittee brought forth recommendations based on the identified needs. The recommendations will develop the larger strategic plan for Wyoming health care.

CORE PURPOSE

The primary purpose of the Task Force is as follows:

Manage Costs

Access to Affordable Primary
Care for All Residents

Provide Quality Care
throughout the Continuum of
Services

STRATEGIC OBJECTIVES

Establish a comprehensive health care delivery system focused on essential services and primary care

Readily available access to essential services and primary care

Reimagine and establish a sustainable health care funding structure

Affordable health care coverage for WY residents

Build capacity to ensure availability of a coordinated resource service network across Wyoming

Resources are efficiently coordinated and available to all residents

Establish and strengthen strategic communication and education to consumers, providers, and partners

Residents of WY are informed users of health care in WY

Expand and strengthen health care workforce capacity

Readily available and trained workforce to meet the immediate needs based on community demographics
