December 10, 2012

To: Members, 62nd Wyoming Legislature

From: LSO Budget/Fiscal

Subject: Fiscal Databook

This book is intended to provide a range of fiscal and budget data in a condensed format. It is not intended to be a substitute for detailed analysis of any single component of the state's finances. The information provided here is primarily historical, but does contain data on the FY 2013-2014 budget, current through the 2012 Legislative Session.

We hope this book proves useful, and as always, if we can provide more or more detailed information, please let us know.

REVENUES SECTION

CREG

The Consensus Revenue Estimating Group (CREG) is responsible for formulating projections of the main sources of income to the major accounts in the state. CREG was formed in 1983 as a result of the need for reliable and consistent revenue estimates that could be used by the executive branch and the legislature in the budgeting process. Prior to the formation of CREG, both governmental entities produced and used their own revenue estimates. As would be expected in such a process, disparity between estimates arose, and the discussions that should have been focused on governmental spending levels were instead often focused on the revenue estimates themselves. Among the purposes of the CREG formation was the elimination of those revenue arguments.

CREG is composed of members from various professional fields and governmental organizations. LSO's Budget/Fiscal Manager and the Economic Analysis Division Administrator from the Department of Administration and Information serve as the co-chairmen of CREG. The body of the group is made up of the Director of the Wyoming Oil and Gas Commission, the Director of the Wyoming Geological Survey, a University of Wyoming Economics Professor, and representatives from the State Auditor's Office, Department of Revenue, Department of Education, and the State Treasurer's Office. This composition results in representation from the legislative and executive branches, as well as the academic and professional realms. The members of CREG project the various streams of revenue to the General Fund, revenues from mineral severance tax and federal mineral royalties, revenues received by the Common School Land Income account, and the total state assessed valuation.

The process of developing these estimates begins in August when the members of the minerals subgroup of CREG begin preparing estimates of mineral valuations. This subgroup is composed of the Director of the Wyoming Oil and Gas Commission, the Director of the Wyoming Geological Survey, the Supervisor of the Mineral Tax Valuation Division of the Department of Revenue, and the CREG co-chairmen. In late September the minerals subgroup meets and finalizes the estimates of mineral valuation. The entire CREG group meets in early October to review the minerals subgroup's valuation estimates and to forecast the balance of the revenue categories. After the projections are complete, the LSO and the Economic Analysis Division compile the information into the annual CREG report. The Governor and the Legislature then use the CREG forecasts as the official revenue estimates for preparing and adopting state agency budgets.

If necessary, the October CREG forecasts are revised in January, the only other regularly scheduled meeting of the group. An official CREG report is issued after the January meeting that contains the revised projections, if revisions were made. The January meeting takes advantage of the most current actual data and thereby makes the near-term forecasts as accurate

as possible before the information is used in the legislative session. Unusual circumstances sometimes require CREG to hold a special meeting to revise its estimates, as was the case during the Persian Gulf war when oil prices skyrocketed, resulting in increased, short-term mineral revenues. In cases such as these, a special report is issued outlining the content of the meeting and any revisions that were made to the forecasts.

CREG projections are not used solely by the Governor and the Legislature for budget decisions but are also the revenue estimates used for making decisions concerning the state's water accounts, the highway fund, and revenue streams flowing to the cities, towns, and counties.

CREG REPORT

In the CREG report, major revenue sources to the General Fund are detailed including sales and use taxes, pooled interest and Permanent Wyoming Mineral Trust Fund interest, and severance taxes. Other revenue sources projected include charges for sales and services, franchise taxes, inheritance taxes, licenses and permits, and other smaller, more varied sources of revenue to the General Fund.

The severance tax forecast details projected production, price and expected severance tax receipts for each major mineral including oil, natural gas, coal, and trona. In addition, the report shows expected distribution of severance taxes to each fund or account that receives a portion of the taxes.

The federal mineral royalty forecast also details projected production, price and expected royalties for oil, natural gas and coal and details the expected distribution of royalties to each fund or account that receives the royalties.

The last sections of the report projects income derived from investment of the Common School Permanent Land Fund and projects total state assessed valuation based on mineral price and production estimates and estimates of assessed valuation for all other types of property based on historical trends.

OTHER REVENUES

There are other significant sources of revenue to the state that are not projected by CREG. These include sources that are typically earmarked by state statute or other "strings" for a specific purpose. Examples of these sources are federal funds; other taxes such as gasoline, and property taxes; revenues from licenses, permits, and other regulatory fees such as motor vehicle registration, game and fish licenses, university tuition and fees, workers' compensation insurance premiums, royalties and fees from state-owned lands; and literally hundreds of other smaller sources.

Summary Matrix of Major Revenue Sources

	Federal Mineral Royalties	Coal Lease Bonus	State Severance Tax	State Mineral Royalties/ Leases	State Investment Income	Fuel Tax	State Tobacco Tax	Inheritance, Alcohol & Misc. Taxes	State Sales/Use Tax	Local Optional Sales/Use Tax	State Property Tax	Local Property Tax
General State Funds												
General Fund (GF)			X		X		X	X	X

Notes:

The following revenue sources have been intentionally omitted:

- Federal funds (Some federal funds flow directly to local entities; others flow through state agencies. All have been omitted from this matrix.)
- Fees, charges for sales and services, and fines and forfeitures
- Unemployment insurance and worker's compensation
- Tobacco settlement revenues (these are presented separately on page 21.)
- * State investment income could be directed to the PWMTF and Common School Account (CSA) through the Spending Policy Reserve Accounts.

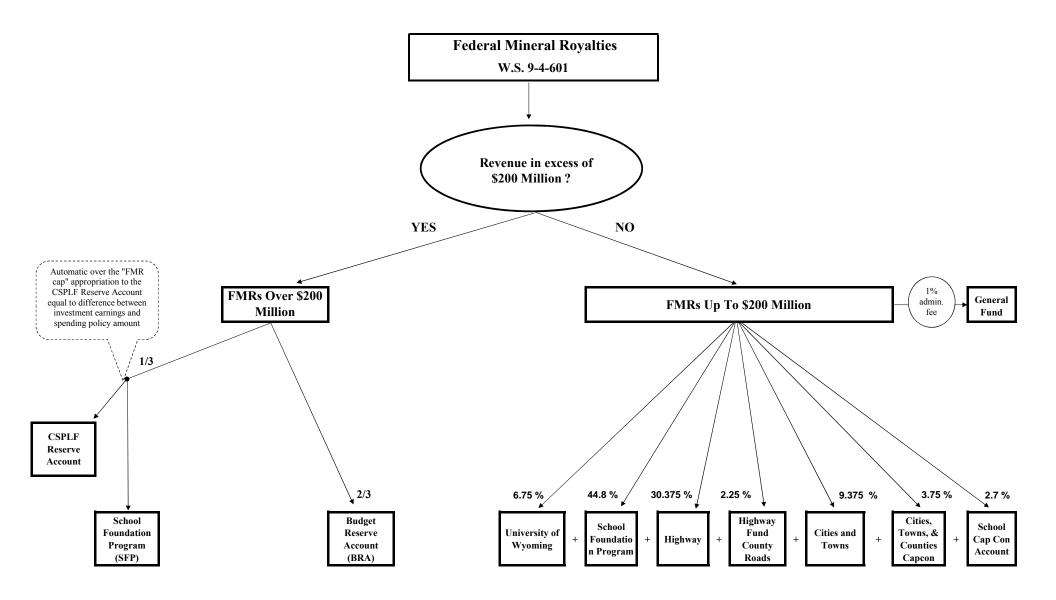

Summary Flow Chart of Major Revenue Sources

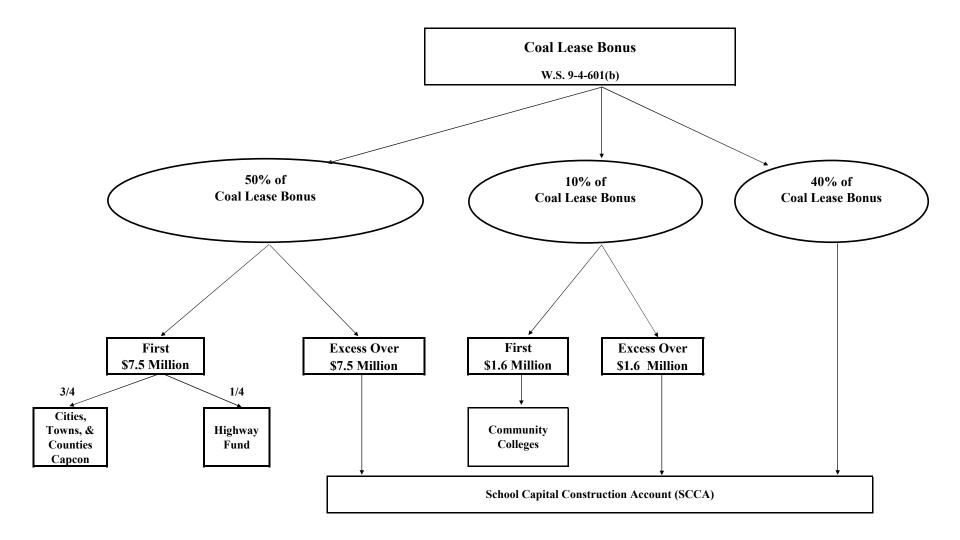

Notes:

- 1) The following revenue sources have been intentionally omitted:
- Federal funds (Some Federal funds flow directly to local entities; others flow through state agencies. All have been omitted from this illustration.)
- Fees, charges for sales and services, and fines and forfeitures
- Unemployment insurance and worker's compensation
- Tobacco settlement revenues (these are presented separately on page 21.)
- 2) SLIB = State Loan and Investment Board

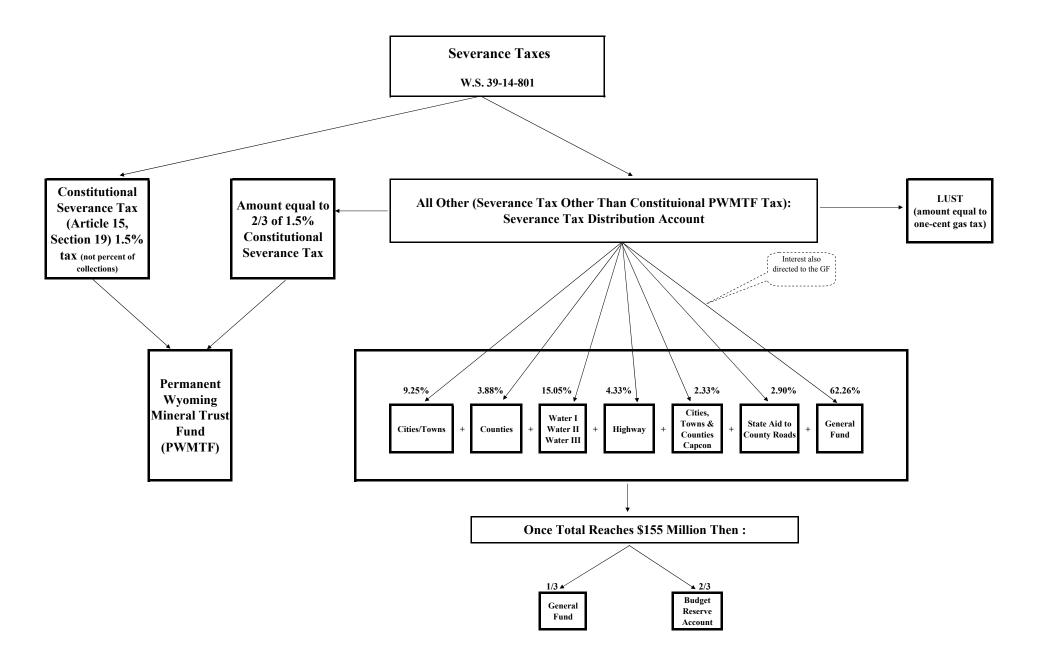

Distribution of Federal Mineral Royalties (FMRs): "Current Law"

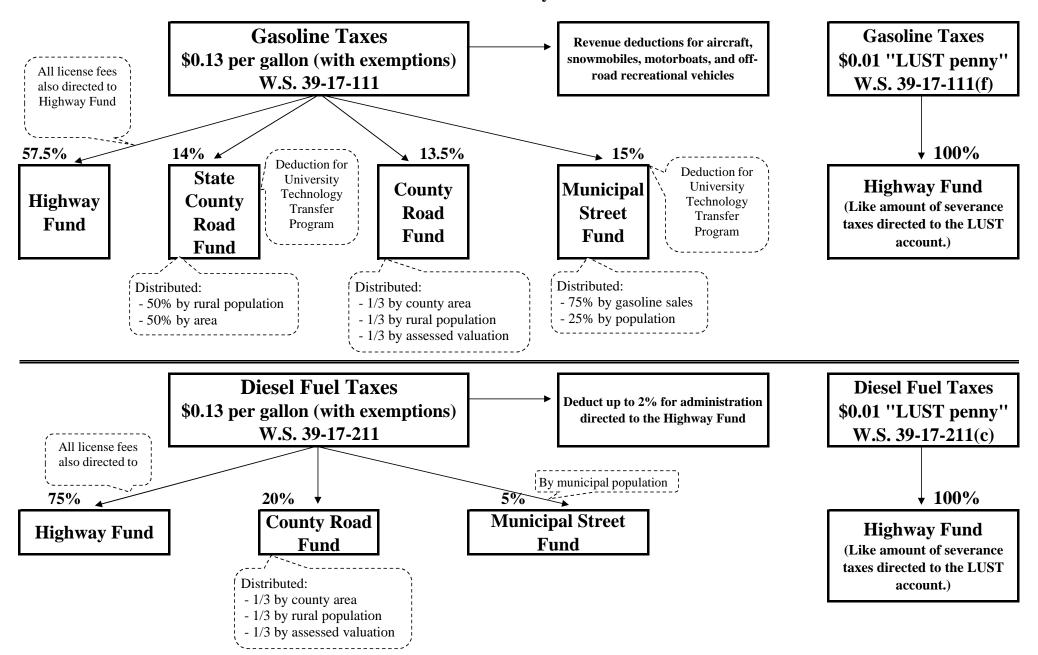

Distribution of Coal Lease Bonuses: "Current Law"

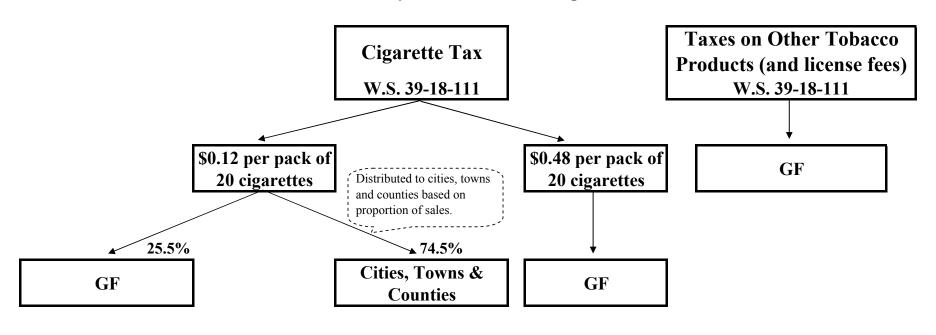

Distribution of Severance Taxes: "Current Law"

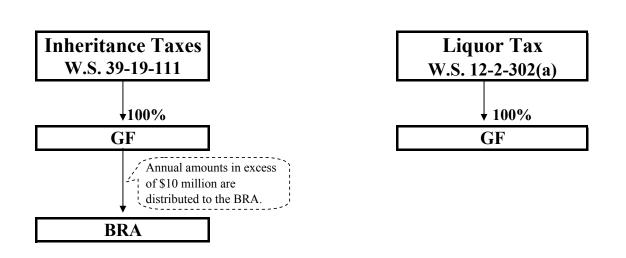

Distribution of Revenue by Source: Fuel Taxes

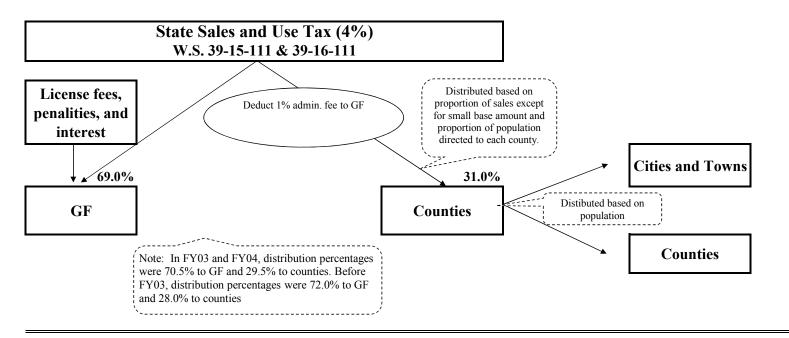

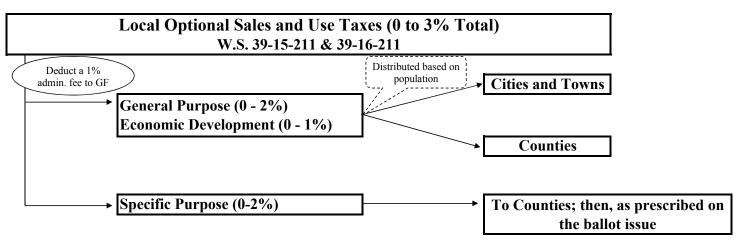

Distribution of Revenue by Source: Tobacco, Liquor, Inheritance Taxes

Distribution of Revenue by Source: Sales Taxes

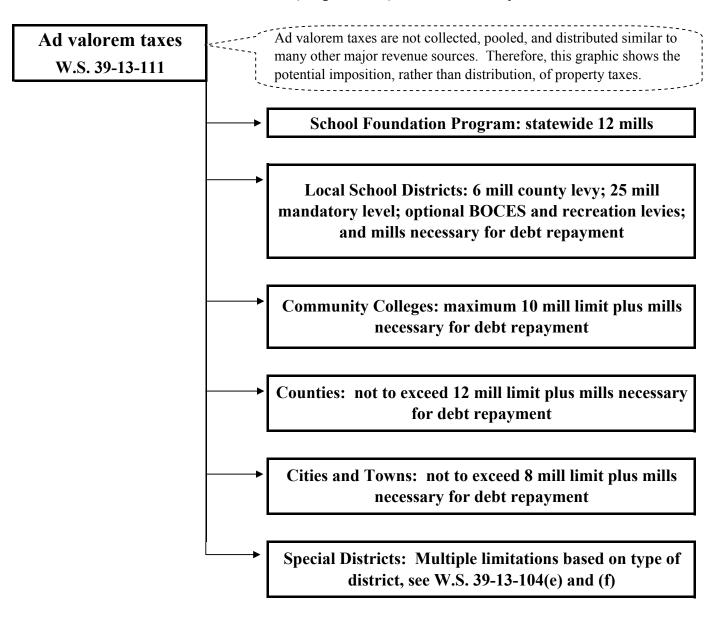

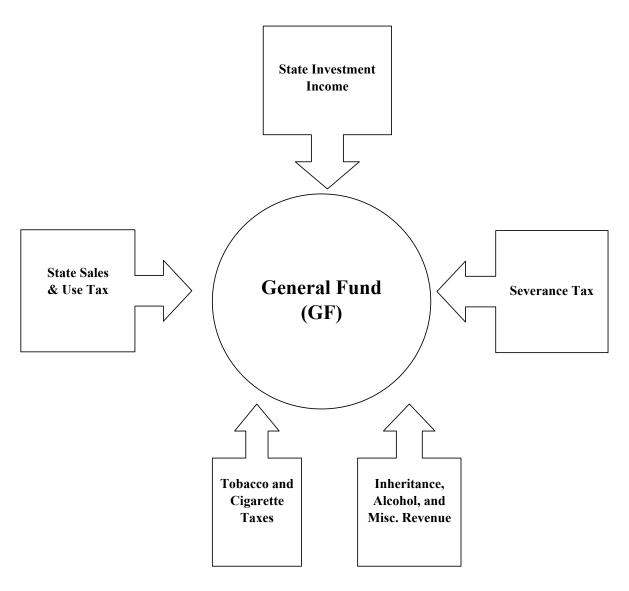

Notes:

- 1) Distribution of lodging taxes excluded.
- 2) Distribution related to impact assistance payments and other special considerations, not included.

Distribution (Imposition) of Revenue by Source: Ad Valorem Taxes

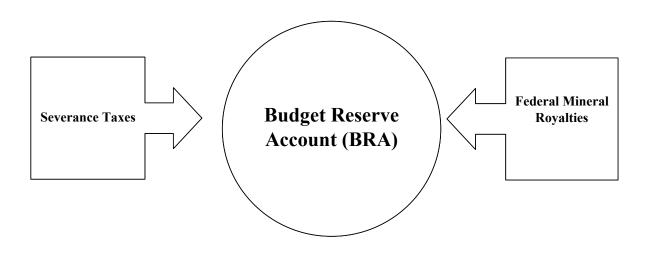

Distribution of Major Revenue by Recipient: General Fund

Note: Miscellaneous revenues also include penalties, franchise taxes, charges for sales and services, license and permit fees, property and money use fees, non-revenue receipts, and all other general fund revenue.

Distribution of Major Revenue by Recipient: Budget Reserve Account and Water Development Accounts

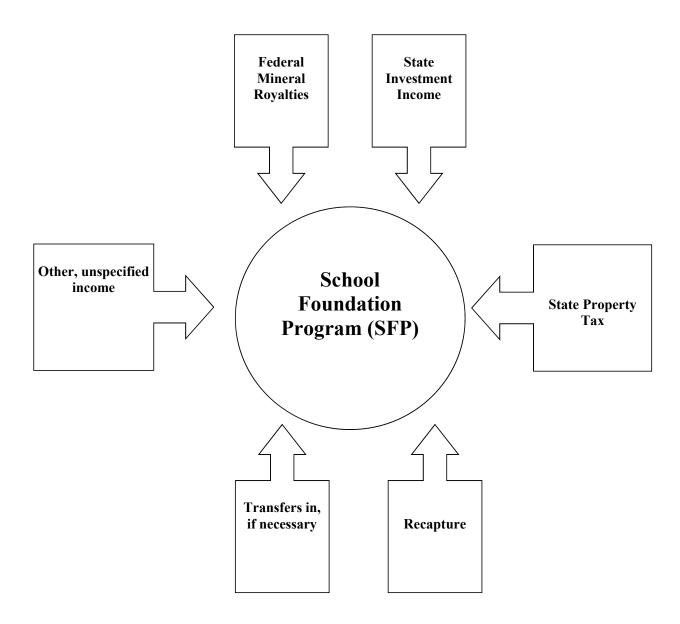

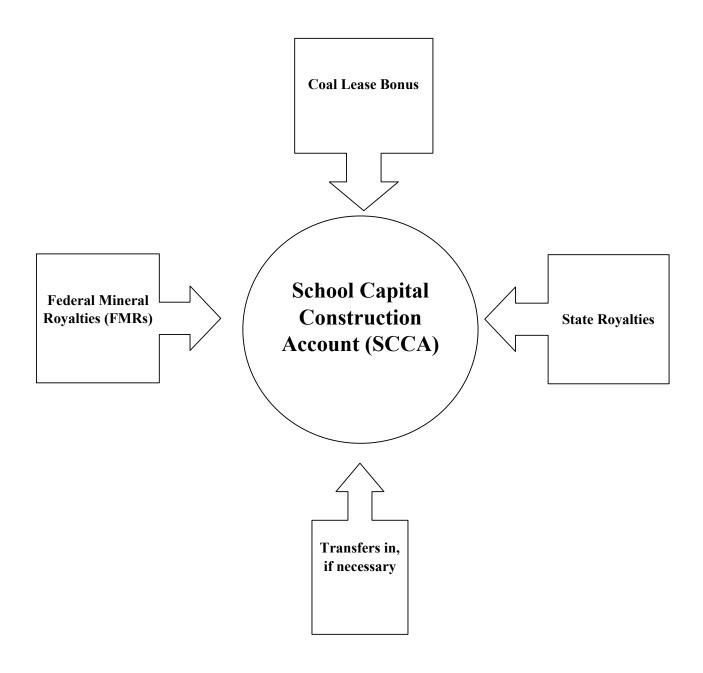

Note:

^{*} Water development account revenue based on accounting of the Wyoming Water Development Office, and therefore, may not match CREG (accrual) reported numbers. Water development account III receives a small portion of severance taxes, but the majority of revenue into this account is via direct appropriation.

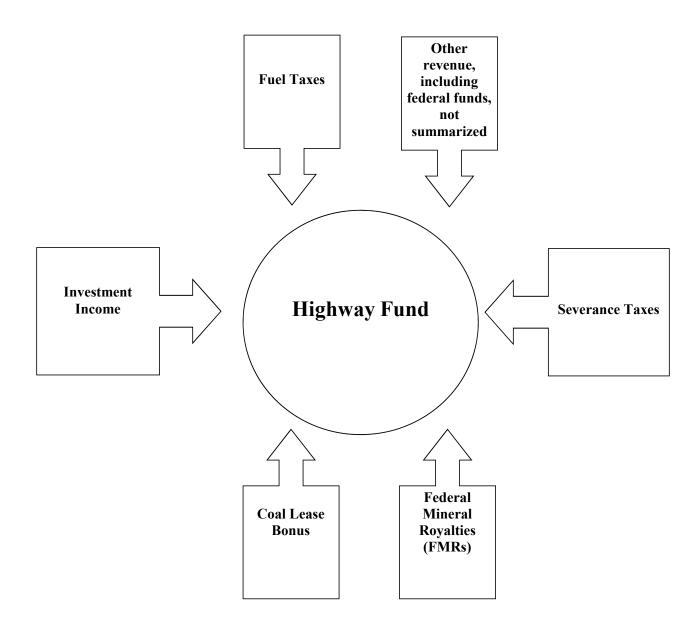

Distribution of Major Revenue by Recipient: School Foundation Program

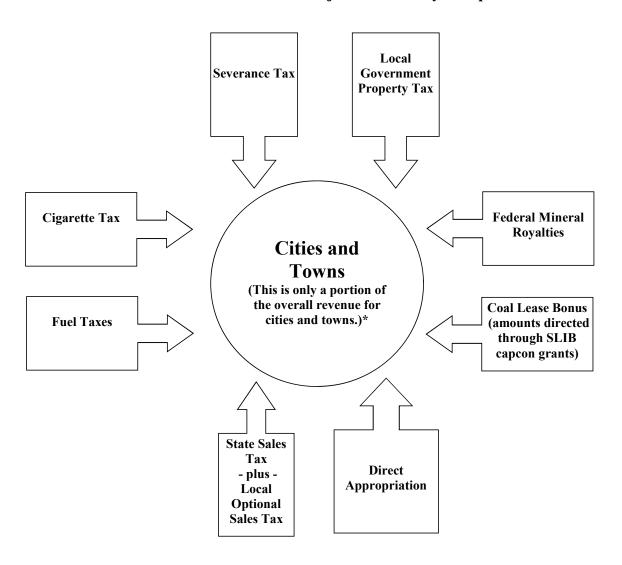

Distribution of Major Revenue by Recipient: School Capital Construction Account

Distribution of Major Revenue by Recipient: Highway Fund

Distribution of Major Revenue by Recipient: Cities Towns

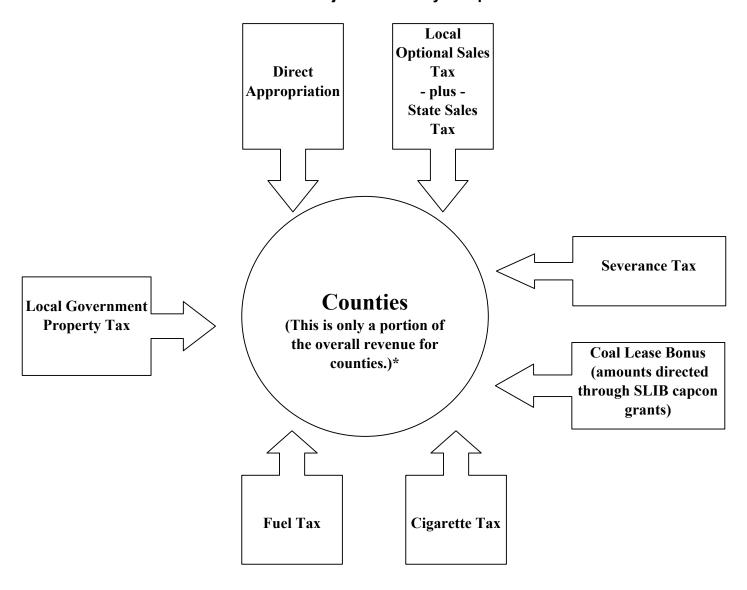

Notes:

FMRs and severance taxes are distributed monthly based on CREG estimates. Variances from CREG projections are corrected in the next fiscal year's distributions.

^{*} Does not include other revenue such as federal funds, fees, additional grants, etc.

Distribution of Major Revenue by Recipient: Counties

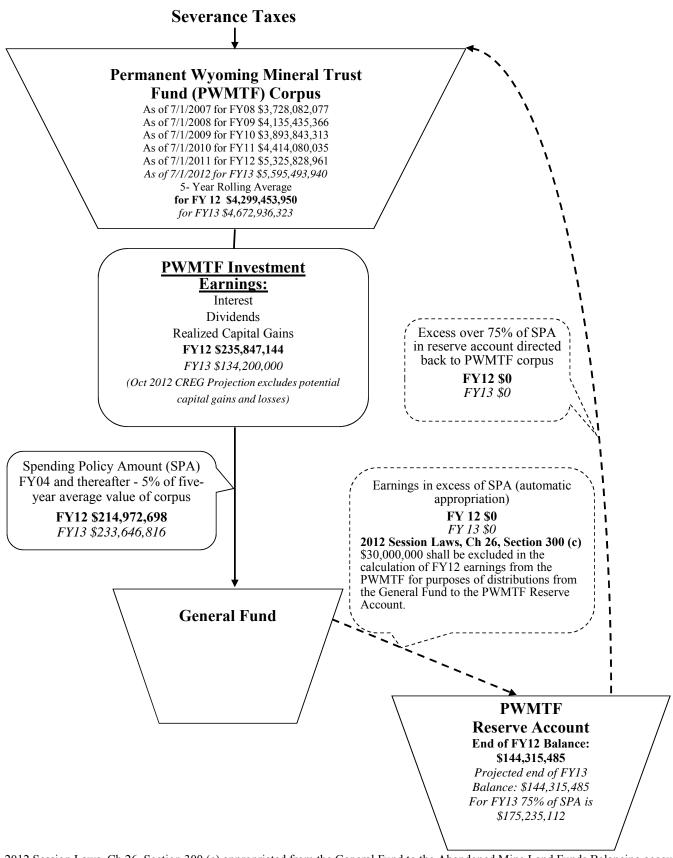

Notes:

Severance taxes are distributed monthly based on CREG estimates. Variances from CREG projections are corrected in the next fiscal year's distributions.

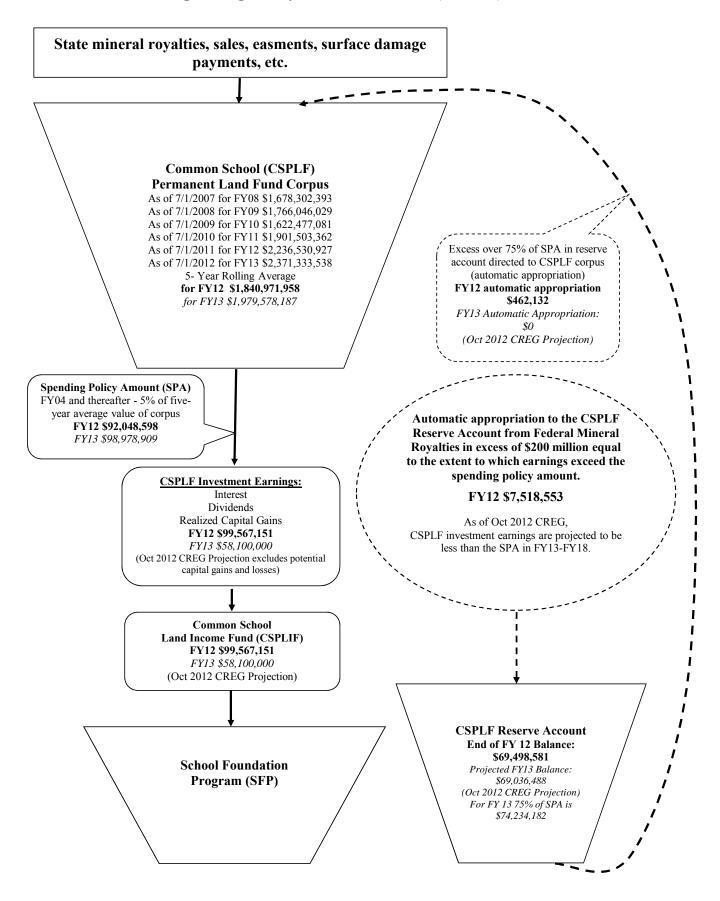

^{*} Does not include other revenue such as federal funds, fees, additional grants, etc.

Subject: Wyoming Revenue Forecast

The Consensus Revenue Estimating Group (CREG) met on October 11, 2012. This meeting was preceded by the mineral valuation group meeting on September 25, 2012. The attached report resulting from those meetings provides the revenue estimates for fiscal years (FY) 2013 through 2018 and summarizes the assumptions behind those estimates. Finalized actual revenue information for FY 2012 is incorporated in the tables presented in this report and in the accompanying fiscal profile.

The following tables are summaries of the effects on the General Fund (GF) and Budget Reserve Account (BRA) for the remainder of the FY 2013-2014 biennium. Further explanation and revenue estimate summaries are provided in the attached CREG report and associated tables.

Throughout the October 2012 CREG report and cover memo, all comparisons are net of the change in treatment of federal funding provided to the Wyoming Department of Health's Wyoming Life Resource Center of \$23 million per biennium and modifications to interest earnings from the state's higher education reserve accounts (\$800,000). Both revisions were a result of legislation adopted in the 2012 Budget Session.

Actual FY 2012 General Fund and Budget Reserve Account Actual Revenues

In total, the actual FY 2012 GF revenues exceeded the January 2012 CREG forecasts by \$175.5 million and the actual BRA revenues exceeded the forecasts by \$34.2 million. The major revenue categories (severance taxes, federal mineral royalties (FMRs), sales and use taxes, investment income, franchise taxes, penalties and interest, and charges for sales and service) exceeded the January projections. Three small categories (federal aid and grants, revenue from others, and other) fell short of January projections by roughly \$1 to \$2 million each.

Although several major GF revenue sources exceeded expectations in FY 2012, the primary drivers of actual revenues in excess of the amounts forecasted were income from the Permanent Wyoming Mineral Trust Fund (PWMTF) and the Pooled Income accounts. Including capital gains, investment earnings totaled \$348.2 million, or \$159.2 million (84.2 percent) in excess of the January 2012 projections.

Recall that under provisions in the 2012 budget bill (2012 Laws, Chapter 26, Section 300(c)), an amount equal to the amount by which earnings from the Permanent Wyoming Mineral Trust Fund (PWMTF) attributed to the 2012 fiscal year are in excess of the amount projected in the January 2012 CREG report up to \$30 million shall be appropriated from the General Fund to the Abandoned Mine Lands Fund Balancing Account. The \$30 million in earnings in excess of the CREG forecast were also excluded from distribution to the PWMTF Spending Policy Reserve Account. As a result of this appropriation, the level of investment income was insufficient to trigger any transfer to the PWMTF Spending Policy Reserve Account.

FY 2013-2014 Biennium General Fund Revenue Forecast Comparisons

Within the October 2012 CREG report, General Fund revenue estimates for the FY 2013-2014 biennium were increased by \$79.5 million from the January 2012 report. Anticipated increased investment earnings from the State Agency Pool and increases in sales and use taxes were the largest contributors to the increase in anticipated General Fund revenues. The following chart illustrates the difference in revenue forecast levels by major category:

FY 2013-2014 Biennium General Fund Revenue Forecast Comparison

Revenue Source	January 2012 Forecast	October 2012 Forecast	
	FY 2013-2014	FY 2013-2014	Difference
	Biennium	Biennium	
Sales and Use Tax	\$ 981.6 M	\$ 1,017.4 M	+ \$ 35.8 M
Severance Tax	\$ 427.4 M	\$ 428.7 M	+ \$ 1.3 M
Investment Income	\$ 392.1 M	\$ 433.5 M	+ \$ 41.4 M
All Other*	\$ 244.0 M	\$ 245.0 M	+ \$ 1.0 M
Total General Fund	\$2,045.1 M	\$2,124.6 M	+ \$ 79.5 M

^{*}Note: The January 2012 forecast has been reduced for this category by \$23 million to account for a change in treatment of federal grants and \$800,000 to account for a change in the distribution of interest from higher education reserve accounts both resulting from action in the 2012 Budget Session.

On a fiscal year basis, FY 2013 General Fund revenues increased from January 2012 levels by a total of \$41.5 million, while FY 2014 General Fund revenues increased from January 2012 levels by a total of \$38.0 million.

FY 2013-2014 Biennium Budget Reserve Account Revenue Forecast Comparisons

Within the October 2012 forecast of the FY 2013-2014 biennial revenue, the CREG report includes increased anticipated revenue directed to the BRA of \$2.8 million in severance taxes and \$2.3 million in FMRs. The changes are summarized in the following table:

FY 2013-2014 Biennium Budget Reserve Account (BRA) Revenue Forecast Comparison

Revenue Source	January 2012 Forecast	October 2012 Forecast	
	FY 2013-2014	FY 2013-2014	Difference
	Biennium	Biennium	
Severance Tax	\$ 468.7 M	\$ 471.5 M	+ \$ 2.8 M
Fed. Min. Royalty	\$ 754.1 M	\$ 756.4 M	+ \$ 2.3 M
Total BRA	\$1,222.8 M	\$1,227.9 M	+ \$ 5.1 M

Bottom Line: FY 2013-2014 Biennium GF/BRA and Legislative Stabilization Reserve Account (LSRA) Balances

For the FY 2013-2014 biennium, projected GF/BRA combined revenues in excess of the statutory reserve amount of \$104.35 million reflect a net increase of \$84.6 million. Investment income and sales and use taxes are projected at increased levels compared to the January 2012 report.

The projected severance taxes for all minerals for the FY 2013-2014 biennium have not been changed significantly in this forecast, increasing by \$12.7 million over the biennium from the January forecast. The same is true of federal mineral royalties for the FY 2013-2014 biennium, with an increase of \$3.6 million over the biennium as compared to the January 2012 forecast. By mineral, the CREG forecast includes increases to crude oil prices, crude oil production, trona prices, and trona production. In addition, a modest increase in natural gas prices for CY 2013 is included. Conversely, the forecast includes reductions to natural gas production and coal production.

All unappropriated, unobligated and unencumbered funds remaining in the GF as of June 30, 2012 and all unappropriated funds in excess of \$98,750,000 in the BRA as of June 30, 2012 are to be transferred to the Legislative Stabilization Reserve Account (LSRA) as a result of language contained in the 2011 budget bill (2011 Laws, Chapter 88, Section 300). This provision means that all FY 2012 revenue in excess of projections, as well as any reversions from the FY 2011-2012 biennium, are swept into the LSRA. The following table provides a condensed accounting and projected ending balances of the GF, BRA and LSRA as of June 30, 2014 under the new CREG forecasted revenue levels

FY 2013-2014 Biennium Bottom-Line Funds Available for Transfer to LSRA

LSRA Balance as of June 30, 2010 Projected net transfer to LSRA as of June 30, 2012– Jan. 2012 CREG Increase in transfer to LSRA based on actual FY 2012 revenues and	\$1,026.3M +\$ 379.5 M
and end-of-year adjustments Projected LSRA Balance as of June 30, 2012 – Oct. 2012 CREG	+\$ 206.7 M \$1,612.5 M
Plus 2012 Budget Bill Nov. 1, 2012 transfer from BRA to LSRA Plus Budget Bill "sweep" as of June 30, 2014 – Oct. 2012 CREG Projected LSRA Balance as of June 30, 2014 – Oct. 2012 CREG	+\$ 15.0 M +\$ 89.2 M \$1,716.7 M
Projected GF Balance as of June 30, 2014 – Oct. 2012 CREG	<u>\$ 0.0 M</u>
Projected BRA Balance as of June 30, 2014 – Oct. 2012 CREG	\$ 104.4 M

School Foundation Program Account

Actual FMRs received by the School Foundation Program Account (SFP) in FY 2012 in excess of January CREG projections were \$10.7 million. Additionally, actual Common School Income received exceeded January 2012 CREG projections by \$60.3 million and as required by 2012, Session Law, Chapter 26, Sections 325 and 326, \$6.2 million of E-Rate revenue was transferred from the Department of Education.

Estimates of FY 2013-2014 FMRs directed to the SFP were increased by \$1.3 million in this report. The changes in actual and estimated FMR revenues, combined with assessed valuation estimate changes and other funding model component changes associated with this forecast, result in no need for any transfer from the School Capital Construction Account (SCCA) to the SFP. At the close of the 2012 Budget Session, CREG estimates indicated a \$14.7 million transfer from the SCCA to the SFP would be expected. As a result of the new forecasts, including known CY 2011 assessed valuations, the anticipated balance of the SFP on June 30, 2014 is \$100.0 million; the anticipated balance of the SCCA is \$0, per 2012 Session Law, Chapter 16; and the estimated balance in the Permanent Land Fund Holding Account is \$586.6 million as of June 30, 2014. Note that the transfer of any balance exceeding \$100 million in the SFP to the SCCA was suspended for FY 2013.

Section 1 – Mineral Price and Production Estimates

Mineral severance taxes, federal mineral royalties, ad valorem taxes, earnings from the Permanent Wyoming Mineral Trust Fund (PWMTF), and sales and use taxes are the primary revenue sources for state government. For this reason, the mineral price and production forecast continues to be the cornerstone of this report.

For the past six biennia, severance tax collections have accounted for approximately one-fifth of actual General Fund revenues. That trend continued in the Fiscal Year (FY) 2011-2012 biennium, as severance taxes accounted for 19 percent of total General Fund revenues. More directly, the share of severance tax contribution to the General Fund serves as an indication of the strength of the extractive industry's taxes paid and although it was roughly in line with recent history, it did slip below 20 percent. The forecast of General Fund revenue for the next two biennia (FY 2013-2014 and FY 2015-2016) looks more like the FY 2009-2010 biennium than the FY 2007-2008 biennium, which served as a high water mark for General Fund revenue.

In addition to the state's General Fund, the Budget Reserve Account (BRA), serves as the other primary account for revenues that support traditional spending. The BRA receives its income primarily from mineral severance taxes and federal mineral royalties (FMRs), with some reversions of appropriations at the end of each biennium. For the FY 2013-2014 biennium, the BRA is projected to receive a total of \$1.228 billion.

In combination, mineral severance taxes and FMRs account for 49.4 percent of the FY 2013-2014 biennium's traditional funds available for appropriation. This figure does not include the PWMTF income, nor does it factor in the impact of mineral production on sales and use tax revenues, illustrating the reliance of the state on revenues generated from oil, gas, and mining.

The assumptions set forth in this first section carry through the remainder of this report. For specific forecast assumptions, please refer to the individual subsection for each mineral contained within this section of the report. Table 3, found within the appendices, summarizes the price and production levels of the individual major minerals: oil, natural gas, coal, and trona.

Oil:

Although oil production continued to be well off total production levels experienced in the 1980s, calendar year (CY) production for 2010 and 2011 exceeded production levels from CY 2009. The forecast predicts that those levels will once again be exceeded in CY 2012. Instead of projecting further declines in Wyoming oil production, there is evidence that production has stabilized and is in fact growing. Specifically, the oil production forecast was increased by 3 million barrels in CY 2012, to 57.0 million barrels. The strength in oil production continued from the growth in CY 2011, where Wyoming oil production exceeded the forecast by 1.0 million barrels for a total of 54.5 million barrels. For the three successive

years beyond CY 2012, CREG added one-half million barrels more to the previous year's production. For CY 2015 and beyond, 58.5 million barrels of oil production is forecasted.

This growth in oil production is the singular positive revision in production among oil, gas, and coal for this CREG report. New production, including from enhanced recovery methods, is anticipated to more than offset the natural decline in established wells; in fact the number of new rigs operating in the state has grown more than 50 percent (from the high teens to the low 30s) during CY 2012. Wyoming tertiary production also continues to bolster production in older oilfields through the use of CO₂ produced during the natural gas extraction process.

While the production of condensate, an oil that is produced as part of the natural gas stream, remains an important part of the forecast, the projected growth in oil production is from activity unrelated to natural gas production in central Wyoming.

Based upon available records, the price received for Wyoming oil by producers has averaged more than \$80/bbl for CY 2012, somewhat above the \$75.00/bbl forecasted in January 2012. This forecast assumes the \$80/bbl average price will be sustained for the balance of the calendar year and will grow to an average price of \$85/bbl after 2012.

The crude oil price forecast reflects the view of CREG that the recovery and stabilization of prices occurred more quickly than the January 2012 forecast assumed. Looking forward, the CREG anticipates modest national and world economic growth in the out years. Such an economic outlook supports Wyoming oil prices. Further, the potential for future weakness in the U.S. dollar, in light of current monetary policy, and the continued potential for geopolitical disruptions, offer the possibility for continued strength, or even spikes, in oil prices. However, those potentials are not embedded in the CREG forecast. As a note of caution, the differential between the West Texas sweet crude spot price and the prices Wyoming producers are receiving is an area of continued concern.

Comparison of Oil Production and Price Forecasts: bbls. and \$/bbl.

Calendar Year	January 2012 Forecast	October 2012 Forecast
2012	54.0 M bbls. / \$75.00	57.0 M bbls. / \$80.00
2013	54.6 M bbls. / \$75.00	57.5 M bbls. / \$85.00
2014	55.1 M bbls. / \$75.00	58.0 M bbls. / \$85.00
2015	55.7 M bbls. / \$75.00	58.5 M bbls. / \$85.00
2016	56.2 M bbls. / \$75.00	58.5 M bbls. / \$85.00
2017	NA	58.5 M bbls. / \$85.00
2018	NA	58.5 M bbls. / \$85.00

Natural Gas and Coal Bed Methane:

Wyoming natural gas pricing and production is influenced by numerous supply and demand factors. For example, the natural gas pricing market is driven by dynamic forces including U.S. economic growth; weather, specifically the number and severity of cold weather days; available supply in Wyoming and throughout the U.S.; access to markets; and demand by

electrical generation, including the recent increased substitution of natural gas and away from coal in power generation.

This CREG report assumes modest national economic growth over the forecast period, recognizing that path may include periods of sluggish growth, no growth, or even decline. The estimates also assume normal weather trends unlike the 2011-2012 winter, which was characterized by unseasonably high temperatures across much of the U.S. Embedded in the forecast is reduced demand for natural gas substitution of coal for electric power generation, especially when natural gas prices rebound from the \$2 to \$4/MMBtu range. Finally, the report recognizes the recent declines in production from Wyoming's major natural gas producing areas, including pronounced declines in coal bed methane production. Compounding Wyoming's near-term declines in several natural gas areas are the new discoveries of natural gas that are beginning to be developed in many other areas of the United States. This forecast anticipates that ample storage and access to additional production will make it difficult to return to the sustained \$6 - \$7/MMBtu range experienced in 2006 and 2007. Discovery and development of natural gas resources around the country is modifying historic regional supply relationships, and it is difficult to know how that may impact pricing over multiple years as technology advances and production and infrastructure are developed.

Despite a historically warm winter across much of the nation and record natural gas storage and production levels which serve to depress market pricing, natural gas continues to be the most significant component to Wyoming's mineral revenue stream, accounting for 44.4 percent of the state's most recent assessed minerals valuations, 2011. That figure does not take into account a portion of the oil valuation that is due to the gas-associated production of condensate. The proportions of natural gas derived revenue in the severance tax and federal mineral royalty stream are significantly larger than those in assessed valuations.

Continued imbalance in supply and demand fundamentals magnified by a warmer than average winter have resulted in lower than projected natural gas prices throughout the summer. Growing natural gas production across the country, warmer winters, along with lackluster but improving industrial and commercial demand, continues to challenge the U.S. natural gas industry. Some curtailed production and greater use of natural gas for electrical generation (power burn) helped compensate for some of the supply – demand imbalance. Storage levels remain above the 5-year (CY 2005-2011) average and above CY 2011's record; however, given increased summer cooling demand, the supply imbalance has not materialized to levels predicted by several private forecasters in the spring of 2012. As we enter the withdrawal season, prices have remained stable and therefore CY 2012 forecasted prices have been kept unchanged from the January 2012 forecast by CREG at \$3.35/Mcf.

Longer term, CREG believes that prices have demonstrated some historic stability at the \$4.00/MMBtu level. There appears to be a consensus among intermediate and long term gas price forecasts around that pricing level. The larger and more complex question is the timing markets will require to return to that level. Specifically, until demand increases – as a result of more robust economic growth, weather, or identification of new markets - the notion of adequate supplies, or even an over-supply, keeps the forecast below this \$4.00/MMBtu range

until CY 2014. Beyond that, CREG forecasts prices to roughly maintain the \$4.00/MMBtu price for the balance of the forecast period.

Although natural gas is traded on a \$/MMBtu bases, CREG projects the average gross price, or value for all natural gas production, including natural gas liquids and other related products. This addition to the stream has historically resulted in at least another \$0.10 to \$0.15/Mcf. In the past calendar year, that differential in the value of Wyoming's natural gas stream on a per volume basis compared to the Wyoming and national spot markets has been much more robust, substantially exceeding the traditional dime or fifteen cents experienced in prior years. This has helped, at least in the near term, to bolster the tax revenues received from Wyoming natural gas, despite low spot market prices.

Recognizing declining natural gas fields, ample national natural gas storage levels and competition from expanded production outside of Wyoming, CREG has decreased near-term production estimates by 103.5 million Mcf, or 4.3 percent in CY 2012 and held that same level of production, 2,270 million Mcf in CY 2013, a decline of 127.2 million Mcf or 5.3 percent as compared to January estimates. Beyond CY 2013, year over year production of natural gas in this forecast is anticipated to grow by 2 percent annually for CY 2014 and 2015, then remain constant. The increase in production is aligned with the anticipated return to \$4/MMBtu natural gas in CY 2014.

CREG also addressed two, technical, though important model inputs that have diverged from historic trends. First, CREG has increased the percent of natural gas production sold. This action mitigates the impact of declining production somewhat and has been reflected in producer reporting for the past several years. Second, CREG modified the assessed value ratio in order to recognize that deductible fixed costs represent a larger share of the total natural gas revenue at lower prices than the impact of the same costs in an environment of higher prices.

Comparison of Natural Gas Production and Price Forecasts: mcf and \$/Mcf

Coal:

The assessed valuation of Wyoming coal has steadily increased for fifteen consecutive years – since 1997. This stable and growing contribution to Wyoming's tax base has earned the recognition of coal as the foundation of Wyoming's revenue portfolio. Through the first half of CY 2012, surface coal production in Wyoming is on pace to decline year over year by 8.7 percent. If this trend continues for the second half of CY 2012, production is expected to be

down by 35 to 40 million tons compared to CY 2011. This break in the historic trend line illustrates the interrelated nature of energy markets and policy responses. Powder River Basin (PRB) coal has a distinguished record as a low-cost input for the production of domestic electricity. However, several headwinds face PRB coal, at least in the short-term: increased competition and fuel switching from natural gas; federal environmental regulations, especially those affecting older power plants; and increased electricity production from natural gas and from multiple renewable energy sources. CREG also recognizes the potential in new market growth from increased exports of Wyoming coal, especially to Asia. However, until there is greater clarity on the future of this growth prospect, those potential production gains have not been incorporated into CREG's forecasts.

Given the year-over-year decline experienced to date, the national outlook for coal production and market share for electrical generation, and the regulatory environment facing coal-fired power plants, CREG has reduced production estimates by 9.1 percent, or approximately 40 million tons in CY 2012. Given the increase in natural gas prices projected in this report, CREG anticipates coal production will rebound, albeit slowly, from this 40 million ton decline over the successive years. This projected increase is driven by a rebound from the low natural gas prices experienced in CY 2012, which CREG anticipates will reverse some natural gas substitution in the electrical generation sector.

In terms of pricing, the spot market price of coal has been under \$10/ton since the spring of 2012. In fact, the price has hovered in the \$9/ton range, or lower, for much of the summer. Nonetheless, much of Wyoming's coal under contract has not experienced such declines, at least to date. Calendar year-to-date, the average price per ton for surface coal has exceeded CREG's CY 2012 projection of \$13.25/ton by approximately 5 percent. As a result, CREG has elected to hold the price projections for surface coal at \$13.25 – no change from the January 2012 forecast. Combined with underground coal production, the average prices and total production tonnage is shown in the table that follows. CREG has included modest increases in the price forecast of underground coal.

Comparison of Coal Production and Price Forecasts: tons and \$/ton

Calendar Year	January 2012 Forecast	October 2012 Forecast
2012	445.4 M tons / \$13.40	404.7 M tons / \$13.44
2013	450.5 M tons / \$13.40	413.2 M tons / \$13.46
2014	455.7 M tons / \$13.40	421.1 M tons / \$13.45
2015	460.9 M tons / \$13.41	428.9 M tons / \$13.44
2016	466.1 M tons / \$13.41	437.8 M tons / \$13.43
2017	NA	445.8 M tons / \$13.43
2018	NA	454.4 M tons / \$13.41

Trona:

The trona production forecast for CY 2012 has been raised one half million tons from the previous projection, based on actual production levels occurring in the last 18 months. Production levels are expected to rise by at least 500,000 tons, or 2.7 percent, in CY 2012. Then, an additional 100,000 tons, or 0.5 percent, in production is anticipated to occur each of

the next five years. This forecast represents a modest increase from the production volumes projected in January 2012. Given the strength in Wyoming's trona market, CREG has incorporated additional increases in the forecast price to \$80/ton, from \$72/ton, throughout the forecast period. Refer to the following table for a summary of the forecast assumptions.

Comparison of Trona Production and Price Forecasts: tons and \$/ton

Calendar Year	January 2012 Forecast	October 2012 Forecast
2012	18.5 M tons / \$72.00	19.0 M tons / \$80.00
2013	18.5 M tons / \$72.00	19.1 M tons / \$80.00
2014	18.5 M tons / \$72.00	19.2 M tons / \$80.00
2015	18.5 M tons / \$72.00	19.3 M tons / \$80.00
2016	18.5 M tons / \$72.00	19.4 M tons / \$80.00
2017	NA	19.5 M tons / \$80.00
2018	NA	19.5 M tons / \$80.00

Uranium and Other Minerals:

Uranium production levels were set at 1.5 million lbs. for CY 2012, rising to 2 million lbs. in CY 2013 and 2.5 million lbs. for CY 2014, remaining at that level through the forecast period. January 2012 CREG uranium prices were also increased from \$44.00/lb for the entire forecast period to \$47/lb in CY 2012, \$50/lb in CY 2013 and \$55/lb in CY 2014 and beyond. Multiple factors at the national and international levels could have impacts on future uranium forecasts, but for now, these price and production scenarios seem most likely.

The valuation of all other minerals, including bentonite, sand and gravel, precious stones and metals, quarried rock, and other industrial mineral production, is forecast at \$118.3 million for CY 2012, and then growing by roughly 1.5 percent for the remainder of the forecast period. As a result, this forecast for the other mineral category was increased from January's level of \$107.5 million. A large part of this category is attributable to bentonite production, which is anticipated to remain strong.

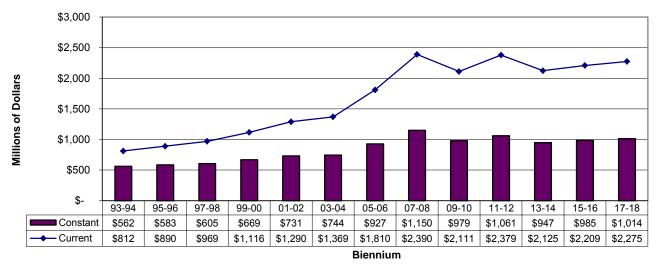

Section 2 – General Fund Revenues

Total General Fund revenue for the FY 2013-2014 biennium is forecasted to reach \$2.125 billion (see Table 2). This represents an increase of \$55.7 million (2.7 percent) over the level forecasted in January 2012. However, it is important to note that the Legislature's profile already accounted for the revision to the treatment of federal grants to the Wyoming Life Resource Center (WLRC) for the FY 2013-2014 biennium of \$23 million and investment income on higher education accounts. As a result, the October 2012 forecast of General Funds is actually \$79.5 million higher than the Legislature's profile from the end of the 2012 Budget Session.

General Fund revenue is forecast to increase 4.0 and 3.0 percent in the FY 2015-2016 and FY 2017-2018 biennia, respectively. Despite this modest growth, the forecasted revenues continue to remain under the actual revenues deposited into the General Fund for the FY 2011-2012 biennium. Chart 1 illustrates the moderate growth throughout the 1990s, where General Fund revenues roughly matched the pace of inflation. In most years of the 21st century, General Fund revenue significantly outpaced inflation, as measured by the consumer price index (CPI-U). Throughout the forecast period, General Fund revenues are predicted to return to roughly 2.7 to 4.0 percent biennial growth, a departure from the last several fiscal years, barring an unforeseen financial, geopolitical, or technological development.

The largest contributor of General Fund revenue continues to be the state's share of sales and use taxes, which are projected to make up 47.9 percent, or \$1.017 billion of the biennial General Fund revenue stream. Severance taxes are anticipated to contribute \$428.7 million to the General Fund over the FY 2013-2014 biennium, or 20.2 percent. Additionally, \$433.5 million, or 20.4 percent, of the General Fund revenue stream is attributed to interest and dividends from the PWMTF and Pooled Income.

Chart 1: General Fund Revenues

Constant Dollars: Base is 1982-84

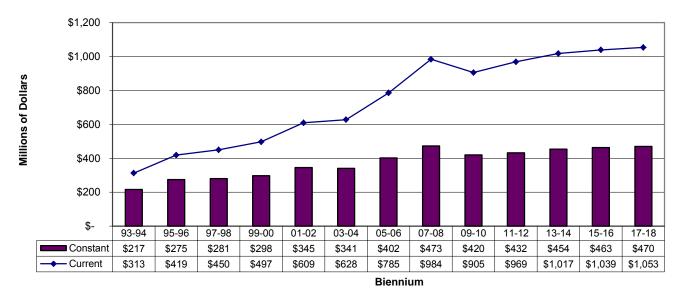

Sales and Use Taxes:

Total General Fund sales and use tax receipts for FY 2012 totaled \$497.7 million, up \$26.8 million (5.7 percent) from FY 2011 levels. This increase comes on the heels of a 14 percent increase over FY 2010. Actual sales and use tax receipts for FY 2012 surpassed the level forecasted last January by \$7.5 million (1.5 percent). The General Fund share of total sales and use tax revenue for FY 2013 is forecasted at \$505.3 million, an increase of \$16.1 million (3.3 percent) from the level forecasted in January 2012.

Slow but consistent growth in employment and personal income drove realized sales and use tax revenues past the FY 2012 estimate. Though the rate of growth for this revenue source was modest, revenue growth was widespread among the industries and counties in the state. Of the 15 primary industry sectors, only 4 experienced declines in year-over-year collections, while 19 of Wyoming's 23 counties registered increases.

The forecast for FY 2013 represents a \$7.6 million (1.5 percent) increase from the total receipts in FY 2012. Rig counts and oil and gas jobs for the rest of FY 2013 are expected to remain comparable to levels seen over the previous six months suggesting that expected growth in sales and use tax revenues will not come from energy-related activities but from other sectors in the state as well as inflation. The sales and use tax forecast incorporates a \$5 million per year reduction in FY 2013 and throughout the remainder of the forecast to reflect the estimated revenue reduction related to the excise tax vendor compensation legislation passed in the 2011 legislative session, as well as the diversion for the highway maintenance fund in accordance with W.S. 39-15-111(e). Overall, sales and use tax receipts are projected to grow at a slightly higher rate in FY 2014 and FY 2015 when compared to FY 2013 and then increase only marginally throughout the remainder of the forecast horizon.

Chart 2: Sales and Use Tax Revenues to the General Fund

Constant Dollars: Base is 1982-84

Severance Tax:

Actual FY 2012 severance tax receipts to the General Fund, totaling \$221.2 million were \$6.7 million (3.1 percent) higher than forecasted last January but \$9.2 million (4.0 percent) less than the FY 2011 total. The primary reasons for the variation from the January forecast were significantly higher than anticipated revenues from oil and to a lesser extent, natural gas; however, severance taxes generated from coal lagged the forecast for FY 2012. The total General Fund share of severance tax revenue for FY 2013 is forecasted to reach \$208.4 million, which is a reduction of \$2.2 million (1.0 percent) from the level forecasted in January 2012. The primary driver for the variation from the January forecast is decreases in coal and natural gas production offset by higher price and production levels for crude oil and trona. Since revenues derived from natural gas and coal lead the state's severance tax revenues, their declines more than offset gains in oil and trona in the FY 2013 estimates.

Mineral Trust Fund and Pooled Income Revenue Sources:

Investment income to the General Fund for FY 2012 attributable to the PWMTF and Pooled Income sources totaled \$348.2 million, which is \$159.2 million (84.2 percent) higher than the January 2012 forecast and \$41.7 million (13.6 percent) greater than earnings in FY 2011. Investment income for FY 2013 is forecasted to reach \$216.9 million, while investment income for FY 2014 is forecasted to be \$216.6 million, bringing total investment income for the FY 2013-2014 biennium to \$433.5 million, an increase of \$40.6 million (10.3 percent) from the January 2012 forecast. The increase is almost entirely due to the investment income from the State Agency Pool, and this increase is driven by a larger balance in the Legislative Stabilization Reserve Account (LSRA) from which to earn yield. The State Treasurer's Office investment income forecast from the PWMTF is 2.66 percent for FY 2013 and 2.62 percent for the balance of the projection period.

Consistent with past practice, the State Treasurer's investment income projection, adopted by CREG, includes only interest and dividend income. The State Treasurer's estimate does not include a projection of capital gains. In accordance with the policy formally adopted by the State Treasurer in April 2009, capital gains and losses are held until the end of the fiscal year. If an investment pool, such as the PWMTF or Common School Permanent Land Fund (CSPLF), has capital gains that exceed capital losses, the net gain will be distributed. If capital losses exceed capital gains, however, the net loss in a fund will carry over until future capital gains replace a past capital loss at the end of any fiscal year, at which time net gains will be distributed.

The current methodology for forecasting returns on the PWMTF and Pooled Investments is being considered by members of the CREG. Actual earnings to the General Fund from PWMTF investments have exceeded the amounts projected by the State Treasurer's Office by an average of more than \$75 million per year since FY 2007. In FY 2012, earnings were underestimated by more than \$110 million, or 89 percent. In the preceding year, the underestimate was similarly large. The minimum that the forecast has been underestimated in recent history is \$13.8 million.

Given the state's somewhat tenuous fiscal picture driven by uncertainty in natural gas pricing, recent declines in coal production, and growing Medicaid and K-12 funding demands, in the upcoming year CREG intends to evaluate whether a more accurate forecast of investment earnings could be made by applying a different methodology. The members of CREG take seriously their charge to accurately forecast revenues. In the case of investment income, there is certainly room for improvement as it is one component of the forecast that has consistently missed by comparatively large margins over the course of the last six years.

Realized capital gains in the PWMTF, combined with regular interest and dividend earnings, resulted in deposits to the General Fund of \$235.8 million in FY 2012. That exceeded the January forecast level by \$111.1 million. Recall that under provisions in the 2012 budget bill (2012 Laws, Chapter 26, Section 300(c)), an amount equal to the amount by which earnings from the PWMTF attributed to the 2012 fiscal year are in excess of the amount projected in the January 2012 CREG report up to \$30 million shall be appropriated from the General Fund to the Abandoned Mine Lands Fund Balancing Account. The \$30 million in earnings in excess of the CREG forecast were also excluded from distribution to the PWMTF Spending Policy Reserve Account. The level of investment income was insufficient to trigger any transfer to the PWMTF Spending Policy Reserve Account, or to the PWMTF corpus. The fiscal profile accompanying this report reflects no deposits made, or change in the balance, to the PWMTF Spending Policy Reserve Account for FY 2012.

FY 2012 investment income from pooled sources totaled \$112.4 million, exceeding the January 2012 forecast by \$48.1 million (74.8 percent). Despite the historically low interest rate environment, this total was the second highest level of investment earnings from pooled sources in the state's history, which can be attributed, in part, to the strong cash position within many of the state's accounts. Pooled income is forecasted at \$82.7 million for FY 2013. The State Treasurer's Office has increased the FY 2013 pooled investment income projection by \$20.4 million from the January 2012 forecast. Despite the erosion of long-term interest rates, the comparatively high projected cash balances continue to provide support for investment earning in this category. Investment income from pooled sources is projected at \$166.0 million for the FY 2013-14 biennium, \$38.8 million higher than the January 2012 forecast.

Remaining General Fund Revenue Categories:

The remaining General Fund revenue sources are comprised of revenues from over 70 state agencies and boards. Actual FY 2012 General Fund revenue from these sources totaled \$136.8 million, which is just \$2.2 million higher than forecasted last January but \$30.5 million less than the FY 2011 total. The largest contributor to the year-over-year decline in revenue is the General Fund's share of oil and gas lease auctions conducted by the Office of State Lands and Investments (OSLI). The General Fund revenue within this category declined by just over \$20 million in FY 2012. This revenue stream benefited from strong leases in FY 2010 and FY 2011 as a result of increased oil exploration interest in the Niobrara Chalk formation in the Denver-Julesburg Basin located in southeast Wyoming and northeast Colorado. While the majority of oil and gas lease bonus revenue is distributed to the Common School Land Income Account, the General Fund also receives a share. There is

one more competitive lease sale scheduled by OSLI in CY 2012 and three lease sales scheduled in CY 2013. Consistent with CREG's policy regarding federal coal lease bonus revenues, state lease bonuses will be included in forecasted revenues only after lease sales have occurred.

A significant change to this year's forecast occurs in the "Federal Aid and Grants" category. Historically, federal Medicaid revenues accruing to the Wyoming Life Resource Center (WLRC) were deposited into the General Fund and then appropriated from the General Fund to the WRLC. Beginning in FY 2013, these revenues will be deposited into a separate account to support the WLRC. This action will align state accounting practices with federal regulations, by placing general fund and federal fund allocations in the Medicaid-Wyoming Life Resource Center unit budget.

Overall, revenue from these sources, including the All Other category, is forecasted to generate \$122.5 million for FY 2013. This represents an increase of \$0.5 million from the level forecasted in January 2012, after accounting for the elimination of the "Federal Aid and Grants" category discussed above. The FY 2013 estimate represents a decrease of \$4.2 million from the actual FY 2012 total. Cigarette tax receipts are expected to reach \$17.7 million in each of the forecasted years.

Section 3 – Severance Tax Summary

Refer to Section 1 of this report for detailed information about the minerals price and production assumptions that form the basis of the severance tax forecast. As shown in Tables 4 and 5 in the Appendix to this report, and in Chart 3, found below, overall severance tax revenues totaled \$1.839 billion in the FY 2011-2012 biennium, which represents a \$31.0 million (1.7 percent) increase over the January 2012 forecasted levels. All of the difference (\$31.0 million) can be attributed to FY 2012.

Crude oil generated \$236.8 million, which exceeded the January forecast by \$36.1 million. For the third consecutive year, severance taxes from crude oil increased on a year-over-year basis, exceeding FY 2011 levels by \$31.8 million. In fact, crude oil revenues for FY 2012 exceeded the previous high of \$215.0 million set in FY 2008. The situation for natural gas was not nearly as positive. Although natural gas revenues generated \$346.2 million, which exceeded the January forecast by \$5.4 million, the aggregate level of collections was \$84.2 million lower than FY 2011 collections and \$327.2 million, or 48.6 percent lower than the all-time high experienced in FY 2006. Severance taxes from coal missed the January forecast by \$11.4 million (3.8 percent) with total revenues of \$289.4 million. Notwithstanding this decline, the total severance taxes collected were just \$1.3 million (less than one percent) shy of the FY 2011 historic high for coal severance taxes, \$290.7 million.

The FY 2013-2014 biennium is expected to benefit from slightly higher overall severance tax revenues, at \$1,729.2 million, \$12.7 million higher than projected in January 2012. In addition to a number of technical factors, the principle contributors to the increase in the forecast are higher than previously anticipated crude oil production and crude oil prices. These increases are offset by lower than previously forecast coal and natural gas production. Since the revisions to the forecast all occur above the \$155 million severance tax cap within the severance tax distribution account, the General Fund, Budget Reserve Account, and PWMTF are the only accounts affected by the changes to the severance tax assumptions.

\$2,500 \$2.000

Chart 3: Severance Tax Revenues to All Accounts

Biennium

Constant Dollars: Base is 1982-84

Section 4 - Federal Mineral Royalties

Refer to Section 1 of this report for detailed information about the minerals price and production assumptions that form the basis of the federal mineral royalty (FMR) and coal lease bonus (CLB) forecasts. Tables 7, 7(a), 7(b), 8, 8(a), and 8(b) at the back of this report show in detail the projections for FMRs and CLBs. The addition of Tables 7(a), 7(b), 8(a), and 8(b) are new to this release of the CREG report. As a quick explanation, the (a) and (b) versions offer a disaggregation of FMRs and CLBs, respectively.

Overall FMR and CLB revenues for the FY 2011-2012 biennium totaled \$1,897.1 million, which exceeded January 2012 expectations by \$61.0 million (3.3 percent). Nearly half (\$29.4 million) of this difference is attributed to a single coal lease bonus payment that was anticipated, but not confirmed, in FY 2012. The overall FMR and CLB revenues for the FY 2011-2012 biennium is also the lowest amount received by the state over the last four biennia.

Consistent with severance tax revenues, CREG forecasts the FMRs for the FY 2013-2014 biennium, at \$1,534.7 million, or \$3.4 million higher than projected in January 2012. Again, increased crude oil price and production estimates are nearly offset by decreased estimates of natural gas and coal production. Similar to severance tax revenues, the higher forecasts only impact two accounts – in this case the School Foundation Program (SFP) and the Budget Reserve Account (BRA) since the impact on the margins only affects the accounts benefiting from FMRs in excess of the \$200 million distribution cap. FMRs received in the FY 2015-2016 biennium are expected to total \$1,649.0 million.

(Coal Lease Bonus Revenues Not Included) \$2,000 \$1.800 \$1,600 \$1,400 \$1,200 Millions of Dollars \$1,000 \$800 \$600 \$400 \$200 \$-95-96 97-98 99-00 01-02 03-04 05-06 07-08 09-10 11-12 13-14 15-16 ■ Constant \$242 \$270 \$285 \$385 \$494 \$762 \$846 \$773 \$760 \$684 \$735 \$747 Current \$348 \$369 \$433 \$476 \$680 \$910 \$1,489 \$1,758 \$1,667 \$1,705 \$1,535 \$1,649 \$1,676

Chart 4: Federal Mineral Royalty Revenues to All Accounts
(Coal Lease Bonus Revenues Not Included)

Constant Dollars: Base is 1982-84

Biennium

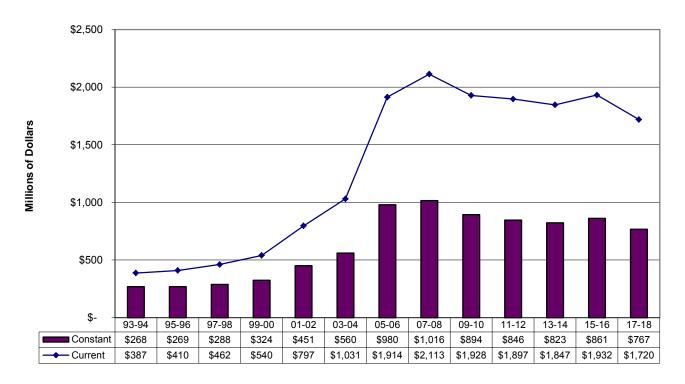

Coal Lease Bonuses:

Initial payments for two coal sales have been received since the January 2012 forecast and are incorporated into this report. A third sale has occurred, however, the payment has not yet been received by the State Treasurer's Office. The amount of the sale is known, and once the first payment has actually been received, it will be included. In keeping with CREG policy, no new bonus payments will be shown in these projections until sales are final, and the first payment is actually received by the state.

The two sales that have been incorporated into the forecast are the South Hilight sale, which will result in five annual payments of \$29.4 million, the first of which occurred in FY 2012 and the South Porcupine sale, which will result in five annual payments of \$43.2 million, the first of which occurred in FY 2013.

In addition, a third sale has occurred in CY 2012 – the North Porcupine sale. CREG anticipates that the state can expect to receive in excess of \$70 million annually for a period of five years. The payments will be included in future CREG reports once the first fund transfer is received by the state.

Chart 5: Total Federal Mineral Royalty and Coal Lease Bonus Revenues

Biennium

Constant Dollars: Base is 1982-84

Section 5 – Common School Land Income Revenue

Income to the Common School Land Income Account (CSLIA) is derived from the investment of the Common School Permanent Land Fund (CSPLF) and from grazing fees and other leases of public lands dedicated to schools. This income is deposited into the School Foundation Program account (SFP). Please refer to the following table for estimates of annual income and differences from the January 2012 forecast.

The CSLIA received significant revenues in FY 2012 from investment income. Specifically, net investment income in FY 2012 amounted to \$102.4 million, or \$49.4 million in excess of the January 2012 forecast. The primary source of this increased revenue was capital gains distributions from the CSPLF. The CSLIA also received income from fees and leases in FY 2012 totaling \$26.2 million, down substantially from the FY 2011 level of \$112.6 million. Of the FY 2012 total, \$17.1 million was state lease bonus revenue from competitive oil and gas auction sales conducted by the Office of State Lands and Investments (OSLI). By contrast, in FY 2011 bonus revenue exceeded \$103.8 million.

Given the higher than anticipated investment income derived from the CSPLF, the investment revenue exceeded the spending policy amount for the CSPLF of \$92.0 million by \$7.5 million. The excess \$7.5 million was subsequently directed to the CSPLF Spending Policy Reserve Account, bringing the balance in the Reserve Account to \$69.5 million. Per statute, the maximum amount to be held in the CSPLF Spending Policy Reserve Account, or 75 percent of the spending policy amount, is \$69 million. Therefore, \$462,000 was deposited back to the corpus of the CSPLF.

Based upon the estimates of yield for FY 13 through FY 18, the projected investment income from the CSPLF has been increased throughout the forecast period, with yields projected at levels slightly less than those projected for the PWMTF. Specifically, the anticipated yields for FY 13 are 2.41 percent, while yields in future years are estimated to be 2.31 percent. As noted previously, there was a significant increase in state lease bonus revenue to the CSLIA in the past two fiscal years from competitive oil and gas auction sales conducted by the OSLI. There is one more competitive lease sale scheduled by OSLI in CY 2012, and three more lease sales are scheduled for CY 2013. However, consistent with CREG's policy regarding federal coal lease bonus revenues, state lease bonuses will be included in forecasted revenues only after lease sales have taken place and funds have been received. Projected fee and lease revenues are estimated at \$6 million FY 2014 through FY 2018, somewhat below the near-term average history.

Common School Land Income Forecast (millions of dollars)

Fiscal Year	Investment Income	Fees and Leases	Total	Difference from
	October Estimate	October Estimate	October Estimate	Jan. Estimate
2013	\$58.0	\$10.0	\$68.0	\$6.6
2014	\$60.3	\$6.0	\$66.3	\$2.8
2015	\$65.1	\$6.0	\$71.1	\$5.1
2016	\$69.7	\$6.0	\$75.7	\$7.3
2017	\$74.3	\$6.0	\$80.3	N/A
2018	\$78.9	\$6.0	\$84.9	N/A

The Common School Land Income Fund historical revenues are presented below.

Common School Land Income History (millions of dollars)

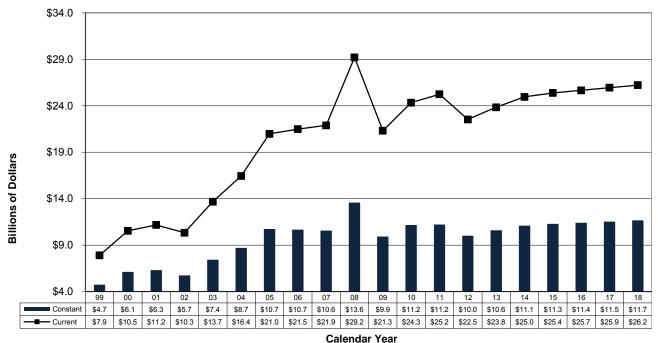

Fiscal Year	Total
2007	\$ 81.0
2008	\$161.4
2009	\$ 71.3
2010	\$100.5
2011	\$216.0
2012	\$128.6

Section 6 – Total State Assessed Valuation

Please refer to Section 1 of this report for detailed information about the minerals price and production assumptions that form the basis of the minerals portion of the state assessed valuation forecast.

Assessed valuation projections are shown in Table 9 at the back of this report. Statewide assessed valuation for non-mineral property set a record high in CY 2011 at \$9.056 billion, exceeding January's forecast by \$210 million (or 2.4 percent). In addition to the changes made in the minerals projections, this forecast incorporates a two percent per year increase for non-mineral property. Although this forecast begins with a larger actual base year in CY 2011 than originally anticipated, the projected increases begin immediately, rather than delaying them one year and are consistent with the two percent assumption included in the January 2012 report. In keeping with the group's other projection assumptions, it is believed that the current economic conditions will provide modest economic growth over the projection period.

Chart 6: Total Assessed Valuation

Constant Dollars: Base is 1982-84

- (1) Chapter 183, 2011 Session Laws created a credit to vendors and direct payors for the collection and payment of sales and use taxes, effective January 1, 2012. If vendors and direct payors pay their sales and use taxes due by the 15th day of the month, they are allowed to deduct a credit from sales and use taxes due of up to \$500 per month. This credit will only be deducted from the sales and use taxes distributed to the General Fund. This credit is estmated to be \$5.0 million per year in FY13-FY18.
- (2) Chapter 14, 2000 Session Laws established an investment income spending policy for the Permanent Wyoming Mineral Trust Fund (PWMTF). Investment earnings from the PWMTF in excess of the spending policy are appropriated from the General Fund to the Permanent Wyoming Mineral Trust Fund Reserve Account (PWMTFRA). The PWMTF income amounts shown in the table above reflect total investment earnings from the PWMTF, including the investment earnings in excess of the spending policy amounts appropriated to the PWMTFRA. PWMTF income exceeded the spending policy amount by \$10,598,474 in FY04, by \$19,485,440 in FY06, by \$32,869,204 in FY07, by \$185,102,897 in FY08, and by \$23,335,013 in FY11. PWMTF income is projected to be less than the spending policy amount in FY13-FY18. The Legislature appropriated \$30 million of FY12 PWMTF investment earnings in excess of the January 2012 CREG forecast to the Abandoned Mine Land Funds Balancing Account in Chapter 26, 2012 Session Laws.
- (3) The State Treasurer implemented an accounting change in April 2009 (with an effective date of July 1, 2008) which directs interest and dividend income to be distributed to the General Fund on a monthly basis. Under this new policy, capital gains and losses will be held until the end of the fiscal year, at which time capital gains in excess of capital losses will be distributed. If capital losses exceed capital gains, the net capital loss will be carried forward until such time it is offset by future capital gains.
- (4) This category includes the General Fund share of actual proceeds from oil and gas lease auctions conducted by the Office of State Lands and Investments. The General Fund share from lease auctions is roughly \$15.5 million in FY10, \$21.6 million in FY11, and \$2.2 million in FY12.
- (5) This category includes all 1200 series tax revenue; Inheritance Tax (revenue code 1401); License & Permit Fees (2000 revenue series); Property & Money Use Fees (4000 revenue series); and Non-Revenue Receipts (9000 revenue series). The Inheritance Tax total for FY94 included \$21.0 million in revenue from a single estate settlement, and in FY00 it totaled \$50.8 million. Inheritance Taxes are included at diminished rates beginning in FY04 due to federal legislation. No Inheritance tax is forecasted throughout the forecast period.

If vendors and direct payors pay their sales and use taxes due by the 15th day of the month, they are allowed to deduct a credit from sales and use taxes due of up to \$500 per month. This credit will only be deducted from the sales and use taxes distributed to the General Fund. This credit is estmated to be \$5.0 million per year in FY13-FY18.
- (2) Chapter 14, 2000 Session Laws established an investment income spending policy for the Permanent Wyoming Mineral Trust Fund (PWMTF). Investment earnings from the PWMTF in excess of the spending policy are appropriated from the General Fund to the Permanent Wyoming Mineral Trust Fund Reserve Account (PWMTFRA). The PWMTF income amounts shown in the table above reflect total investment earnings from the PWMTF, including the investment earnings in excess of the spending policy amounts appropriated to the PWMTFRA. PWMTF income exceeded the spending policy amount by \$10,598,474 in FY04, by \$19,485,440 in FY06, by \$32,869,204 in FY07, by \$185,102,897 in FY08, and by \$23,335,013 in FY11. PWMTF income is projected to be less than the spending policy amount in FY13-FY18. The Legislature appropriated \$30 million of FY12 PWMTF investment earnings in excess of the January 2012 CREG forecast to the Abandoned Mine Land Funds Balancing Account in Chapter 26, 2012 Session Laws.
- (3) The State Treasurer implemented an accounting change in April 2009 (with an effective date of July 1, 2008) which directs interest and dividend income to be distributed to the General Fund on a monthly basis. Under this new policy, capital gains and losses will be held until the end of the fiscal year, at which time capital gains in excess of capital losses will be distributed. If capital losses exceed capital gains, the net capital loss will be carried forward until such time it is offset by future capital gains.
- (4) This category includes the General Fund share of actual proceeds from oil and gas lease auctions conducted by the Office of State Lands and Investments. The General Fund share from lease auctions is roughly \$15.5 million in FY10, \$21.6 million in FY11, and \$2.2 million in FY12.
- (5) This category includes all 1200 series tax revenue; Inheritance Tax (revenue code 1401); License & Permit Fees (2000 revenue series); Property & Money Use Fees (4000 revenue series); and Non-Revenue Receipts (9000 revenue series). The Inheritance Tax total for FY94 included \$21.0 million in revenue from a single estate settlement, and in FY00 it totaled \$50.8 million. Inheritance Taxes are included at diminished rates beginning in FY04 due to federal legislation. No Inheritance tax is forecasted throughout the forecast period.

- (1) Price is the average gross sales price for all Wyoming oil production. Production is the total volume of all oil produced in Wyoming, including stripper, tertiary, other oil, and lease condensate.
- (2) Price is the average gross sales price for all Wyoming natural gas production. Production is the total volume of all gas produced in Wyoming, including methane, carbon dioxide, natural gas liquids, and all other related products.
- (3) Price is the average gross sales price for all Wyoming coal production. Production is the total volume of all coal produced in Wyoming, including surface and underground.
- (4) Price is the average gross sales price for all Wyoming trona production. Production is the total volume of all trona ore produced in Wyoming.

^{(1) -} Chapter 62, 2002 Session Laws made permanent the diversion of PWMTF revenues to the Severance Tax Distribution Account, and repealed the language of Chapter 99, 2000 Session Laws requiring a larger proportion of coal bed methane revenues to be deposited into the PWMTF. Chapter 80, 2005 Session Laws diverts additional severance taxes (equal to two-thirds of the PWMTF distribution required by Wyoming Constitution) from the Severance Tax Distribution Account to the PWMTF, beginning in FY06. One-half of the additional severance taxes to the PWMTF (\$74,264,775) was diverted to the PWMTF Reserve Account in FY10.

- (2) Chapter 163, 2005 Session Laws creates a severance tax distribution to Water Development Account III of 0.5 percent and decreases the distribution to Local Government Capital Construction from 2.83 percent to 2.33 percent, beginning in FY06.
- (3) The drop in revenues to these accounts in FY94 was due to the expiration of the Capital Facilities Tax on coal and trona.

- (6) This column includes \$5.5 million of Municipal Mineral Trust Fund monies in FY 2001. These funds were diverted from the cities & towns portion of severance taxes when the total severance taxes to those entities exceeded \$24 million in any year, under the distribution formulas in place prior to Chapter 209, 2001 Session Laws.
- (7) FY98 revenues include \$8.0 million in previously protested severance taxes on coal from prior production years. FY06 and FY07 revenues include \$19.5 million and \$13.3 million respectively in previously protested severance taxes on natural gas from prior production years.

^{(4) -} In FY99 and FY00, mineral severance taxes and federal mineral royalties were diverted from the Highway Fund to the School Foundation Program until \$20 million was received. This revenue diversion from the Highway fund was offset with addition fuel tax revenue. In FY01 and FY02, the diversion of revenues from these sources continued, however, the amount was not limited to a fixed dollar amount, but was a dollar for dollar swap in the amount raised by the fuel tax.

^{(5) -} Beginning in FY92, the totals shown in this column have included diversions from the Highway Fund to the LUST accounts (Financial Responsibility and Corrective Action accounts). Amounts from \$11.7 to \$13.0 million per year are projected to be diverted to these accounts in FY13 through FY18.

^{(1) -} Chapter 62, 2002 Session Laws made permanent the diversion of PWMTF revenues to the Severance Tax Distribution Account, and repealed the language of Chapter 99, 2000 Session Laws requiring a larger proportion of coal bed methane revenues to be deposited into the PWMTF. Chapter 80, 2005 Session Laws diverts additional severance taxes (equal to two-thirds of the PWMTF distribution required by Wyoming Constitution) from the Severance Tax Distribution Account to the PWMTF, beginning in FY06. One-half of the additional severance taxes to the PWMTF (\$74,264,775) was diverted to the PWMTF Reserve Account in FY10.

^{(2) -} Chapter 163, 2005 Session Laws creates a severance tax distribution to Water Development Account III of 0.5 percent and decreases the distribution to Local Government Capital Construction from 2.83 percent to 2.33 percent, beginning in FY06.

^{(3) -} The drop in revenues to these accounts in FY94 was due to the expiration of the Capital Facilities Tax on coal and trona.

^{(4) -} In FY99 and FY00, mineral severance taxes and federal mineral royalties were diverted from the Highway Fund to the School Foundation Program until \$20 million was received. This revenue diversion from the Highway fund was offset with additional fuel tax revenue. In FY01 and FY02, the diversion of revenues from these sources continued, however, the amount was not limited to a fixed dollar amount, but was a dollar for dollar swap in the amount raised by the fuel tax.

^{(5) -} Beginning in FY92, the totals shown in this column have included diversions from the Highway Fund to the LUST accounts (Financial Responsibility and Corrective Action accounts). Amounts from \$11.7 to \$13.0 million per year are projected to be diverted to these accounts in FY13 through FY18.

^{(6) -} This column includes \$5.5 million of Municipal Mineral Trust Fund monies in FY 2001. These funds were diverted from the cities & towns portion of severance taxes when the total severance taxes to those entities exceeded \$24 million in any year, under the distribution formulas in place prior to Chapter 209, 2001 Session Laws.

^{(7) -} FY98 revenues include \$8.0 million in previously protested severance taxes on coal from prior production years. FY06 and FY07 revenues include \$19.5 million and \$13.3 million respectively in previously protested severance taxes on natural gas from prior production years.

^{(1) -} The drop in revenues which occurred in FY99 was due, in part, to the reduced taxation rates put in place by Chapter 168 of the 1999 Session Laws, "Oil Producers Recovery - 2."

^{(2) -} FY06 and FY07 natural gas revenues include \$19.5 million and \$13.3 million respectively in previously protested severance taxes from prior production years.

^{(3) -} FY98 coal revenues include \$8.0 million in previously protested severance taxes from prior production years.

^{(4) -} The drop in revenues which occurred in FY94 was due to the expiration of the Capital Facilities Tax on coal and trona.

- (1) Under the distribution formula in place for FY00, 6.75% of all mineral royalties in excess of \$200 million would normally flow to the University when that entity's bonded indebtedness necessitated the expenditure of those funds. Because the University's bonds issued under this provision of law were retired, the LRI received the amount that otherwise would have flowed to the University, approximately \$12.2 million.
- (2) In FY99 and FY00, mineral severance taxes and federal mineral royalties were diverted from the Highway Fund to the School Foundation Program until \$20 million was received. This revenue diversion from the Highway fund was offset with additional fuel tax revenue. In FY01 and FY02, the diversion of revenues from these sources continued, however, the amount was not limited to a fixed dollar amount, but was a dollar for dollar swap in the amount raised by the fuel tax.
- (3) Chapter 190, 2005 Session Laws diverts federal mineral royalties over the \$200 million cap from the School Foundation Program (SFP) to the Higher Education Endowment Account and Hathaway Endowment Account, beginning in FY05. Amounts diverted are reduced as necessary to ensure an unobligated, unencumbered balance of \$100 million in the SFP as of July 1 of each fiscal year. Of the amounts diverted, 21 percent is distributed to the Higher Education Endowment Account until the account balance reaches \$105 million, and 79 percent is distributed to the Hathaway Endowment Account until the account balance reaches \$400 million. These distributions were completed in FY08.
- (4) The state receives coal lease bonus revenue, which is currently distributed to these specific funds. Total coal lease bonus revenue in FY12 was \$145,329,795. The projected total coal lease bonuses for the forecast period are \$170.6 million in FY13, \$141.3 million in FY14-FY16, and \$43.2 million in FY14-FY17.
- (5) Beginning in FY98, coal lease bonus revenues normally flowing to the Legislative Royalty Impact Assistance Account were diverted to the School District Capital Construction Account.
- (6) In FY99, \$4.5 million of Highway Fund federal mineral royalties were diverted to the Transportation Enterprise Account. In fiscal years 2000-02, \$7,242,000 in highway FMR funds were diverted to this account.
- (7) Federal legislation was enacted in December 2007 to reduce the state's share of federal mineral royalties by 2%, beginning in FY08. This revenue decrease will reduce distributions to the School Foundation Program Account, the School Capital Construction Account, and the Budget Reserve Account.
- (8) FY12 revenues were reduced by nearly \$14.0 million to reflect Wyoming's share of a refund of federal mineral royalty payments withheld by the Office of Natural Resources Revenue (ONRR). This refund was due to the overpayment of gas and scrubber condensate royalties discovered in a compliance review performed by ONRR. This resulted in reduced distributions to the School Foundation Program Account and the Budget Reserve Account.

- (1) Under the distribution formula in place for FY00, 6.75% of all mineral royalties in excess of \$200 million would normally flow to the University when that entity's bonded indebtedness necessitated the expenditure of those funds. Because the University's bonds issued under this provision of law were retired, the LRI received the amount that otherwise would have flowed to the University, approximately \$12.2 million.
- (2) In FY99 and FY00, mineral severance taxes and federal mineral royalties were diverted from the Highway Fund to the School Foundation Program until \$20 million was received. This revenue diversion from the Highway fund was offset with additional fuel tax revenue. In FY01 and FY02, the diversion of revenues from these sources continued, however, the amount was not limited to a fixed dollar amount, but was a dollar for dollar swap in the amount raised by the fuel tax.
- (3) Chapter 190, 2005 Session Laws diverts federal mineral royalties over the \$200 million cap from the School Foundation Program (SFP) to the Higher Education Endowment Account and Hathaway Endowment Account, beginning in FY05. Amounts diverted are reduced as necessary to ensure an unobligated, unencumbered balance of \$100 million in the SFP as of July 1 of each fiscal year. Of the amounts diverted, 21 percent is distributed to the Higher Education Endowment Account until the account balance reaches \$105 million, and 79 percent is distributed to the Hathaway Endowment Account until the account balance reaches \$400 million. These distributions were completed in FY08.
- (4) In FY99, \$4.5 million of Highway Fund federal mineral royalties were diverted to the Transportation Enterprise Account. In fiscal years 2000-02, \$7,242,000 in highway FMR funds were diverted to this account.
- (5) Federal legislation was enacted in December 2007 to reduce the state's share of federal mineral royalties by 2%, beginning in FY08. This revenue decrease will reduce distributions to the School Foundation Program Account and the Budget Reserve Account.
- (6) FY12 revenues were reduced by nearly \$14.0 million to reflect Wyoming's share of a refund of federal mineral royalty payments withheld by the Office of Natural Resources Revenue (ONRR). This refund was due to the overpayment of gas and scrubber condensate royalties discovered in a compliance review performed by ONRR. This resulted in reduced distributions to the School Foundation Program Account and the Budget Reserve Account.

^{(1) -} The state receives coal lease bonus revenue, which is currently distributed to these specific funds. Total coal lease bonus revenue in FY12 was \$145,329,795. The projected total coal lease bonuses for the forecast period are \$170.6 million in FY13, \$141.3 million in FY14-FY16, and \$43.2 million in FY17.

^{(2) -} Beginning in FY98, coal lease bonus revenues normally flowing to the Legislative Royalty Impact Assistance Account were diverted to the School District Capital Construction Account.

^{(3) -} Federal legislation was enacted in December 2007 to reduce the state's share of federal mineral royalties by 2%, beginning in FY08. This revenue decrease will reduce distributions to the School Capital Construction Account.

- (1) Under the distribution formula in place for FY00, 6.75% of all mineral royalties in excess of \$200 million would normally flow to the University when that entity's bonded indebtedness necessitated the expenditure of those funds. Because the University's bonds issued under this provision of law were retired, the LRI received the amount that otherwise would have flowed to the University, approximately \$12.2 million.
- (2) In FY99 and FY00, mineral severance taxes and federal mineral royalties were diverted from the Highway Fund to the School Foundation Program until \$20 million was received. This revenue diversion from the Highway fund was offset with additional fuel tax revenue. In FY01 and FY02, the diversion of revenues from these sources continued, however, the amount was not limited to a fixed dollar amount, but was a dollar for dollar swap in the amount raised by the fuel tax.
- (3) Chapter 190, 2005 Session Laws diverts federal mineral royalties over the \$200 million cap from the School Foundation Program (SFP) to the Higher Education Endowment Account and Hathaway Endowment Account, beginning in FY05. Amounts diverted are reduced as necessary to ensure an unobligated, unencumbered balance of \$100 million in the SFP as of July 1 of each fiscal year. Of the amounts diverted, 21 percent is distributed to the Higher Education Endowment Account until the account balance reaches \$105 million, and 79 percent is distributed to the Hathaway Endowment Account until the account balance reaches \$400 million. These distributions were completed in FY08.
- (4) The state receives coal lease bonus revenue, which is currently distributed to these specific funds. Total coal lease bonus revenue in FY12 was \$145,329,795. The projected total coal lease bonuses for the forecast period are \$170.6 million in FY14.FY16, and \$43.2 million in FY14-FY17.
- (5) Beginning in FY98, coal lease bonus revenues normally flowing to the Legislative Royalty Impact Assistance Account have been diverted to the School District Capital Construction Account.
- (6) In FY99, \$4.5 million of Highway Fund federal mineral royalties were diverted to the Transportation Enterprise Account. In fiscal years 2000-02, \$7,242,000 in highway FMR funds were diverted to this account.
- (7) Federal legislation was enacted in December 2007 to reduce the state's share of federal mineral royalties by 2%, beginning in FY08. This revenue decrease will reduce distributions to the School Foundation Program Account, the School Capital Construction Account, and the Budget Reserve Account.
- (8) FY12 revenues were reduced by nearly \$14.0 million to reflect Wyoming's share of a refund of federal mineral royalty payments withheld by the Office of Natural Resources Revenue (ONRR). This refund was due to the overpayment of gas and scrubber condensate royalties discovered in a compliance review performed by ONRR. This resulted in reduced distributions to the School Foundation Program Account and the Budget Reserve Account.

FUND STRUCTURE AND DESCRIPTIONS SECTION

In fiscal year 1994, the State Auditor initiated the process of bringing the state's accounting system into compliance with generally accepted accounting principals (GAAP). One of the results of this process is a different way of aggregating and accounting for the many different state government accounts and funds. Listed below is the basic structure of the fund system and a few specific examples of what accounts and "sub-funds" reside in which funds. The new system consists of three main fund "types" with each fund type consisting of several different "funds" and within each "fund" there can be many "sub-funds."

- I. Governmental Fund Type
 - A. General fund
 - B. Special revenue fund (Budget reserve account, water development accounts, school foundation account, highway fund account, and various other funds that were old earmarked fund accounts)
 - C. Capital projects fund
 - D. Debt service fund

II. Proprietary Fund Type

- A. Enterprise fund
 - (Liquor commission account, workers' compensation account, etc.)
- B. Internal service fund (Motor vehicle depreciation account, information technology division depreciation account, group insurance account, etc.)

III. Fiduciary Fund Types

- A. Expendable trust funds
 - (Miners hospital permanent land fund account, omnibus permanent land fund account, etc.)
- B. Non-expendable trust fund (Permanent mineral trust fund, common school permanent land fund account, etc.)
- C. Pension trust fund (Retirement fund, etc.)
- D. Agency fund (Various old trust and agency fund accounts)

MONITORED FUNDS

Of major concern to the Joint Appropriations Committee and monitored by budget/fiscal staff is the General Fund and the Budget Reserve Account. The General Fund is the fund from which most state agencies are funded, and the Budget Reserve Account is the account recently used to balance the state budget.

Budget/fiscal staff also monitors the revenues, appropriations and current unobligated balances of other funds since in recent years these have been considered to help cover traditional revenue shortfalls. These funds include reserve accounts established over the past several biennia: Legislative Stabilization Reserve Account, Permanent Land Fund Holding Account, and spending policy reserve accounts. Much of this information is provided in the fiscal profile or "goldenrod."

PERMANENT FUNDS

The State of Wyoming has three principal permanent funds: Permanent Wyoming Mineral Trust Fund (PWMTF), Permanent Land Fund (PLF), and the Permanent Land Income Fund (PLIF). The Permanent Land Income Fund is simply a "holding fund" for income from state lands and investments that will eventually be spent. The PWMTF and the PLF are those referred to when the term "permanent funds" is used.

Permanent Wyoming Mineral Trust Fund

The PWMTF was established by Article 15, Section 19 of the Wyoming Constitution and shall remain inviolate. In other words, the corpus of the fund cannot be spent unless the Constitution is amended. The interest earnings from the investment of the PWMTF are constitutionally designated to the General Fund.

The PWMTF receives revenues from a constitutionally protected 1.5% severance tax on oil, gas, and coal. That is, the Legislature may not divert the flow of these taxes to another account without a constitutional amendment. In 2005 the Legislature passed Senate File 25 (05 Laws, Chapter 80) which diverts an amount equal to 2/3 of the distribution required by the Wyoming Constitution from the severance tax distribution account to the PWMTF before any other distributions are made.

The State Treasurer is responsible for investing funds from the PWMTF and currently has them invested in government securities, corporate bonds, equities, and a variety of statutorily authorized state loan programs.

Permanent Land Fund and Permanent Land Income Fund

The Act of Admission awarded the State of Wyoming certain lands designated for specific purposes. The Permanent Land Fund was established to hold the proceeds from these lands, the expenditure of which is also protected by the Act of Admission. Proceeds, or revenues that flow into the PLF, may come from the sale of the lands, the production or sale of minerals, or any depletable resource from the land. These revenues build the corpus of the PLF that is invested by the State Treasurer. The income from the investment of these funds, and the income received from the surface leasing of the lands, is deposited in the Permanent Land Income Fund and is available for expenditure.

W.S. 9-4-310(a) establishes twelve separate funds within the PLF to account for the revenue received from the specifically designated lands. These accounts were:

MH Miner's Hospital

PB Public Buildings at Capital

FH Fish Hatchery CS Common School

DDB Deaf, Dumb, and Blind

CA Carey Act OMN Omnibus

SH Wyoming State Hospital

STS Poor Farm (Wyoming State Training School, now the Wyoming Life

Resource Center)

PEN Penitentiary UW University

AgColl Agriculture College

Monies in the Agriculture College, the University, and the Common School funds, cannot be appropriated by the Legislature without a constitutional or federal law amendment or both. Historically, the Legislature has not appropriated monies from the other funds very frequently. However, the Legislature may appropriate from the other funds but only for the specific purpose for which the account is intended as designated by the Act of Admission.

As was stated above, the investment income and income received from surface leases are deposited into the PLIF, which has five funds to handle the income. They are:

MH Miner's Hospital CS Common School

OMN Omnibus UW University

AgColl Agriculture College

Monies in the miner's hospital income fund can only be spent by legislative appropriation for the miner's hospital, monies in the Common School Land Income fund are distributed to the School Foundation Program for the operational support of the forty-eight school districts, funds in the Omnibus fund can be spent for the state's institutions by legislative appropriation or unanimous decision of the State Loan and Investment Board, and monies in the University and Agriculture College Income Funds can be spent by the University Board of Trustees. GAAP accounting has changed the structure of the funds but not the flows of revenue and income or the restrictions for use established by the Act of Admission. Both permanent land and permanent land income funds are now classified as fiduciary fund types as either expendable or non-expendable sub-funds.

FISCAL PROFILE

The fiscal profile ("Goldenrod") is published periodically by the LSO budget/fiscal section. The report presents a fiscal summary for selected expendable funds including

the General Fund, Budget Reserve Account, and School Foundation Program, and several other funds. In addition, state revenues to and disbursements from the Legislative Stabilization Reserve Account (LSRA), School Capital Construction Account (SCCA), PWMTF Spending Policy Reserve Account, CSPLF Spending Policy Reserve Account and each Water Development Account are detailed. The biennium profile for each of these accounts includes beginning cash balances, anticipated revenues and transfers, anticipated expenditures and appropriations, and a projected ending balance.

The profile is updated several times throughout the year as expected revenues and expenditures change. During a legislative session the profile is updated to reflect the expected revenue and expenditure changes due to legislative action.

Summary of Major Trust Funds

Fund #	Inviolate	Fund/Trust Name	<u>Reference</u>
M01	X	Permanent WY Mineral Trust Fund	1974 Session Laws, HJ 2A; Wyoming Constitution, Article 15,
003		Capitol Building Rehab. and Restoration Account	W.S. 9-5-109(j)
001		WPTV Endowment Account (available for match)	2008 Session Laws, Ch 48, Section 2, 057

BUDGET PROCESS/DEFINITION SECTION

The State of Wyoming operates on a biennial budget for all executive and judicial branch agencies, including the University and the community colleges. That is, agency budgets are built for two fiscal years of operations. The fiscal year begins on July 1 and ends on the following June 30, and the biennium begins on July 1 of even numbered calendar years following the budget session. Traditionally, school foundation program funding was dealt with annually, but beginning with the 1994 session, funding for this program was changed to biennial funding also, although the payment calculation is still an annual computation.

Budget requests are prepared by agency fiscal personnel in conjunction with the Budget Division housed within the Department of Administration and Information. The Budget Division is the central budget office for all state government and is often referred to as the "Governor's budget office."

The biennial budget process begins during the summer months prior to a budget session of the Legislature. The Budget Division prepares a "standard" budget request for each agency and submits the standard budget to the agency in July. The standard budget is roughly equivalent to what the agency had received for the prior biennium with adjustments made for legislatively or executive-approved transfers of funds into or out of an agency's budget. The standard budget is defined as the budget enabling an entity to continue to furnish the same level of services during the ensuing biennium and shall reflect the revenue or appropriation necessary to provide the services. The standard budget shall not include requests for equipment, any special projects and services, or any requests for special or nonrecurring funding, although these limitations regarding personnel and equipment do not apply to the University.

To begin, the Budget Division also prepares a "base" budget, which contains all legislative appropriations for the preceding biennium. Next, the Budget Division shall provide the differences between the "standard" request and "base" budget, along with an explanation of those differences. Each agency then may develop an "exception" budget request. An exception budget request usually asks for increased funding necessary to maintain current levels of service, or for increased funding for expanding services to a new group of recipients or a new service to existing recipients. It can also be used to transfer funds and positions from one program within an agency to another. Not all agencies submit exception requests. This request is for the upcoming two fiscal years, or biennium, that will begin on July 1 following the budget session.

The Budget Division files a copy of the base and standard budget with LSO by October 1 of each odd-numbered year. LSO staff then provides copies to the Joint Appropriations Committee. The entire budget request is also presented to the Budget Division from the state agencies, by the end of August. The Budget Division assembles all of the agency requests into a total package for the Governor's review.

The Consensus Revenue Estimating Group (CREG) (CREG is explained in the "Revenues" section of this document) meets in October and develops revenue forecasts for the upcoming

biennium, and the Governor then compares the budget request to the forecasted revenue and works with the Budget Division to prepare his budget recommendations to the Legislature. These recommendations must be provided to the Legislature by December 1 of each year.

In the event an agency believes it needs additional funding once the Legislature has approved a biennial budget, it prepares a supplemental budget request in the summer months prior to a general session of the Legislature. The process and time table is the same as that of a biennial budget request. The only difference is that there are no standard, base, or exception requests in a supplemental budget, only a request for funds in addition to what was approved in the budget session.

An agency that needs funds in addition to the amounts appropriated during the budget and supplemental requests can ask for an additional appropriation during the next budget session with an effective immediate date. The Legislature usually adjourns in March, while the biennium does not expire until June 30. That allows sufficient time for the Legislature to make an effective immediate appropriation for an agency to finish out the fiscal year prior to the new biennium beginning on July 1 following the end of the legislative session. This process effectively gives an agency three separate legislative sessions in which it can request funding for a single biennium.

JOINT APPROPRIATIONS COMMITTEE - BUDGET PROCESS

Once the Governor's budget recommendations are received, LSO budget/fiscal staff begin to analyze the request and compile information and reports which help the Joint Appropriations Committee review the agencies' requests and get an idea of the "big picture."

The Committee begins agency biennial budget hearings in December or early January prior to the budget session. During a general session, agency supplemental budget hearings are held during the session at Joint Appropriations Committee meetings. The usual format for agency budget hearings are a leadoff presentation by the agency or department head on overall agency achievements, goals and requirements followed by a more detailed explanation of the agency's budget request. During this time the Committee asks questions but takes no formal action. It is simply an information exchange. Once hearings for all agencies are complete, the Committee begins to "work" budgets. During this time the Committee works through each agency's budget, division by division with individual Committee members making specific recommendations to approve, deny or adjust an agency's funding request. The Committee discusses and votes on each recommendation. Whether there are recommended changes or not, the Committee votes on each division or unit budget request for each agency. The entire budget hearing/budget working process generally takes five weeks and is completed one or two weeks before the budget session begins.

Once the Committee has completed its work on the budgets, the LSO budget/fiscal staff prepares the general appropriations, or budget bill, for introduction in the Legislature. The bill consists of the Joint Appropriations Committee recommendations as approved by vote of the Committee. The co-chairmen assign different portions of the bill to different Committee members for explanation of the Committee's action on the floor.

LSO budget/fiscal staff is available for providing help to legislators on amending the budget bill at any time, and are present in the staff attorneys' offices during all readings of the budget bill.

STATE BUDGET - DEFINED

When LSO budget/fiscal staff and JAC members talk of the "state budget," generally it refers to the agency budget requests that come under the Governor and Legislature's purview in the budget process. This includes the entire judicial branch; the state supported portion of the University; the Community College Commission administrative budget and includes state aid (general fund) to the community colleges; the school foundation program expenditures (K-12 education); and all state agencies and departments except the Game & Fish and the maintenance and operations budgets of the Department of Transportation. Excluded are budget decisions made by the Highway Commission for the maintenance and operations portions of the Department of Transportation, budget decisions made by the Game and Fish Commission, and appropriations for water development projects. Prior to 1994, appropriations made for the school foundation program (K-12 education) were also excluded from the "budget", but the Budget Modification Act of 1993 changed that process. Also not considered are the amounts of revenue that statutorily flow into various accounts, such as the highway fund, water development accounts, and cities, towns and counties.

While those appropriations and revenue streams definitely result in the expenditure of state funds and are a major part of the overall state fiscal picture, they do not come under the direct budget review of the Governor or the Joint Appropriations Committee. Thus the appropriations, expenditures, and revenue flows associated with these programs are not included in some of the discussion of the state "budget." This "arrangement" is not a subjective decision made by the Governor or the Joint Appropriations Committee, but rather is dictated by statute.

BUDGET/APPROPRIATION DATES

Appropriations for FY 2013-2014 biennium (July 1, 2012 through June 30, 2014):

1. Budget session (2012)

Regular biennial appropriation (for FY 2013 and 2014)

2. General session (2013)

Supplemental appropriation (if necessary for FY 2014)

3. Budget session (2014)

Effective immediate (emergency) appropriation (if necessary for FY 2014)

BUDGET TIMETABLE

July - Agencies begin budget requests for consideration by Governor and upcoming session of the Legislature.

August - Agencies final budget requests due in to Governor's Budget Office.

October - Budget Division forwards completed standard and base budgets to LSO in odd numbered calendar years. Consensus Revenue Estimating Group (CREG) updates revenue projections; Governor begins review of agency requests.

December - Governor's recommendations on agency budget requests due to Legislature; JAC may begin budget-hearing process.

January - JAC begins (continues) budget hearing and budget working process; JAC finalizes budget recommendations, LSO staff prepares budget bill.

Session - Legislature passes budget appropriations.

July - Appropriations go into effect, unless effective immediate.

STATE BUDGET - WHAT'S IN, WHAT'S NOT

What's in:

- All executive branch agencies except Game & Fish operations and Department of Transportation operations and maintenance sections;
- Department of Transportation administrative sections including driver's license, ports-of-entry, and highway patrol;
- Supreme Court, district courts and circuit courts;
- University of Wyoming general fund block grant;
- Community College Commission administrative budget and the state aid to college program (this is at the state total level, not by individual college);
- K-12 school foundation program;
- Boards and commissions;
- Capital construction appropriations for state institutions, state parks, University, community colleges and K-12 education.

What's not in:

- Appropriations of Game & Fish funds for operations;
- Non-state funds directed to the University and community colleges;
- Department of Transportation operations and maintenance;
- Appropriations for water projects;
- Ad hoc appropriations for various specific projects contained in separate (non-budget) bills;
- Automatic distributions of revenues to local governments, Highway Fund, water accounts, School Foundation Program, etc.

BUDGET TERMS – DEFINED

B-11 – This term is derived from the form number (Department of Administration and Information Budget Division form #11) that is used when an agency transfers funds from one division to another within the agency or from one agency to another agency. It is also the process used to transfer in and establish budget authority (or authority to expend) non-general fund dollars that become available to an agency during the course of a biennium. These would be non-general funds that would be in addition to those amounts appropriated during a legislative session. This form requires the Governor's signature before funds may be transferred and expended.

Base budget – The budget requests prepared by the Budget Division, in odd-numbered years, containing all legislative appropriations within the budget bill(s) for all entities, and divisions, from the previous biennium. This is a feature added to statute in the 2001 General Session, and the process began in the fall of 2001.

Budget authorization – This is a dollar figure that includes both funds appropriated by the Legislature and those transferred in through the B-11 process. It may fluctuate over the course of a biennium and may be higher or lower than the amount appropriated by the Legislature due to the B-11 process.

Cost allocation – Cost allocation is a charge to non-generally funded agencies or divisions within agencies to help cover the costs of services provided to those agencies or divisions by agencies which are generally funded. These charges are administered by the Department of Administration and Information and are pro-rated out to qualifying divisions and agencies and charged monthly. An example would be the federally funded portion of the Medicaid program within the Department of Health. It receives benefits from the services provided by the State Auditor's Office, the State Treasurer's Office, janitorial services from the Department of Administration and Information, etc. Every month the agency is charged by the Department of Administration and Information its share of the costs of these services and transfers federal funds to the Department of Administration and Information to be deposited into the state's General Fund. The total costs of the service agencies are not recouped, as some responsibilities are too general in nature to qualify for cost allocation, but the cost allocation program is intended to help offset the cost to the General Fund.

Division- Each agency has at least one division. This is the level of detail at which appropriations are made in the budget bill. A division represents a major component or major function of an agency. Each division is a line item in the budget bill and will have at least one unit. Units reflect the most detailed level of information provided in the budget documents, and are further defined below.

Unit – This is a more detailed breakdown of a division. There may be only one unit for each division or there may be an unlimited number of units for a division. Monies appropriated at the division level (previously known as the program level) are split into units and expenditures are tracked at this level in the state's accounting system. Budget requests for both standard budgets

and exception requests are prepared at this level in the biennial budget document, and then rolled up to the division level (also referred to as the appropriation level).

Flex authority – This is statutory language that overrides existing statutes and enables the Governor to transfer general fund monies between agencies and between programs within agencies that he would otherwise not be able to do. It is usually contained in a Section 300 of the biennial budget bill and is in effect for the two years of the budget. The amount of the authority varies from one budget session to another and for the FY 2013-14 biennium, the Governor is authorized to transfer up to 10% of the agency General Fund appropriation between divisions within the agency, and up to 5% of the General Fund appropriation for any executive branch agency (excluding UW) to another agency.

Exception budget – This is the budget request prepared by an agency if funding in addition to that in the standard budget request prepared by the Budget Division is being requested. This request is part of the biennial budget request and is presented to the Governor for his recommendation to the JAC. These funding requests are for funding to expand an existing program to a new level of constituents, add new services to existing constituents, or create an entirely new program. The exception request is explained and presented separate from the standard budget request in the budget documents and is prepared at the unit level in the budget documents.

Expenditure series – These are the major groupings of line item expenditure codes used in the budgets. A general description is as follows:

- 100 series all costs associated with personnel, salaries and benefits for all employees; at-will-employee-contract (AWEC) expenditures are counted here as well;
- 200 series support costs such as equipment, communications, supplies and travel;
- 300 series cost allocation;
- 400 series these are charges from the Department of Enterprise Technology (computer services);
- 500 series space rental, charged to non-generally funded agencies that are housed in a non-state owned building;
- 600 series grants and aid payments, which includes Medicaid payments, welfare payments, contract payments to local providers of health services, transfers to local governments, etc.;
- 700 series capital construction expenditures;
- 800 series non-operating expenditures, such as items purchased for resale; and
- 900 series contractual expenditures.

Line item (in the budget documents) - These represent the detailed itemizations of the expenditure series explained above. These are presented in the budget documents and consist of a three-digit numeric code. Please see the attached charts for a detailed listing of these codes.

Line item (in the budget bill) – In the budget bill, a line item is the appropriation that corresponds to the division level (appropriation level) in a budget document. It represents the amount of money appropriated at the division level for an agency.

Line item transfers – Within a division or unit in an agency, funds may be transferred from one unit to another or from one budget line item (object series) to another without going through the B-11 process. The only restrictions on these transfers are monies appropriated for: 100 series personal services (salary and benefit monies); 300 series indirect costs, which may only be moved with approval of the Budget Division; and 400 series communications and technology services, which may only be moved with permission of the Department of Enterprise Technology. Funds transferred between divisions and all other line item transfers require a B-11.

Standard budget – The budget request prepared by the Budget Division for all agencies (divisions and units) that represents an estimate of the amount of funding that is needed to operate the division(s) at the same level of services and clients as had been provided in the past biennium. It is to include only those personnel approved in the preceding biennial budget and may not include requests for equipment, any special projects, or nonrecurring funding. The limitations regarding authorized personnel and equipment requests do not apply to the University of Wyoming.

						·	

BRA appropriations to the Public School Capital Construction Account (04 Session Laws, Ch. 95, Sec. 301) of \$25,430,998 are included in the 05-06 biennium. This amount is the net difference between the \$272,039,538 appropriated from the BRA and the transfer back to the BRA of \$246,608,540. GF appropriations to the Common School Permanent Land Fund (CSPLF) and the CSPLF Reserve Account totaling \$10,521,128 in 05-06 and \$67,081,292 in 07-08 are also included. BRA appropriations to water accounts (\$75 million in 01-02, \$10 million in 05-06, \$50,043,656 in 07-08, \$34,500,000 in 09-10) and capital construction accounts (\$27 million in 07-08, \$10 million in 09-10 and \$12,928,348 in 11-12) are also included. PWMTF Spending policy reserve account appropriation of \$20 million in 11-12 to local governments was also included.

\$16.85 million from unobligated General Fund appropriations for salaries and benefits from 2005-06 was appropriated for 2007-08 salary and benefit adjustments. This amount has been included in 2007-08 and subtracted from 2005-06 to avoid double counting.

GF and BRA appropriations to the PWMTF, the LSRA and the PWMTF Reserve Account are included in the savings figures above. BY 2011-12 amount reflects Fiscal Profile dated October 23, 2012.

Category 1a (Education K-12) includes Budget Reserve Account (BRA) appropriations to the Public School Capital Construction Account (04 Session Laws, Ch. 95, Sec. 301) of \$25,430,998 in the 05-06 biennium. This amount is the net difference between the \$272,039,538 appropriated from the BRA and the transfer back to the BRA of \$246,608,540. General Fund (GF) appropriations to the Common School Permanent Land Fund (CSPLF) and to the CSPLF Reserve Account totaling \$10.521,128 in 05-06 and \$67,081,292 in 07-08 are also included in this category.

Category 5 (Employment, Economic Development and Commerce) includes appropriations for: Business Ready Communities (\$5 million in 03-04, \$45,432,802 in 05-06, \$70,517,198 in 07-08, \$75.25 million in 09-10; \$65 million in 11-12, \$50 million in 13-14); Community Facilities Grants (\$7.5 million in 05-06, \$15 million in 07-08, \$11.5 million in 09-10, \$8.5 million in 11-12, \$8.5 million in 13-14); and the NCAR supercomputer (\$21 million in 07-08).

Category 6 (Natural Resources, Environment and Recreation) includes appropriations to water development accounts of \$75 million in 01-02, \$10 million in 05-06, \$50,043,656 in 07-08, and \$34.5 million in 09-10. Category 6 also includes appropriations to the Wildlife and Natural Resource Trust Account of \$15.3 million in 05-06, \$42.25 million in 07-08, \$29.5 million in 11-12 and \$5 million in 13-14.

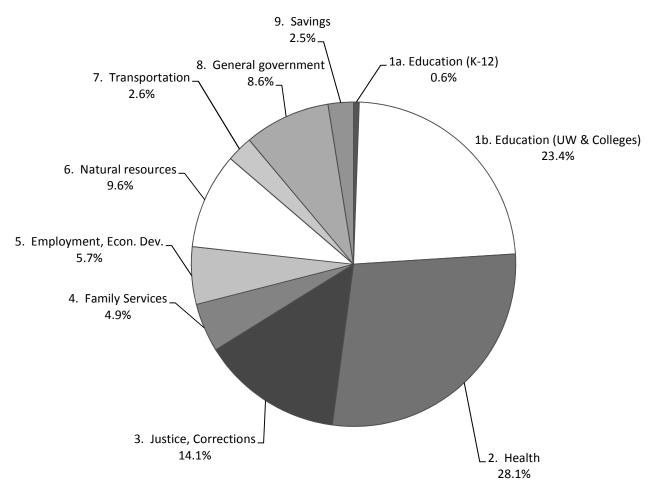

Category 8 (General government) includes appropriations for direct distributions to local governments of \$90.9 million in 05-06, \$167,615,500 in 07-08, \$145,775,000 in 09-10, \$97,456,560 in 11-12 and \$81.1 million in 13-14. Category 8 also includes: SLIB grant appropriations (\$7.5 million in 03-04, \$32,401,364 in 05-06, \$145,868,318 in 07-08, \$14.7 million in 09-10, \$35 million in 11-12, \$54 million in 13-14); county block grant distributions (\$18,665,500 in 07-08 and \$191 million in 09-10); assistance to communities (\$3.5 million to Wamsutter in 09-10, \$1 million for rural fire districts and \$6 million for energy impacted county roads in 11-12); and transfers to the capitol building restoration account (\$27 million in 07-08, \$10 million in 09-10).

In Category 8, \$16.85 million from unobligated 2005-06 General Fund appropriations for salaries and benefits was appropriated for 2007-08 salary and benefit adjustments. This amount has been included in 2007-08 and subtracted from 2005-06 to avoid double counting.

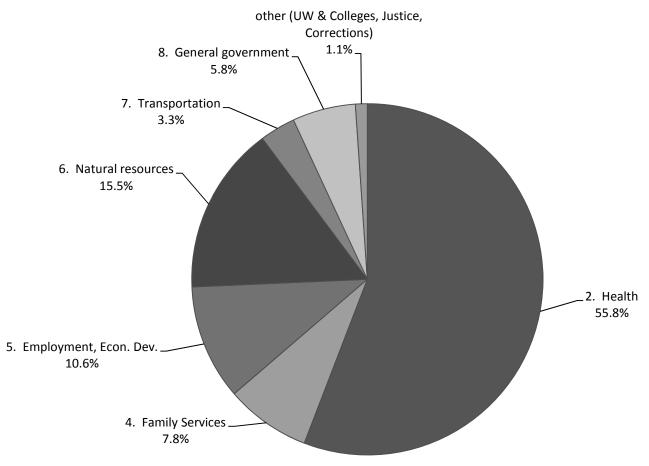

Category 9 (Savings) includes General Fund and Budget Reserve Account appropriations to the Permanent Wyoming Mineral Trust Fund (PWMTF), the Legislative Stabilization Reserve Account (LSRA), and the PWMTF Reserve Account. 13-14 amount reflects the Fiscal Profile dated October 23, 2012.

- Chapter 99, 02 Session Laws created the School Facilities Commission (agency 027), and transferred school capital construction and major maintenance budgets and responsibility from the Department of Education School Finance (agency 205) to the School Facilities Commission (agency 027). Appropriations for the 2005-06 biennium include \$332,694,042 for school capital construction and \$66.4 million for major maintenance. Appropriations for the 2007-08 biennium include \$403,558,123 for school capital construction and \$74.2 million for major maintenance. Appropriations for the 2009-10 biennium include \$337,400,809 for school capital construction, \$84,182,098 for major maintenance and \$3 million for infrastructure. Appropriations for the 2011-12 biennium include \$387.2 million for school capital construction and \$82,000,000 for major maintenance. Appropriations for the 2013-14 biennium include \$416.1 million for school capital construction \$1,469,153 for engineering and technical services and \$101.7 million for major maintenance.
- 2 No general fund supplement was necessary for the 2005-06, 2007-08, 2009-10, 2011-12, or 2013-14 bienniums.
- In the 2007-08 biennium, the Higher Education Assistance Authority was transferred into the Community College Commission
- 4 Chapter 95, 04 Session Laws appropriated \$125,897,766 for capital construction. Of this amount, \$17,658,900 was effective immediately for the 2003-04 biennium. \$76 million was appropriated in 2005-06 and \$43,935,033 was appropriated in 2007-08 for a medium security correctional facility. A General Fund appropriation of \$12,483,922 was included in 2007-08 for operation of the new facility.
- 5 The Department of Employmen (Agency 025) and the Department of Workforce Services (Agency 026) were consolidated under Agency 053, Department of Workforce Services in FY13-14.
- The Wyoming Business Council General Fund appropriation for 2005-06 includes \$52,932,802 for the Business Ready Community Program and the Community Facilities Program. The General Fund appropriation for 2007-08 includes \$85,517,198 for the Business Ready Community Program and the Community Facilities Program, and \$10 million for the construction of welcome centers. The General Fund appropriation for 2009-10 includes \$86.75 million for Business Ready Communities and for Community Facilities. The General Fund appropriation for 2011-12 includes \$58.5 million for investment ready communities and \$15 million for data centers. Finally, through the 2012 Session, the Legislature appropriated \$58.5 million in 2013-14 for investment ready communities.
- Appropriations from water development accounts for planning studies and construction projects are included, in addition to appropriations to the Water Development Office for administration. Transfers from reserve accounts to water development accounts are excluded to avoid double-counting.
- 8 Chapter 225, 05 Session Laws appropriated \$15 million to the Wildlife and Natural Resource Trust and \$300,000 to the Wildlife and Natural Resource Trust Income Account, and created the Wildlife and Natural Resource Trust Account Board. 2007-08 biennium appropriations include \$42.25 million to the Trust, \$3 million to the Wildlife Trust Challenge Account, and \$9,172,420 for wildlife projects and operations. 2009-10 biennium appropriations include \$29.5 million to the Trust, \$11,152,500 for projects, and \$684,492 for administration. 2013-14 appropriations include \$5 million to the Trust, \$11,152,500 for projects, and \$584,031 for administration and an effective immediate appropriation to the Wyoming Wildlife and Natural Resource Trust Income account for project funding. Occasionally, this account can include a double accounting when appropriations are made to the Income Account and subsequently the Legislature appropriates funds from the Income Account for projects.
- 9 The 2005-06 biennium includes \$4,075,000 for capital construction projects and \$2,518,570 for sage grouse, brucellosis and chronic wasting disease management. 2007-08 includes \$15,746,727 for capital construction projects, \$4,001,739 for sage grouse, brucellosis and chronic wasting disease management, and \$1.1 million for game and fish license revenue recoupment. In 2009-10, \$14,521,322 is appropriated for the Game and Fish Cheyenne Headquarters and \$1.7 million is appropriated for game and fish license revenue recoupment. \$10,883,239 is also appropriated for various programs. Of this amount, \$2,975,095 is effective immediately. 2011-12 includes roughly \$7.3 million for various programs, \$1,060,976 for Aquatic Invasive Species, and \$1,822,000 for capital construction. 2013-14 includes \$2,947,117 for Aquatic Invasive Species, \$170,000 for capital construction and \$193,000 for game warden retirement.
- In the 2005-06 biennium \$57.5 million was appropriated to the Office of State Lands & Investments (Agency 060) and \$33.4 million was appropriated to the State Treasurer for distribution to cities, towns and counties (Chapter 95, 04 session laws, and Chapter 191, 05 session laws). In the 2007-08 biennium, a total of \$118,115,500 was appropriated to Agency 060 for distribution to cities, towns and counties. In the 2013-175,000 was appropriated to Agency 060 for distribution to cities, towns & counties. In the 2013-14 biennium, \$81.0 million has been appropriated to Agency 060 for distribution to cities, towns & counties. In the 2013-14 biennium, \$81.0 million has been appropriated to Agency 060 for distribution to cities, towns & counties. Agency 060 also includes appropriations to the Mineral Royalty Grant Program of \$67,401,364 in 2005-06, \$179,268,318 in 2007-08, \$43.4 million in 2009-10 and \$33.4 million in both 2011-12 and 2013-14. Also included in Agency 060 are appropriations for county block allocations for capital projects of \$18,665,500 in 2007-08, \$191 million in 2009-10. \$35 million in 2011-12 and \$54 million in 2013-14.
- In the 2005-06 biennium (Chapter 191, 05 Session Laws), \$7,172,671 was appropriated from the General Fund and \$7.2 million was appropriated from Federal Funds for the WyoLink public safety system, and \$4.1 million was appropriated from the General Fund to the Highway Fund for multi-lane highway construction. In addition, \$3,215,000 was appropriated from the General Fund for air services enhancement (Chapter 13, 05 Session Laws), \$7 million was appropriated from the Budget Reserve Account to the Highway Fund for multi-lane highway construction (Chapter 120, 05 Session Laws), and \$1 million was appropriated from the General Fund for public transit (Chapter 150, 05 Session Laws). General Fund appropriations for 2007-08 include \$35,111,340 for the WyoLink public safety system, \$17,940,419 for airport improvements, and \$17 million for highway and other transportation projects as prioritized by the transportation commission. General Fund appropriations for 2009-10 include \$12,030,000 for WyoLink, \$13,502,011 for airport improvements, and \$200 million for transportation commission projects. General Fund appropriations for 2011-12 include \$2,545,000 for WyoLink, \$17,453,379 for airport Improvements and \$95,000,000
 - for transportation commission projects. 2011-12 also includes \$30 million in federal Abandoned Mine Land funds appropriated during the 2012 session which were effective immediately. General Fund appropriations for 2013-14 include \$1,308,380 for Wyolink, \$15,213,992 for airport improvements and \$70 million for transportation commission projects.
- 12 In the 1997-98 biennium, Emergency Management was transferred to the Adjutant General (agency 007). In the 2005-06 biennium, funding for the Emergency Management program was transferred from the Adjutant General (agency 007) to the Governor (agency 001).
- 13 In the 1999-00 biennium, the Liquor Commission was transferred into the Department of Revenue. In the 2007-08 biennium, \$46.6 million was appropriated from the Budget Reserve Account to the Department of Revenue to hold local governments harmless from the sales and use tax exemption on food for domestic home consumption.
- In the 2003-04 biennium, the Employees Insurance Board was transferred into the Department of Administration and Information. In the 2013-2014 biennium, the Department of Enterprise Technology Services was created as Agency 077. However, it was not separately budgeted until FY14.
- 15 General funds were appropriated in the 2003-04 through 2007-08 bienniums to fund the unfunded liability of the Wyoming law enforcement retirement plan created by W.S. 9-3-432.
- These appropriations were commonly found in either the Governor's Office, the Auditor's Office, or a section 300. These appropriations do not reflect all compensation increases. These across-the-board compensation appropriations generally do not include funds directed to the judicial branch, UW, or community colleges. The 2005-06 biennium includes salary increases for executive branch employees, judges, and nurses, and includes increases in the employee insurance contribution and funds to maintain longevity at \$40.
 - Across-the-board General Fund salary and benefit increases of roughly \$55 million in 2007-08 and \$65.3 million in 2009-10 are included in agency budgets. The \$65.3 million for 2009-10 includes roughly \$8 million for the additional 1% of employee salaries to be deposited in the new retiree health insurance benefits account. Additionally, \$16.85 million from unobligated General Fund appropriations for salary and benefits from 2005-06 is also appropriated for 2007-08 salary and benefit adjustments. This amount has been included in 2007-08 and subtracted from 2005-06 to avoid double-counting. Also included in 2007-08 is \$3,187,584 for competitive market raises, \$4,044,197 for a 2% cost of living increase, and \$3,350,000 for retiree health insurance. 2009-10 figures include \$6.7 million for retiree health insurance. The \$43,774,576 appropriation for 2011-12 includes \$37,274,576 to be expended on increased employer contributions to the Wyoming Retirement System and \$6,500,000 to be expended for health insurance benefits for retirees whose date of retirement was prior to July 1, 2008.
- 17 Category subtotals were adjusted to reclassify General Fund appropriations for the Mineral Royalty Grant Program, local government distributions and county block allocations (\$89,901,364 in 2005-06, \$282,649,318 in 2007-08, \$354,975,000 in 2009-10, \$112,456,560 in 2011-12 and \$135 million in 2013-14) from category 6 (Natural Resources, Environment, and Recreation) to category 8 (General Government). These category subtotals were also adjusted to reclassify Other Fund appropriations to the Mineral Royalty Grant Program (\$35 million in 05-06, \$33.4 million in 07-08, \$33.4 million in 09-10, \$33.4 million in 11-12, and \$33.4 million in 2013-14) and \$20,000,000 from the Wyoming mineral trust fund reserve account for local government distributions in 2011-12.

State Historical Appropriations Category 1 - Education FY 2001/02 - 2013/14

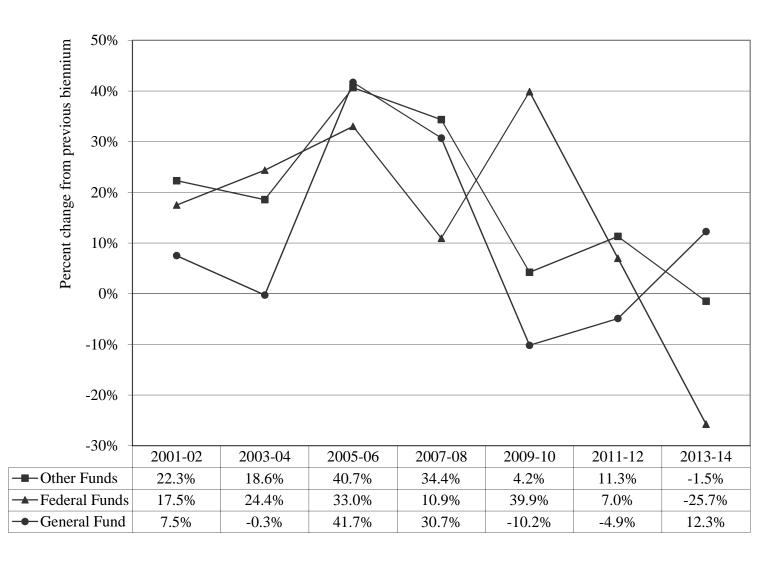

^{1.} Appropriations for 2003-04 were adjusted to reflect a decrease in the General Fund appropriation and an increase in the Other Funds appropriation caused by increased School Foundation Program revenues and increased local resources.

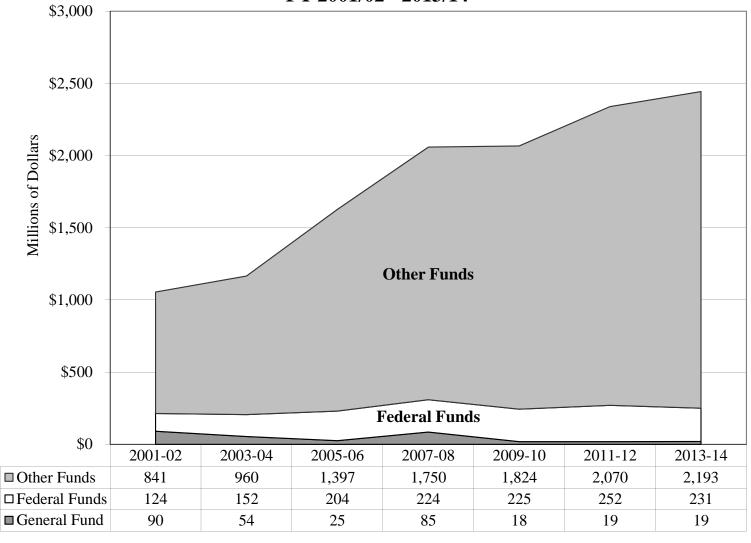

^{2.} Appropriations include funding for K-12 capital construction, K-12 major maintenance, infrastructure and component level projects.

^{3.} For UW and the community colleges, funding includes capital construction, major maintenance and endowment appropriations.

State Historical Appropriations (Percent Growth) Category 1 - Education FY 2001/02 - 2013/14

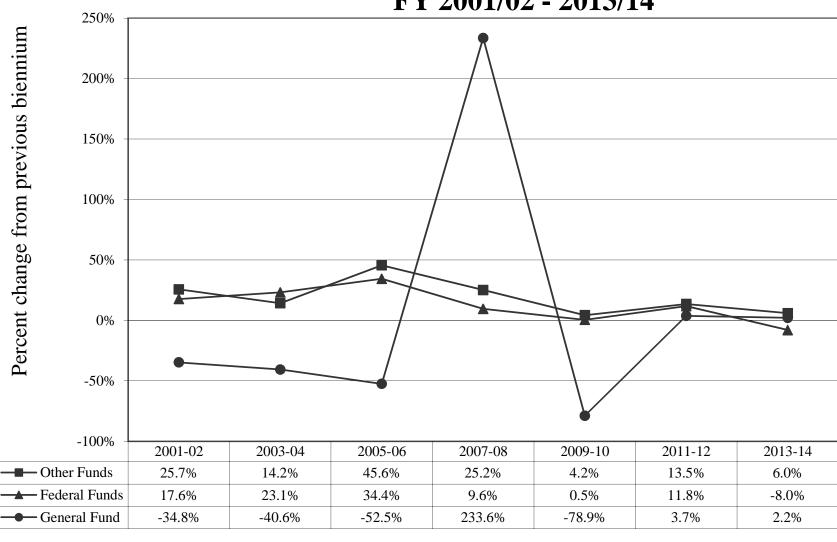

State Historical Appropriations Category 1(a) - Education (K-12) FY 2001/02 - 2013/14

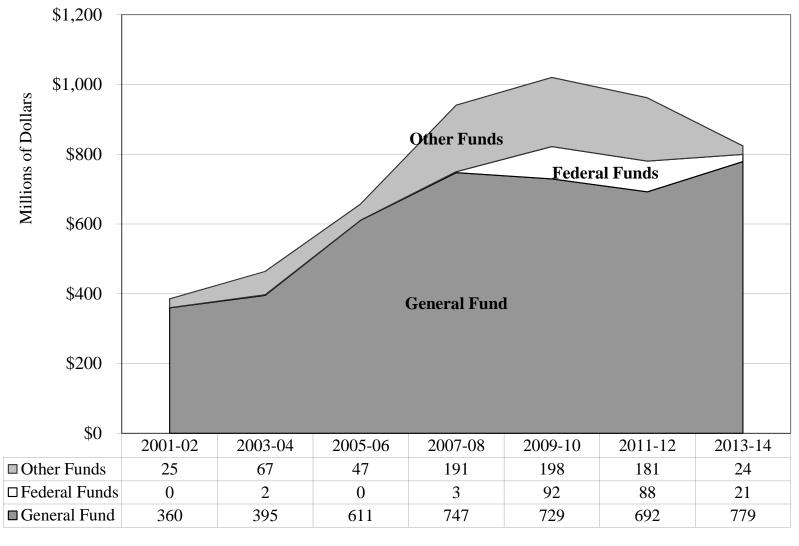

^{1.} Appropriations for 2003-04 were adjusted to reflect a decrease in the General Fund appropriation and an increase in the Other Funds appropriation caused by increased School Foundation Program revenues and increased local resources.

^{2.} Biennial appropriations include funding for school capital construction, K-12 major maintenance, infrastructure and component level projects.

Category 5 - Employment, Economic Development, and Commerce
FY 2001/02 - 2013/14

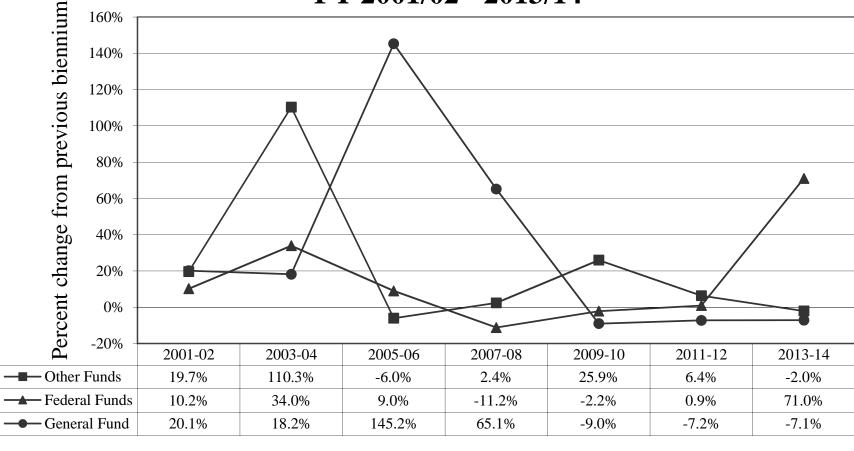

^{1.} Other Funds include appropriations to the Public Service Commission for the Universal Service Fund, to the Insurance Department for the Health Insurance Pool, and to the Dept. of Employment for Workers' Safety and Compensation.

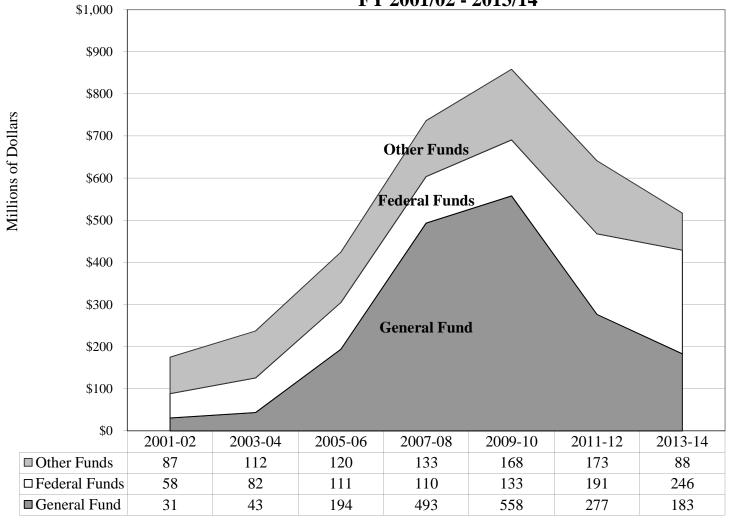

^{2.} General Fund appropriations include the Business Ready Community program, the Cultural Trust Fund, the Community Facilities program, State Parks major maintenance, loans to the Infrastructure Authority and the Pipeline Authority, the new Enhanced Oil Recovery Commission, and the NCAR supercomputer.

State Historical Appropriations (Percent Growth) Category 5 - Employment, Economic Development, and Commerce

FY 2001/02 - 2013/14

State Historical Appropriations Category 6 -Natural Resources, Environment, and Recreation FY 2001/02 - 2013/14

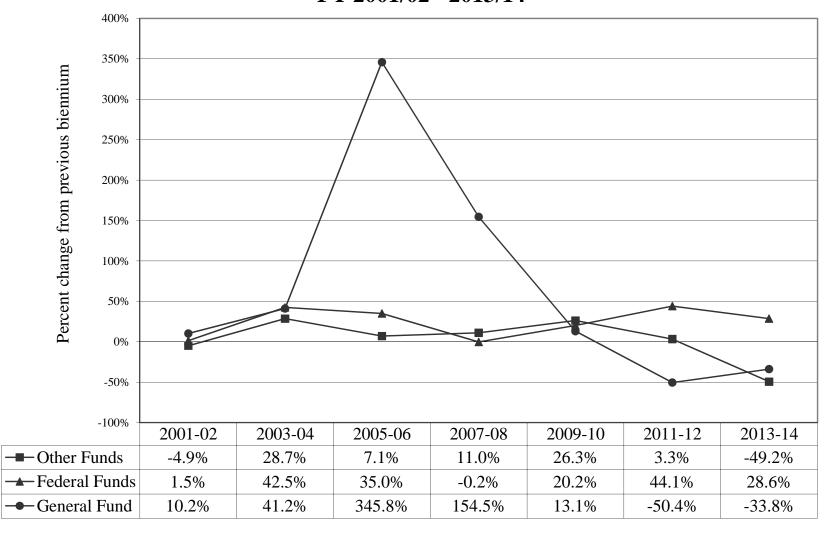

^{1.} Game and Fish non-appropriated funds are not included in the above appropriations, however, General Fund appropriations include several to the Game and Fish Department for: capital construction projects, sage grouse protection, brucellosis, chronic wasting disease management, wolf management, license revenue recoupment, a Cheyenne headquarters building and a comprehensive wildlife conservation strategy.

^{2.} Other Funds includes appropriations to the Wildlife and Natural Resource Trust Account (Wildlife Trust) and the Wildlife and Natural Resource Trust Income Account. General Fund appropriations include the Wildlife Trust, the Wildlife Trust Challenge Account, and projects and administration.

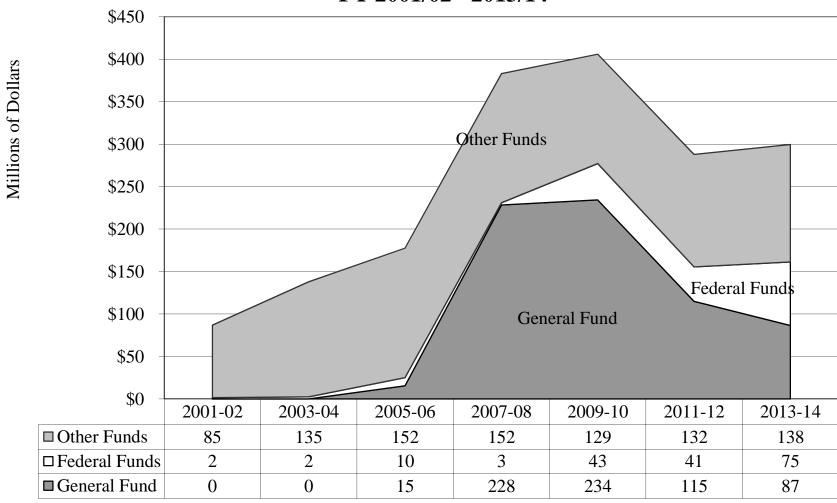

^{3.} The main funding source for the State Engineer's Office changed from Water Development funds to the General Fund in 2005-06.

^{4.} Other Funds includes appropriations from water development accounts to the Water Development Office for administration, planning studies and construction projects.

State Historical Appropriations (Percent Growth) Category 6 -Natural Resources, Environment, and Recreation FY 2001/02 - 2013/14

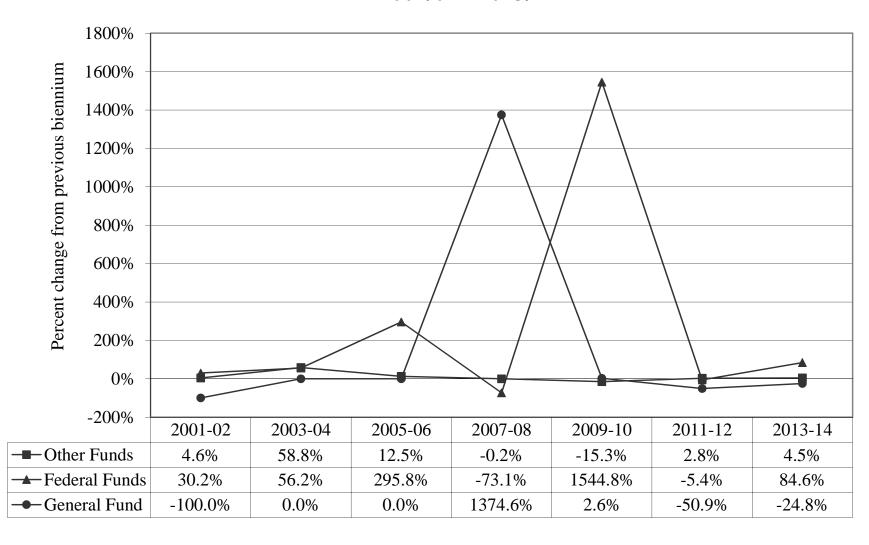

State Historical Appropriations Category 7 - Transportation FY 2001/02 - 2013/14

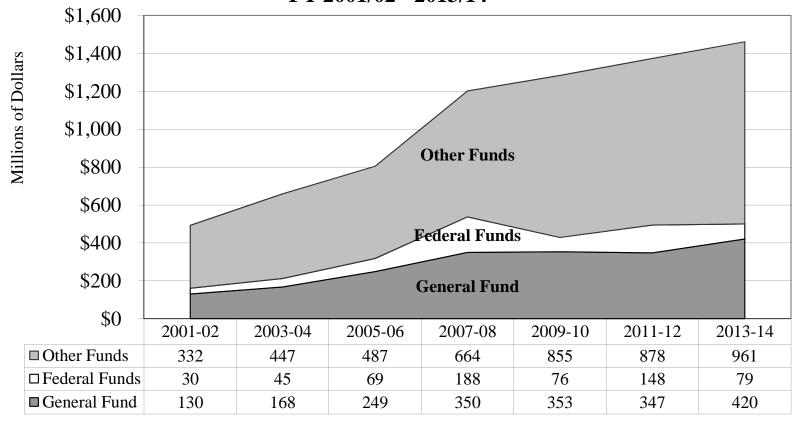

^{1.} Department of Transportation non-appropriated funds are not included in the above appropriations.

^{2.} Other Funds includes appropriations for airport improvements and multi-lane highway construction. Federal Funds includes appropriations for the WyoLink public safety system in 2005-06. General Fund appropriations include WyoLink, public transit, air services enhancement, multi-lane highway construction, airport improvements and transportation commission projects.

State Historical Appropriations (Percent Growth) Category 7 - Transportation FY 2001/02 - 2013/14

State Historical Appropriations Category 8 - General Government FY 2001/02 - 2013/14

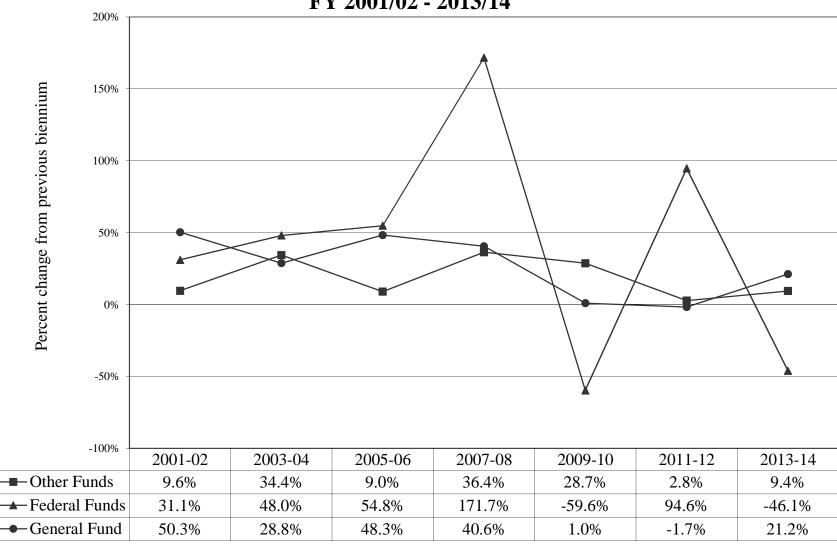

^{1.} General Fund appropriations include across-the-board salary and benefit increases for all agencies through 2005-06. Across-the-board salary and benefit increases in 2007-08 and 2009-10 are included in agency budgets, therefore they are included in all appropriation categories. 2007-08 includes General Fund appropriations for competitive market raises, a 2% cost of living increase, and for retiree health insurance.

^{2.} General Fund appropriations include the Mineral Royalty Grant Program, local government distributions and county block allocations. Other Funds appropriations include the Mineral Royalty Grant Program and the Permanent Wyoming Mineral Trust Fund (PWMTF) reserve account for local government distributions in 2011-12.

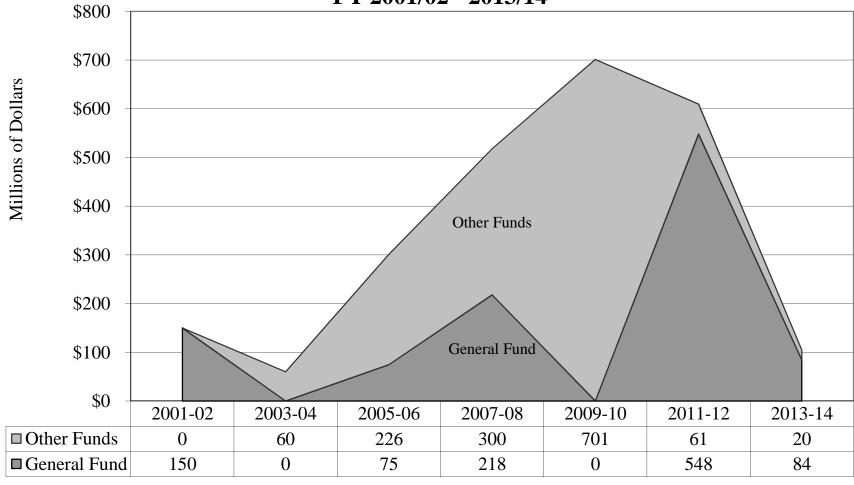

^{3.} Appropriations for capital construction and major maintenance occur in General Fund and Other Funds. In 2007-08 general funds were appropriated to hold local governments harmless from the sales and use tax exemption on food for domestic home consumption.

State Historical Appropriations (Percent Growth) Category 8 - General Government FY 2001/02 - 2013/14

State Historical Appropriations Category 9 - Savings

FY 2001/02 - 2013/14

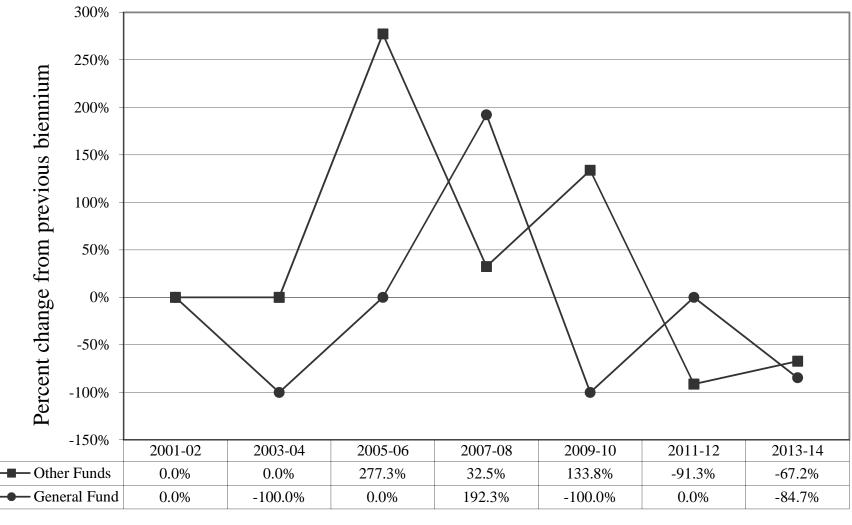

^{1.} This category includes appropriations to the Permanent Wyoming Mineral Trust Fund (PWMTF), the PWMTF Reserve Account, and the Legislative Stabilization Reserve Account (LSRA).

^{2.} The Other Funds appropriations shown above are from the Budget Reserve Account.

Sources: State Treasurer's annual report, reports from the Department of Revenue, the Department of Transportation, Office of State Lands and Investments, and the Wyoming Water Development Commission.

Note: Federal mineral royalty grants represent the total amount granted; water development figures are amounts actually expended (not the amount appropriated). In the event the entire amount granted or appropriated is not used, the unused portions revert and may be re-appropriated or re-granted.

^{1 -} Federal Mineral Royalties and Severance Taxes to Cities & Towns, and Counties beginning with FY95 are distributed monthly based on CREG estimates. Variances from CREG projections are corrected in the next fiscal year's distributions.

^{2 -} Portions of these revenues are used as local resources for K-12 school districts.

^{3 -} These grants and loans reflect actual distributions on a calendar year basis through 2005. Mineral Royalty Grants shown for FY2006-2012 reflect amounts appropriated.

 $[\]hbox{\it 4-In FY2002 a one-time, final distribution of the balance of the Municipal Mineral Trust Fund was made to local governments. } \\$

 $⁵⁻ The \ FY 2010\ amount includes\ budget\ reductions\ of\ \$4,000,000\ for\ business\ ready\ communities\ and\ \$3,500,000\ for\ community\ facilities.$

^{6 -} Prior to FY2000, these funds flowed through the Department of Transportation on behalf of the counties; in FY2000 they started flowing directly to the counties.

^{7 -} The FY2010 amount includes a budget reduction of \$3,225,000.

^{8 -} FY2007 forward includes an optional economic development one cent sales tax.

Total Local Government General Fund Appropriations Ch. 26, 2012 Session Laws - FY 2013-14 Biennium \$135,000,000

Total Direct Distribution Appropriation (60% of total) Ch. 26, 2012 Session Laws - FY 2013-14 Biennium \$81,000,000

1/3

Counties

\$24,030,000

two equal distributions of

\$12,015,000

Distributions based the 2010

decennial census population.

15% of total amount is distributed

equally to each county.

Remaining 85% is distributed to

each county in the proportion

each county's population bore to

the total state population.

89% \$72,090,000

Directly distributed to all cities, towns and counties in two equal distributions of \$36,045,000 (August 15, 2012 and August 15, 2013)

2/3 Cities and Towns \$48,060,000

two equal distributions of \$24,030,000

Distributions based on the 2010 decennial census population. Cities & towns with population of 35 or less received a flat distribution of \$5,000, and cities & towns with population over 35 received a flat distribution of \$10,000. The remainder is distributed to all cities & towns in proportion that its <u>adjusted population</u> bore to the total adjusted

population of all cities & towns. City & town populations of all cities & towns. City & town populations are adjusted based on the county per capita sales & use tax distribution for fiscal year 2011, with those cities & towns in the lowest twentieth percentile receiving a population adjustment. Populations of cities & towns in the lowest tenth percentile are

towns in the lowest twentieth percentile and above the lowest tenth percentile are multiplied by 125%. Populations of cities & towns above the lowest twentieth percentile are not adjusted.

multiplied by 150%, and populations of cities 8

11% \$8,910,000

Distributed through a hardship formula in two equal distributions of \$4,455,000 (August 15, 2012 and August 15, 2013)

5.5% \$4,455,000

two equal distributions of \$2,227,500

Distribution only to cities & towns in lowest twentieth percentile of FY 2011 per capita sales & use tax.

5.5% \$4,455,000

two equal distributions of \$2,227,500

Distribution only to counties with property taxes available less than defined funding need.

Property taxes available equals 2011 tax year county assessed valuation times 12 mills.

County funding need is computed with the following formula: \$1,200,000 + (county population up to 5,000 x \$160) + (county population from 5,001 to 25,000 x \$130) + (county population above 25,000 x \$100).

Total Consensus Block Grant Appropriation (40% of total) Ch. 26, 2012 Session Laws - FY13-14 \$54,000,000

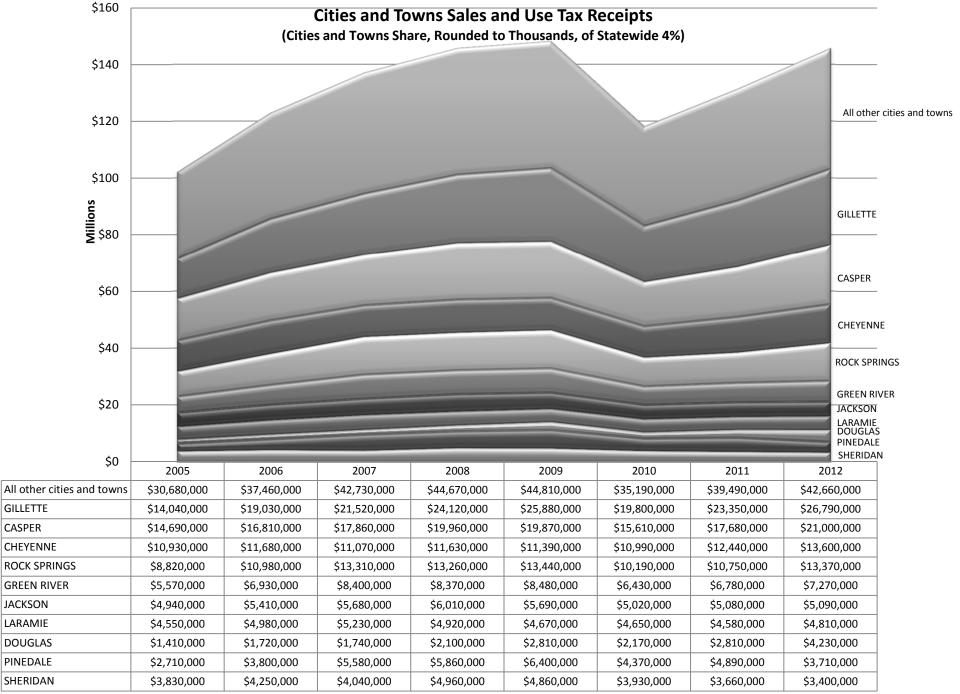

80%

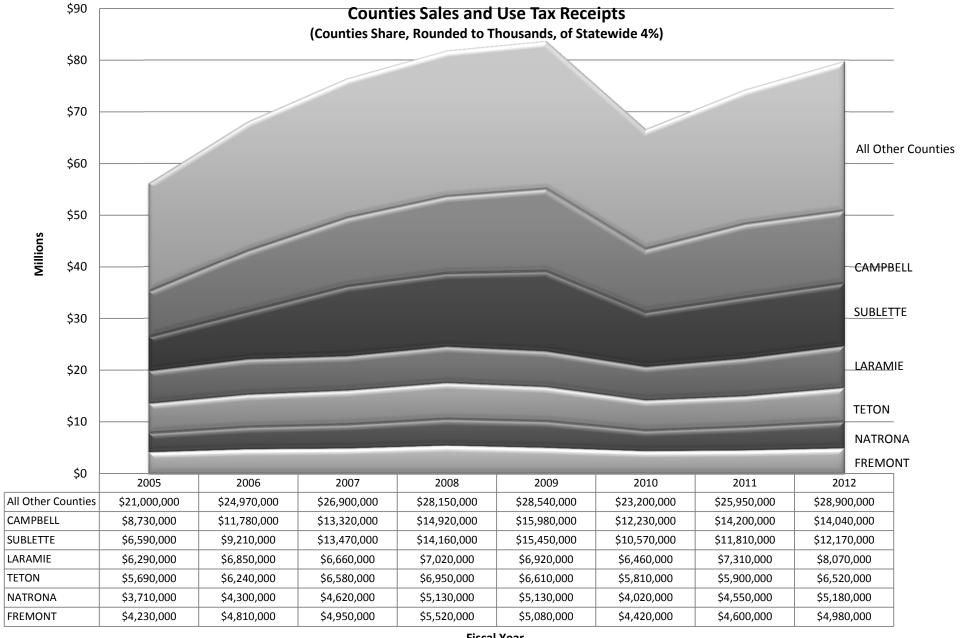

allocated to each county based on the proportion of county population to total state population, based on the 2010 decennial census

\$43,200,000

20%

Allocated to each county based on each county's inverse per capita assessed valuation factor. These calculations based on the 2011 tax year assessed valuations and the 2010 decennial census \$10,800,000

Notes:

- 1. Federal aid for highways are the major highway programs of the department's Highway Improvement Program. They do not include other federal funding WYDOT receives for motor carrier safety, rural mass transit or airports.
- 2. The aforementioned federal aid for highways are shown as the level of obligation limitation WYDOT receives for said funding.
- 3. Federal statistics are based on an October through September Fiscal Year.
- 4. Severance taxes and FMRs are net of all diversions.
- 5. Federal Mineral Royalties include both the Highway Fund portion and the Industrial Road Fund portion.
- 6. The increase in FY2009 Federal Aid Funds was due to American Recovery and Reinvestment Act (ARRA) stimulus funding.

Fuel taxes:	Total Generated for FY13	Federal/State matching shar	e for construction	:
\$0.01/gallon with exemptions:	\$7,100,000	Category:	Split:	
\$0.01/gallon without exemptions:	\$11,700,000	Interstate	92.76/7.24

Revenue Enhancement Options - October 2012 CREG

The following items are presented as possible additions (or deductions) to current state revenues. Amounts are total revenues and subject to distribution by the Legislature. Numbers are in millions of dollars. Explanatory notes are listed at the end of the chart.

Taxes and	Fees	FY 13	FY 14	FY 15
1.	1% Sales & Use Tax	183.1	185.5	187.5
2.	Fuel taxes			
	\$0.01/gal Gas & Special Fuels, no exemptions	11.5	11.7	12.0
	\$0.01/gal Gas & Special Fuels, with exemptions	7.0	7.0	7.0
3.	Cigarette Taxes			
	\$0.001 Per Cigarette (\$.02 per pack)	0.7	0.7	0.7
4.	Liquor Taxes			
	\$0.02/gal Malt Beverage	0.3	0.3	0.3
	\$0.95/gal Spirits	1.2	1.2	1.2
	\$0.28/gal Wine	0.3	0.3	0.3
5.	1 Statewide Mill Levy	25.2	22.5	23.8
6.	1% Minerals Severance	132.6	142.7	148.4
7.	Increase In Assessment Ratio			
	1% on 9.5%	42.0	42.9	43.7
	1% on 11.5%	21.5	21.9	22.4

Explanatory Notes

Item # Explanation

- 1. This figure represents the total revenue from an additional 1% sales and use tax, not just the GF 69% share.
- 2. Estimated fuel tax from \$0.01/gallon increase provided by WYDOT.
- 3. This figure represents the total revenue from an additional tax of \$0.001 per cigarette (\$0.02 per pack), not just the current state General Fund share.
- 4. Liquor taxes listed are roughly equivalent to the current taxes in place.
- 5. This estimate uses the total statewide assessed valuation, as estimated by CREG.
- 6. This figure reflects the revenue from an additional 1% severance tax on all minerals.
- 7. This estimate assumes a 2% annual growth rate in non-mineral assessed valuations and a statewide average mill levy of 70 mills.

Impact of Mineral Price Changes on Severance Taxes, Federal Mineral Royalties and Ad Valorem Taxes - October 2012 CREG

	FY14	FY15	FY16
Oil - per \$5.00/bbl change in gross sales price			
Severance Taxes (Over \$155 Million)			
General Fund (GF)	\$ 2,600,000	\$ 2,600,000	\$ 2,600,000

Significant Statutory Changes Affecting State Taxation

1977 through 2012

Year	Chapte	er Explanation
1977	189	 Increased severance tax on coal by 1.6% for CY 77 & 2% for CY 78 until \$160M collected¹; Note: The \$160M capital facilities tax expired on 1/1/87 Increased severance tax on coal by 1.5% for Water development account; increased severance tax on coal by 1% for highway fund; Increased severance tax on coal by .5% to PWMTF; effective 1/1/78 (total 10.1%);
		• Increased severance tax on trona by 1.5% (total 5.5%); increased severance tax on uranium by 3.5% (total 5.5%)
1977	155	Increased severance tax on coal, uranium & trona by 1.5% until \$250M collected; effective 1/1/78; expired on 1/1/93
1979	37	Imposed \$.04/gallon tax on gasohol (other gas taxed @ \$.08/gallon)
1979	163	Granted homestead property tax exemption & appropriated \$10M for program
1981	9	Imposed a use tax on cigarettes of \$.08 per pack
1981	49	Increased severance tax on oil/gas by 2% (6% total); distributed to state (highway fund, PWMTF & water development account) & cities & counties
1982	74	State inheritance tax imposed
1983	173	Decreased severance tax on underground coal from 10.5% to 7.25%
1983	136	School foundation program - imposed a 12 mill state levy & 6 mill county levy
1984	70	Mass property tax reappraisal system passed - \$5M appropriated
1985	207	Imposed \$.08/gallon on special fuels & repealed compensatory fees on special fuels

The first imposition of severance tax was placed upon 1969 mineral production and was collected in 1970. The severance tax rate was 1% of the value of the gross product (based upon property tax valuation). In 1974 the severance tax rate was increased to 3% for trona, coal, other fossil fuel minerals, and oil, natural gas and oil shale. In 1974 the Legislature also proposed an amendment to the Wyoming Constitution creating the Permanent Wyoming Mineral Trust Fund which was ratified by the voters in November, 1974. In 1975 the severance tax rate was increased from 3% to 4%. Source: 1978 Wyoming Annual Report Vol. II

1985	182	Decreased severance tax on collection wells from 6% to 1.5% & exempted from property tax through 1989
1986	3	1/4 of proceeds from severance taxes (except underground coal) diverted to worker's compensation fund
1986	22	Imposed 2.5% premium tax on insurers
1987	97	Coal Equity Tax Act of 1987 - limited severance tax to \$.80/ton on high-cost coal
1987	29	Severance taxes paid on CO2 injected in oil production allowed as a credit against oil severance tax
1987	241	Granted 4% severance tax exemption for wildcat wells for 4 years (total 2%)
1988	93	Allowed deduction for return on investment for mineral production on certain capital investments for transportation facilities or processing plants
1988	SJR7	Amended constitution to provide for 3 tier system for fair market value of taxation (minerals, industrial, & all other)
1988	73	Implemented 3 tier system for fair market value in assessing property for property tax (minerals, industrial, & all other)
1988	72	Diversion of severance taxes from PWMTF to budget reserve account (BRA) begun
1989	45	Increased cigarette taxes by \$.002 to .006 per cigarette (\$.12 per pack)
1989	35	Extended Coal Tax Equity Act to 1991 (3/31/91)
1989	172	Exempted coal used on processing from property & severance taxes
1989	287	Exemption for tertiary oil production from projects certified by Oil & Gas Commn.; granted a severance tax exemption up to 1/2 of wages paid to resident workers or total amount of 2% severance tax
1989	106	Continued \$.04/gallon tax on gasohol 7/1/89 through 7/1/93
1989	36	Created municipal rainy day account funded with excess oil & gas severance tax & federal mineral royalties
1989	57	Repealed deduction allowed for return on investment for mineral production (on transportation facilities & processing plants)
1989	120	Continued budget reserve account diversion of severance taxes through 6/30/91
1989	144	Decreased severance tax on uranium from 4% to 2%

1990 22 Extended 1.5% severance tax on collection wells to 1/1/95 (in lieu of 6% rate) 1990 93 Eliminated ton/mile tax and implemented commercial vehicle fees 1990 13 Budget reserve account diversion extended through 6/30/92 1991 14 Coal Tax Equity Act extended through 3/31/95 1991 149 Reduced insurance premium tax rate from 2.5% to .75% (retaliatory provision for other states remained in effect) 1991 237 Extension of 2% severance tax exemption on tertiary production to 12/31/94 (4% total) 1991 239 Exempted specified underground mining equipment from property tax 1991 42 Exempted uranium from 4% severance tax as long as price under \$17/pound 1991 139 Extended 4% severance tax exemption on wildcat wells to 12/31/94 (2% total) 1992 4 Reallocated 30% of revenues from 1.5% severance tax on coal & trona to public school foundation program account 1992 77 Extended 4% severance from 1.5% severance tax on coal & trona to public school foundation program account 1993 167 Exempted oil & gas from 4% severance tax if well drilled (new production) between 93 to 96 (cap on oil \$25/bbl; gas \$2.75/mcf); same reduction for workover or completion for 24 months but no cap on price (2% total) 1993 107 Modified computation of school local property taxes/local resources (comparing resources before 7/1/91 & basing foundation program amount on before/after amounts) 1993 223 Added \$.01 sales/use tax & changed tax distribution from 2/3 to 72% to general fund 1994 85 Tax credit voucher program for ethanol up to \$2M per year until 7/1/2000 1994 6 Diversion of severance taxes from PWMTF to budget reserve account (BRA) extended to 6/30/96 1995 48 Coal Tax Equity Act extended through 3/15/99 1995 48 Coal Tax Equity Act extended through 3/15/99 1995 55 Exempted oil produced from previously shut-in wells from all but 1.5% severance accourt souls after the reserved account souls and the reserved account s	1989	270	Imposed a \$.01/gallon tax for L.U.S.T.
1990 93 Eliminated ton/mile tax and implemented commercial vehicle fees 1990 13 Budget reserve account diversion extended through 6/30/92 1991 13 Coal Tax Equity Act extended through 3/31/95 1991 149 Reduced insurance premium tax rate from 2.5% to .75% (retaliatory provision for other states remained in effect) 1991 237 Extension of 2% severance tax exemption on tertiary production to 12/31/94 (4% total) 1991 239 Exempted specified underground mining equipment from property tax 1991 42 Exempted uranium from 4% severance tax as long as price under \$17/pound 1991 139 Extended 4% severance tax exemption on wildcat wells to 12/31/94 (2% total) 1992 4 Reallocated 30% of revenues from 1.5% severance tax on coal & trona to public school foundation program account 1992 77 Extended 4% severance tax if well drilled (new production) between 93 to 96 (cap on oil \$25/bbl; gas \$2.75/mof); same reduction for workover or completion for 24 months but no cap on price (2% total) 1993 107 Modified computation of school local property taxes/local resources (comparing resources before 7/1/91 & basing foundation program amount on before/after amounts) 1993 223 Added \$.01 sales/use tax & changed tax distribution from 2/3 to 72% to general fund 1994 13 Gas tax distribution 13.5% to counties; 14% to state-county road account in highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for cities & towns; 57.5% to state highway fund; 15% for	1990	22	Extended 1.5% severance tax on collection wells
commercial vehicle fees			
1990 13 Budget reserve account diversion extended through 6/30/92 1991 13 Coal Tax Equity Act extended through 3/31/95 1991 149 Reduced insurance premium tax rate from 2.5% to .75% (retaliatory provision for other states remained in effect) 1991 237 Extension of 2% severance tax exemption on tertiary production to 12/31/94 (4% total) 1991 239 Exempted specified underground mining equipment from property tax 1991 42 Exempted uranium from 4% severance tax as long as price under \$17/pound 1991 139 Extended 4% severance tax exemption on wildcat wells to 12/31/94 (2% total) 1992 4 Reallocated 30% of revenues from 1.5% severance tax on coal & trona to public school foundation program account 1992 77 Extended gasohol tax reduction \$.08/gallon to \$.04/gallon to 2000 1993 167 Extended of & gas from 4% severance tax if well drilled (new production) between 93 to 96 (cap on oil \$25/bbl; gas \$2.75/mcf); same reduction for workover or completion for 24 months but no cap on price (2% total) 1993 107 Modified computation of school local property taxes/local resources (comparing resources before 7/1/91 & basing foundation program amount on before/after amounts) 1993 223 Added \$.01 sales/use tax & changed tax distribution from 2/3 to 72% to general fund 1994 13 Gas tax distribution 13.5% to counties; 14% to state-county road account in highway fund; 15% for cities & towns; 57.5% to state highway fund 1994 85 Tax credit voucher program for ethanol up to \$2M per year until 7/1/2000 1994 6 Diversion of severance taxes from PWMTF to budget reserve account (BRA) extended to 6/30/96 1995 141 Granted 50% credit against natural gas severance tax (2%) for research projects to enhance natural gas production (2% total) 1995 55 Exempted oil produced from previously shut-in	1990	93	=
through 6/30/92 1991 13 Coal Tax Equity Act extended through 3/31/95 1991 149 Reduced insurance premium tax rate from 2.5% to .75% (retaliatory provision for other states remained in effect) 1991 237 Extension of 2% severance tax exemption on tertiary production to 12/31/94 (4% total) 1991 239 Exempted specified underground mining equipment from property tax 1991 42 Exempted uranium from 4% severance tax as long as price under \$17/pound 1991 139 Extended 4% severance tax exemption on wildcat wells to 12/31/94 (2% total) 1992 4 Reallocated 30% of revenues from 1.5% severance tax on coal & trona to public school foundation program account 1992 77 Extended gasohol tax reduction \$.08/gallon to \$.04/gallon to 2000 1993 167 Exempted oil & gas from 4% severance tax if well drilled (new production) between 93 to 96 (cap on oil \$25/bbl; gas \$2.75/mcf); same reduction for workover or completion for 24 months but no cap on price (2% total) 1993 107 Modified computation of school local property taxes/local resources (comparing resources before 7/1/91 & basing foundation program amount on before/after amounts) 1993 223 Added \$.01 sales/use tax & changed tax distribution from 2/3 to 72% to general fund 1994 13 Gas tax distribution 13.5% to counties; 14% to state-county road account in highway fund; 15% for cities & towns; 57.5% to state highway fund 1994 85 Tax credit voucher program for ethanol up to \$2M per year until 7/1/2000 1994 6 Diversion of severance taxes from PWMTF to budget reserve account (BRA) extended to 6/30/96 1995 141 Granted 50% credit against natural gas severance tax (2%) for research projects to enhance natural gas production (2% total) 1995 55 Exempted oil produced from previously shut-in

wells from all but 1.5% severance tax for PWMTF	1995	55	Exempted oil produced from previously shut-in
			wells from all but 1.5% severance tax for PWMTF

1995	59	Diversion of severance taxes from PWMTF to
2333		budget reserve account (BRA) extended to
		6/30/2000
1995	76	Extended tertiary production 2% exemption
		through 12/31/96 (4% total)
1995	104	Extended uranium severance tax exemption
		through 1/1/99; lowered spot price for
		qualifying uranium from \$17 to \$14/pound
1995	149	Extended 4th cent sales/use tax through 6/30/98
1995	74	Extended 1.5% severance tax for collection
		wells through 1/1/99 (in lieu of 6% rate)
1995	75	Extended reduced severance tax rate on oil/gas
		wells drilled (new production) through 3/31/98
1997	171	Extended 4% severance tax exemption for oil/gas
		produced from workovers & recompletions to 2001
		(2% total)
1997	72	Extended tertiary production 2% exemption to
		March, 2001 (4% total)
1997	3	Local option 6 mills for schools to expire as
Spec.		of 1998 (affects amount of state funding needed
Sess.		for schools)
1997	1	Extended 4th cent sales/use tax through
Spec.		6/30/2002
Sess.		
1998	16	Specified collection well property tax
		exemption applied to production for CY 94
1998	108	Increased fuel tax to \$.13/gallon on gas &
		diesel
1998	47	Extended reduced severance tax rate on oil/gas
		wells drilled (new production) through
		3/31/2003 (2% total)
1998	48	Extended uranium tax severance tax exemption
		through 3/31/2003
1999	186	Extended ethanol tax credit program from
		7/1/2000 to 7/1/2003
1999	64	Coal Equity Tax Act extended through
		12/31/2003; lowered maximum severance tax per
1000	1.00	ton from \$.80 to \$.60
1999	132	Imposed a limitation on sales/use tax on
		transportable home to be based on 70% of the
1000		sales price of the home
1999	1 (-	T
	165	Imposed sales/use tax on price of cigarettes
		(removed exemption)
1999	165 155	(removed exemption) Imposed sales/use tax on price of tobacco
		<pre>(removed exemption) Imposed sales/use tax on price of tobacco products (cigars, snuff & other tobacco</pre>
		(removed exemption) Imposed sales/use tax on price of tobacco
		<pre>(removed exemption) Imposed sales/use tax on price of tobacco products (cigars, snuff & other tobacco</pre>

		<pre>(removed exemption) Imposed sales/use tax on price of tobacco products (cigars, snuff & other tobacco</pre>

1999	168	Oil Producers Recovery Act - reduced severance
	100	tax on oil from 6% to 4% (if oil price exceeds
		\$20/barrel the tax returns to 6%); granted
		sales tax exemption for sales of power to
		person engaged in oil extraction
1999	121	Diversion of severance taxes from PWMTF to
1333		budget reserve account (BRA) extended to
		6/30/2004
2000	4	Repeal of Oil Producers Recovery Act (returned
		severance tax on oil from 4% to 6%; repealed
		sales tax exemption for sales of power to
		person engaged in oil extraction
2000	31	Rail Mile Tax - imposed a 7-cent tax on each
		train mile traveled by a train; imposed \$100
		annually for each public grade crossing on the
		line of a railroad (repealed in 2004)
2000	35	Changed annual corporate license tax minimum
		from \$25 to \$50 and changed stair step amounts
		to two-tenths of a mill on the dollar
2000	26	Made the 4 th cent for sales and use tax
		permanent (was due to expire on June 30, 2002)
2000	64	Extends the 2-cent fuel tax on gas & diesel
		with no exemptions through June 30, 2000
2000	99	Removes 4% severance tax break granted for new
		production of gas wells from natural gas
		produced from "shallow" wells (wells less than
		2,000 feet in depth-mainly affects coalbed
		methane)
2000	102	Coal Transport Tax - Imposes a one-mill (.0001)
		per ton of coal tax on the commercial
		transportation of coal transported per mile or
		portion thereof; minimum tax is 50 cents per
		truck, trailer or railcar used to transport
		coal (repealed in 2004)
2001	74	Places a statute of limitation on actions filed
		before the state board of equalization to 5
		years (any action not based on fraud)
2002	37	Clarifies taxable services at an oil or gas
		well site (exempts all activities prior to the
		setting and cementing of production casing)
2002	49	Changes period in which audits of mineral taxes
		are to be commenced from within 5 years of
		production to within 3 years of production.
2002	50	Amends and clarifies mineral lien statutes
		(comprehensive changes to the statutes)
2002	79	Increases distribution of sales/use tax to
		local governments (from 27% to 30%)

2002	48	Extensive amendments to the sales/use tax statutes including clarifying exemption for business personal property when business is sold; exemption for motor vehicles used in interstate commerce; increases penalty for vendor who collects tax but fails to remit to
2002	62	Changes the diversion of severance taxes (above the 1.5%) from the budget reserve account to the severance tax distribution account; repeals distribution of severance tax on shallow gas wells (coalbed methane wells) to the PWMTF and deposits in severance tax distribution account
2003	23	Allows a county to impose up to 2% optional sales/use tax for specific purpose, but combined total of specific purpose tax and general revenue optional tax (1%) cannot exceed 2%
2003	27	Requires all special districts to file geographical boundary information with the dept. of revenue, county assessor and county clerk
2003	52	Increases cigarette taxes from 12 cents/pack to 60 cents/pack
2003	62	Amends and clarifies property tax liens on mineral production (changes made to follow severance tax liens)
2003	72	Authorizes resort areas to be formed into resort districts which can impose an optional sales/use tax
2003	203	Grants a sales/use tax exemption for equipment used to generate electricity from renewable resources (expires June 30, 2008)
2004	1	Repealed the coal transport tax enacted in 2000
2004	15	Repealed the rail mile tax on railroads enacted in 2000
2004	121	Property tax relief program amendments: Dept. of Revenue to fund property tax refunds to qualified applicants (repealed 1/1/2008)
2005	5	Streamlined sales tax agreement amendments: provides immunity from audit for vendors who voluntarily license themselves in Wyo.
2005	10, 62, 64	Taxation of intangible property: 3 bills requiring a study of intangible property (64), amending definition to include intangibles in real property valuation (62), and treatment of intangibles for calendar year 2005 (10)

2005	65	Property tax relief program amendments: changes income criteria to qualify for property tax
		refund
2005	77	Tobacco taxes: increases penalty provisions; requires licensure for importers of tobacco
2005	136	Grants a sales/use tax exemption for sale or
		lease of aircraft used in a commercial air
		carrier operation & aircraft repair, remodeling
0006	0.5	or maintenance at a FAA repair station
2006	35	Grants a 2 year sales/use tax exemption for food for domestic consumption
2006	96	Extends the oil/gas well service sales tax
		exemption to the deepening of a well
2006	31	Provides a definition of "tangible" and
		"intangible" personal property and what is
		exempted from property tax as an intangible
2006	80	Expands the tax refund to the elderly and disabled program
2006	14	Grants a sales/use tax exemption for coal
		gasification or liquefaction facilities operational equipment
2006	10	Provides for the sourcing of sales/use tax
		purchases made (under the Streamlined Sales Tax Act)
2007	4	Provides telecommunications (including cable
		and satellite TV) to be assessed at 9.5% (even
		though still classified as industrial property)
2007	100	Removed lifetime limit on veterans' property
		tax exemption
2007	74	Increased maximum resort district tax from 1% to 3%
2007	140	Provides sales/use tax exemption on food
2007	133	Increases optional general purpose excise tax from 1% to 2%
2007	188	Extends the sales/use tax exemption for
		equipment used to generate electricity from
		renewable resources from 2008 to 2012
2008	28	Provides for valuation and taxation of
		producer-processed natural gas
2008	59	Provides for valuation and severance taxation
		of helium
2008	101	Extended the property tax refund program
2008	110	Increases the eligible amount of eligible
		income and amount of refund under the veteran's
		property tax exemption
2009	73	Provides eligibility criteria for the property
		tax refund program
2009	153	Provides for valuation and property taxation of helium

Year Chapter

2009	43	Provides for the taxation of moist snuff tobacco by weight
2010	100	Grants a property tax exemption for property used for economic development
2010	33	Extends the sales/use tax exemption for property used to manufacture personal property
2010	50	Grants a property tax exemption for large data processing centers
2010	49	Imposes an excise tax of \$1 per megawatt hour on electricity generated from wind turbines
2010	51	Provides for property tax assessment of vacant land
2011	4	Clarifies excise tax on tangible personal property used in oil/gas well site services
2011	48	Extends sales/use tax for data processing centers to software & power supplies
2011	83	Extends sales/use tax exemption for manufacturing equipment to December 31, 2017
2011	132	Grants credit for vendors collecting sales/use taxes
2011	99	Grants 100% gas tax refund for agricultural use
2012	33	Allows specific purpose excise tax to be used for maintenance of public roadways
2012	65	Provides for the taxation of "roll your own" cigarettes made from machines
2012	105	Repeals the tax credit for producers of ethanol fuel

Mineral Tax History & Incentives*

1969 through 2012

Year	Chapte	er Explanation
1969	193	Imposed the first severance tax on gold, silver & other precious metals, soda, saline, coal, trona, uranium, bentonite, petroleum or other crude mineral oil or natural gas or other valuable deposit (1% rate based on property tax valuation)
1974	HJR2 A	Created the Permanent Wyoming Mineral Trust Fund (PWMTF); 1.5% severance tax on coal, oil, natural gas, oil shale & such other minerals as designated by the Legislature deposited in the PWMTF
1974	19	Increased severance tax rate to 3% on trona, coal, other fossil fuel minerals, & oil, natural gas & oil shale
1975	125	Increased severance tax rate to 4% on trona, coal, oil, natural gas & oil shale (2% severance tax rate remained on uranium, bentonite, gold, silver, or other precious metals, soda & saline)
1975	120	Imposed a coal impact severance tax on a graduated scale (19744%; 19758%; 1976 - 1.2%; 1977 - 1.6%; 1978 & after - 2%) until \$120M collected
1977	189	Increased severance tax on coal by 1.6% for CY 77 & 2% for CY 78 until \$160M collected; increased severance tax on coal by 1.5% for Water development account; increased severance tax on coal by 1% for highway fund; increased severance tax on coal by .5% to PWMTF; effective 1/1/78¹ (total 10.1%); increased severance tax on trona by 1.5% (total 5.5%); increased severance tax on uranium by 3.5% (total 5.5%)
1977	155	Increased severance tax on coal, uranium & trona by 1.5% until \$250M collected; effective 1/1/78
1981	49	Increased severance tax on oil/gas by 2% (6% total); distributed to state (highway fund, PWMTF & water development account) & cities & counties
1983	173	Decreased severance tax on underground coal by 3.25% to 7.25%

 $^{{}^{\}star}\text{Mineral}$ tax incentives are displayed in bold type.

1985	182	Decreased severance tax on collection wells
		from 6% to 1.5% & exempted from property tax through 1989
1986	3	1/4 of proceeds from severance taxes (except
		underground coal) diverted to worker's
		compensation fund
1987	97	Coal Equity Tax Act of 1987 - limited severance
		tax to \$.80/ton on high-cost coal
1987	29	Severance taxes paid on CO2 injected in oil
		production allowed as a credit against oil
		severance tax
1987	241	Granted 4% severance tax exemption for wildcat
		wells for 4 years (total 2%)
1988	93	Allowed deduction for return on investment for
		mineral production on certain capital
		investments for transportation facilities or
		processing plants
1988	SJR7	Amended constitution to provide for 3 tier
		system for fair market value of taxation
1.000	7.0	(minerals, industrial, & all other)
1988	73	Implemented 3 tier system for fair market value
		in assessing property for property tax
1988	72	(minerals, industrial, & all other) Budget reserve account diversion of severance
1900	12	taxes begun
1989	35	Extended Coal Tax Equity Act to 1991 (3/31/91)
1989	172	Exempted coal used in processing from property
	- / -	& severance taxes
1989	287	Exemption for tertiary oil production from
		projects certified by Oil & Gas Commn.; granted
		a severance tax exemption up to 1/2 of wages
		paid to resident workers or total amount of 2%
		severance tax
1989	36	Created municipal rainy day account funded with
		excess oil & gas severance tax & federal
		mineral royalties
1989	57	Repealed deduction allowed for return on
		investment for mineral production (on
1000	100	transportation facilities & processing plants)
1989	120	Continued budget reserve account diversion of
		severance taxes through 6/30/91
1989	144	Decreased severance tax on uranium from 4% to
		2%

1990	22	Extended 1.5% severance tax on collection wells to 1/1/95
1990	13	Budget reserve account diversion extended through 6/30/92
1991	13	Coal Tax Equity Act extended through 3/31/95
1991	237	Extension of 2% severance tax exemption on tertiary production to 12/31/94 (4% total)
1991	239	Exempted specified underground mining equipment
		from property tax
1991	42	Exempted uranium from 4% severance tax as long
		as price under \$17/pound
1991	139	Extended 4% severance tax exemption on wildcat
		wells to 12/31/94 (2% total)
1992	4	Reallocated 30% of revenues from 1.5% severance
		tax on coal & trona to public school foundation
		program account
1993	167	Exempted oil & gas from 4% severance tax if
		well drilled (new production) between 93 to 96
		(cap on oil \$25/bbl; gas \$2.75/mcf); same
		reduction for workover or completion for 24
1004		months but no cap on price (2% total)
1994	6	Extended budget reserve account diversion to 6/30/96
1995	141	Granted 50% credit against natural gas
		severance tax (2%) for research projects to
		enhance natural gas production (2% total)
1995	48	Coal Tax Equity Act extended through 3/15/99
1995	55	Exempted oil produced from previously shut-in
1005		wells from all but 1.5% severance tax for PWMTF
1995	59	Budget reserve account diversion extended 6/30/2000
1995	76	Extended tertiary production 2% exemption
		through 12/31/96 (4% total)
1995	104	Extended uranium severance tax exemption
		through 1/1/99; lowered spot price for
		qualifying uranium from \$17 to \$14/pound
1995	74	Extended 1.5% severance tax for collection
		wells through 1/1/99
1995	75	Extended reduced severance tax rate on oil/gas wells drilled (new production) through 3/31/98
1997	171	Extended 4% severance tax exemption for oil/gas
		produced from workovers & recompletions to 2001
		(2% total)
1997	72	Extended tertiary production 2% exemption to March, 2001 (4% total)

1998	16	Specified collection well property tax exemption applied to production for CY 94
1998	47	Extended reduced severance tax rate on oil/gas wells drilled (new production) through 3/31/2003 (2% total)
1998	48	Extended uranium tax severance tax exemption through 3/31/2003
1999	64	Coal Equity Tax Act extended through 12/31/2003; lowered maximum severance tax per ton from \$.80 to \$.60
1999	168	Oil Producers Recovery Act - reduced severance tax on oil from 6% to 4% (if oil price exceeds \$20/barrel the tax returns to 6%); granted sales tax exemption for sales of power to person engaged in oil extraction
1999	121	Budget reserve account diversion extended from 6/30/2000 to 6/30/2004
2000	4	Repeal of the Oil Producers Recovery Act of 1999 (severance tax on oil returned from 4% to 6%; repealed sales tax exemption for sales of power to person engaged in oil extraction)
2000	99	Removed certain shallow gas wells (like coalbed methane) less than 2,000 feet in depth from the 4% severance tax reduction in W.S. 39-14-205(f) (granted by 1993 Wyo. Sess. Laws Ch. 167) so they will be taxed at full 6% severance tax
2001	N/A	No significant bills affecting mineral taxation
2002	37	Clarifies taxable services at an oil or gas well site (exempts all activities prior to the setting and cementing of production casing)
2002	49	Changes period in which audits of mineral taxes are to be commenced from within 5 years of production
2002	50	Amends and clarifies mineral lien statutes (comprehensive changes to the statutes)
2002	62	Changes the diversion of severance taxes (above the 1.5%) from the budget reserve account to the severance tax distribution account; repeals distribution of severance tax on shallow gas wells (coalbed methane wells) to the PWMTF and deposits in severance tax distribution account
2003	24	Changes the industry factor for trona valuation to 32.5%
2003	62	Amends and clarifies property tax liens on mineral production (changes made to follow severance tax liens)

2003	105	Extended uranium tax severance tax exemption
		through 3/31/2009
2003	130	Extended tertiary production 2% exemption to
		March, 2008 (4% total), provided the price
		received by the producer is less than \$27.50
		per barrel
2004	N/A	No significant bills affecting mineral taxation
2005	4	Amends and clarifies mineral audit periods
		(must commence within 3 years and 6 months
		following the reporting date; must be completed
		within 2 years after the audit is commenced)
2006	96	Extends the oil/gas well service sales tax
		exemption to the deepening of a well
2006	14	Grants a sales/use tax exemption for coal
		gasification or liquefaction facilities
		operational equipment
2007	N/A	No significant bills affecting mineral taxation
2008	28	Provides for valuation and taxation of helium
2009	153	Provides for valuation and property taxation of
		helium
2009	150	Clarifies time periods for auditing and
		reporting of mineral production
2010	N/A	No significant bills affecting mineral taxation
2011	4	Clarifies excise tax on tangible personal
		property used in oil/gas well site services
2012	15	Allows dept. of revenue and taxpayer to agree
		on alternative method of trona tax valuation
