

School Capacity Calculations

This report demonstrates the updated School Facilities Commission Capacity Methodology.

Agenda Item

“Discussion of the actual capacity of school buildings for each district, the impact of amending the restricted size of K-3 classrooms.”

Response

The results of restricted capacity calculations are shown from 16 to 25 in this report. It shows how the use of teaching spaces and size impact calculations.

School Capacity Calculations

Presented by Troy Decker, SFD Planning

- General
 - The commission’s capacity methodology was updated on June 22, 2017
 - Purpose – to establish budget recommendations in reference to current statutes to optimize the use of available space within classrooms

- Elementary School Capacity Methodology

Grade Level	Previous Methodology	Present Methodology
Kindergarten & 1st	50 sq. ft. per student	50 sq. ft. per student
2nd thru 6th	40 sq. ft. per student	40 sq. ft. per student
Kindergarten thru 3rd	Restricted capacity of 16	Restricted capacity of 25
4th thru 6th	Restricted capacity of 25	Restricted capacity of 25

Example #1: Gannett Peak Elementary (Lander)

- Built in 2013 under SFC design guidelines
- Classroom space is divided by:
 - 50 sq. ft. for K-1
 - 40 sq. ft. for 2-6
 - 80 sq. ft. for self-contained SPED
- Actual capacity reveals the size of each room
- In this example, no room calculates more than 22 students using the SFC methodology.

Following page:

- Enrollment is 565 [], actual capacity is 638.
- Once a room reaches its size limitation, it doesn't calculate any more students [

16	17	17
----	----	----

], no matter where the restricted capacity is set above that number.
- Student enrollment [] is divided by building capacity [] to show percent of capacity.
- Actual capacity [] is compared to building capacity [] in each restricted column to show how many seats are unutilized.
- A building is reaching its optimal efficiency [] (available space is being used) when the capacity or percentage begins repeating itself.

- Built in 1977 by the district
- Classrooms were designed for open space education
- Actual capacity reveals oversized rooms
 - K-2 rooms are not present
 - 3-6 rooms only calculate 25 students for any space over 1,000 sq. ft.

- The SFC methodology calculates capacity at 347 with 228 unutilized seats.
- The facility is way under capacity and so optimal utilization will not be reached until enrollment equals or is greater than the restricted capacity of 347.

- All elementary schools included (in town and rural).
- SFC has a restricted capacity of 25. However, most buildings are full at less than 25 seats per classroom [■]. The SFC methodology does not calculate additional seats when space is not available.
- The district is at 91% capacity at the elementary school level. ■
