

WYOMING LEGISLATIVE SERVICE OFFICE

Memorandum

DATE May 26, 2017

TO Members, Select Committee on School Finance Recalibration
Members, Joint Revenue Committee

FROM Matthew Willmarth, Senior School Finance Analyst

SUBJECT Wyoming K-12 School District Capital Construction Enhancements and State Funding for Capital Construction and Major Maintenance

This memorandum details K-12 school district funding enhancements for school district facilities across Wyoming based upon LSO analysis of enhancement data from the State Construction Department's School Facilities Division (SFD) asset management software. Wyoming Statute 21-15-111(a)(iii) defines a school district local enhancement to a building that is "exceeding state building adequacy standards."

Enhancements have been paid for by school districts through many different means: the issuances of bonds through voter approval, school district general funds, school district special reserve funds, recreational mill levies, donations, and major maintenance. Wyoming Statute 21-15-109(f) states in part:

"Notwithstanding subsection (e) of this section, a district may expend up to ten percent (10%) of the amount distributed during any school year under subsection (b) of this section for major building and facility repair and replacement needs of the district which are not specified in the district's facility plan, including expenditures for maintenance of district enhancements. Expenditures shall be made under this subsection only after the district's building and facility repair and replacement needs specified in its facility plan have been addressed in accordance with subsection (e) of this section and the department has approved the district's proposed expenditures under this subsection."

Since FY 2002, according to the attached SFD enhancement report, the estimated total to be expended on enhancements for school district projects is \$198.6 million. This includes all projects, including projects the state did not share in the cost for. In cases where an estimated cost was provided and actual expenditures were not available, the estimated figure in Attachment 1 was used. A detailed listing of each project and funding source can be found in Attachment 1. Table 1 depicts, by school district, the estimated enhancement cost from the SFD report.

Table 1. Wyoming School District Estimated Cost of Enhancements to School Buildings.

School District (City)	Amount	School District (City)	Amount
Albany #1 (Laramie)	\$25,672,525	Lincoln #2 (Afton)	\$2,903,611

Lincoln #1 (Kemmerer)	\$5,119,400		

Source: LSO analysis of SFD AiM data for projects approved since FY 2002.

At the Select Committee on School Finance Recalibration's April 3, 2017 meeting, a request was made to identify the number and cost of newly constructed school buildings, renovated school buildings, and ancillary (i.e., central office and transportation) buildings since the State took responsibility for the construction and maintenance of K-12 facilities as a result of the *Campbell* cases. Additionally, the Select Committee requested the total amount of major maintenance provided from fiscal years 1999 to 2017.

Table 2 summarizes this information at the state level with information provided to the LSO from the SFD. Attachment 2 details the capital construction information by project. According to the SFD, an estimated 190 new or renovated facilities have been appropriated state funds, totaling \$2.3 billion. For the 190 facilities, approximately \$132.5 million (5.5 percent) in local funds have been used. Additionally, the Legislature has appropriated \$752.1 million for major maintenance.

WYOMING LEGISLATIVE SERVICE OFFICE Memorandum

Table 2. State Capital Construction and Major Maintenance since *Campbell* Decisions.

Funding Category	Number of Buildings	State Funds	Local Funds	Total Funds
Capital Construction	190	\$2,281,465,307	\$132,446,522	\$2,413,911,830
<i>New Buildings</i>	114	\$1,824,358,156	\$113,553,294	\$1,937,911,450
<i>Renovation Buildings</i>	41	\$442,673,023	\$18,893,229	\$461,566,252
<i>Ancillary Buildings</i>	35	\$14,434,128	\$0	\$14,434,128
Major Maintenance	N/A	\$752,147,882	\$0	\$752,147,882
Total	190	\$3,033,613,189	\$132,446,522	\$3,166,059,711
